

April 2, 2004

Mr. Richard A. Ratliff, PE, LMP, Chief
Bureau of Radiation Control
Texas Department of Health
1100 West 49th Street
Austin TX 78756-3189

Dear Mr. Ratliff:

We have reviewed the proposed changes to the Texas Regulations for Control of Radiation, 25 Texas Administrative Code, §289.251, "*Exemptions, General Licenses, and General License Acknowledgments*" and §289.252, "*Licensing of Radioactive Material*", received by our office on March 3, 2004. Our review and comments are in response to the State's request for Nuclear Regulatory Commission (NRC) evaluation of the changes to the Texas radiation control rules that incorporated the amendment identified on the States Regulation Status Data Sheet (SRS). These regulations were reviewed by comparison to the equivalent NRC rules in 10 CFR Parts 30 and 31 and the requirements of the one amendment identified in the enclosed SRS. We discussed our review of the regulations with Ms. Cindy Cardwell, of your staff, on April 2, 2004.

As a result of our review, we have one comment. Under our current procedure, a finding that a State regulation meets the compatibility and health and safety categories of the equivalent NRC regulation may only be made based on a review of the final State regulation. Please provide a final amended version of your rules, showing the location of any changes made, in response to our comments. If there are any comments which the State believes are in error, the State should identify the section of their regulations that meet the designated compatibility category. Please note that we have limited our review to regulations required for compatibility and/or health and safety, but have determined that if these regulations are adopted, incorporating our comments and without significant change, they would meet the compatibility, health and safety categories established in the Office of State and Tribal Programs (STP) Procedure [SA-200](#).

The SRS Data Sheet summarizes our knowledge of the status of other Texas regulations. Please let us know if you note any inaccuracies or have any comments on the information contained in the SRS Data Sheet. This letter, including the SRS Data Sheet is posted on the STP website: <http://www.hrsd.ornl.gov/nrc/rulemaking.htm>.

If you have any questions regarding the comments, the compatibility and health categories, or any of the NRC regulations used in the review, please contact me or Vivian Campbell of the Region IV staff at 817-860-8143 or VHC@NRC.GOV.

Sincerely,

By KN Schneider For

Josephine M. Piccone, Deputy Director
Office of State and Tribal Programs

Enclosure(s):
As stated

April 2, 2004

Mr. Richard A. Ratliff, PE, LMP, Chief

**COMMENTS ON PROPOSED TEXAS REGULATIONS
AGAINST COMPATIBILITY AND HEALTH AND SAFETY CATEGORIES**

State Regulation	NRC Regulation	RATS ID	Category	Subject and Comments
289.251(g)(2)	31.5(c)(13)(iv)	2001-1	B	<p>Certain detecting, measuring, gauging, or controlling devices and certain devices for producing light or an ionized atmosphere</p> <p>Texas regulation 289.251(g)(2) provides that persons generally licensed by Texas are not subject to the requirement to file for a general license acknowledgment if the material is used in Texas jurisdiction for a period of less than 30 days in a calendar year. The regulation does not authorize reciprocity for NRC or other Agreement State general licensees. 10 CFR 31.5(c)(13)(iv) authorizes reciprocity for Agreement State general licensees for a period less than 180 days in a calendar year. As a result, the State regulations do not meet the compatibility category with respect to the requirements for recognizing NRC and other Agreement State general licensees.</p> <p>Texas regulation 289.251(g)(2) should be amended to essentially identical to that of NRC's rules in 10 CFR 31.5(c)(13)(iv).</p>

STATE REGULATION STATUS

State: Texas

[One amendment reviewed is identified by a ★ at the beginning of each equivalent NRC regulation.]

Tracking Ticket Number: 4-57
