

December 2, 2005

Mr. Richard A. Ratliff, PE, LMP  
Radiation Program Officer  
Bureau of Radiation Control  
Department of State Health Services  
Division for Regulatory Services  
1100 West 49<sup>th</sup> Street  
Austin, TX 78756-3189

Dear Mr. Ratliff:

We reviewed the Texas proposed license condition to implement increased controls for certain licensees that possess certain radioactive materials in quantities of concern, received by our office on August 1, 2005. This license condition was reviewed by comparison to the equivalent proposed NRC requirements that were transmitted from this office on July 18, 2005, with supplemental information provided on August 1, 2005. On August 11, 2005, we sent you a response which indicated that we approved the proposed license condition, with modifications.

We determined that the proposed Texas license condition, if issued without significant change, would meet the compatibility category 'B' designation in NRC Order EA-05-090.

We appreciate receiving the final license condition issued to effected Texas licensees.

Our August 11, 2005, letter did not include an updated SRS Data Sheet summarizing our knowledge of the status of other Texas regulations and legal binding requirements, as indicated. The updated SRS data sheet will be enclosed along with the findings of the regulation submission from Texas currently under review. This letter, including the SRS Data Sheet, will be posted on the STP website: <http://www.hsrdr.gov/nrc/rulemaking.htm>.

If you have any questions regarding the review, the compatibility categories, or any of the NRC requirements used in the review, please contact Mr. Andrew Mauer of my staff at 301-415-3962 or e-mail: [anm@nrc.gov](mailto:anm@nrc.gov).

Sincerely,

Dennis K. Rathbun, Deputy Director  
Office of State and Tribal Programs

Enclosure:  
As stated
