Dear Mr. Lindsey:

The Office of Federal and State Materials and Environmental Management Programs (FSME) has reviewed your email dated December 3, 2007 in response to our letter dated September 4, 2007 which transmitted our comments on Oregon's final revision to Administrative Rules Division 333. These regulations correspond to 10 CFR 20 and 34. We also reviewed the additional information provided in Sections 333-120 and 333-105 of the Oregon Code of Regulations. We discussed our review of the regulations with Kevin Siebert on November 24, 2007.

The additional information provided in your letter has enabled us to verify that your regulations meet the essential objectives of the Compatibility Category B designation for comment three and embody the essential objectives of the Compatibility Category H&S designation, for comments one and two.

There were seven additional comments from the September 24, 2007 letter which pertained to the GL Rule. As noted in All Agreement States letter [FSME-07-087](#), dated September 20, 2007, NRC staff will continue to hold in abeyance any determination on those rules and compatibility of 10 CFR 31.5 and 31.6, if the Agreement State has the essential elements of the NRC's rule and is more restrictive than the NRC's rule. All seven of these comments are more restrictive than the NRC's regulations, and there is no corrective action required for these comments at this time.

The SRS Data Sheet summarizes our knowledge of the status of other Oregon regulations and legal binding requirements, as indicated. Please let us know if you note any inaccuracies, or have any comments on the information contained in the SRS Data Sheet. This letter, including the SRS Data Sheet, is posted on the FSME website:

Also, Oregon includes additional training requirements in 333-105-0530(a) and (b) that are more stringent than equivalent NRC requirements, "...and/or one month (160 hours) of active participation in the performance of industrial radiography utilizing radiation machines. Individuals performing industrial radiography utilizing radioactive materials and radiation machines must complete both segments of the on the job training (3 months or 480 hours)."</p> <p>Oregon needs to remove the reference to number of hours of training specified in 333-105-0530 to meet the Compatibility Category B designation assigned to 10 CFR 34.43.</p> <p>COMMENT RESOLVED: 333-105-0530</p>
