# **VA Hospital Building System**

Application of the Principles of Systems Integration  
to the Design of VA Hospital Facilities

Research Study Report  
Project Number 99-R047

Prepared by the Joint Venture of  
Building Systems Development and  
Stone, Marraccini and Patterson  
455 Beach Street, San Francisco

for the Research Staff  
Office of Construction  
Veterans Administration  
Washington, D.C.

Original Printing January 1972 (Revised August 1977)

---

For sale by the Superintendent of Documents, U.S. Government Printing Office  
Washington, D.C. 20402

Stock No. 051-000-00112-5

## Foreword

This report consists of three parts, the major functional content of the material in each part being so independent of one another that each part is referred to as "Volume".

Volume One, the Design Manual, is the primary product of the project. It is intended to be a basic document for the VA and for A/E contractors working on system hospitals. It is structured so that the Office of Construction may adopt it in whole or in part as a Construction Standard, and subject it to regular review and revision. It describes the Building System Prototype Design and suggests a general procedure by which the Design may be utilized on a building project.

Volume Two, the Data Base, contains information on user needs, functional requirements, costs of existing hospitals, labor unions, and laws and regulations. It is intended to serve in conjunction with the Design Manual during application of the system to a specific building project.

Volume Three, the Project Report, is the consultants account to the Veterans Administration of the systems integration program. It provides a summary, conclusions, recommendations, and various appendices such as the design rationale, example designs, special procedures and the cost and time analysis.

An overview of the project may be obtained by reading Section 100, Basic Concepts, in the Design Manual, and Section 600, Narrative, in the Project Report.

It will be noticed by the reader of the full report that a number of ideas are repeated in several places. This is intended to allow a certain amount of independence among the volumes, and to assure that significant points will not be missed by those reading only limited portions of the text.

## Acknowledgements

We are indebted to the many persons in the Veterans Administration who gave so generously of their time. We would like to thank those officers in the Department of Medicine and Surgery and the Office of Construction, and the staff of the hospitals visited, for their most helpful advice and encouragement.

### THE JOINT VENTURE

#### **BUILDING SYSTEMS DEVELOPMENT**

Tony Alexander  
Chris Arnold  
Visscher Boyd  
Gene Clements  
Diana Crawford  
Ezra Ehrenkrantz  
Jack Haines  
Barbara Michel  
S. A. Musser  
Mary Thompson  
John Vilett

#### **STONE, MARRACCINI AND PATTERSON**

George Agron  
Jim Borthwick  
Trudy Cammarata  
Don Chandler  
Corry Cook  
Ted Ellington  
Claire Forrest  
Dick Lee  
Norman Patterson  
Tib Tusler

### TECHNICAL CONSULTANTS

#### **RUTHERFORD AND CHEKENE (STRUCTURAL)**

Stan Chekene  
Bill Holmes  
Pete Bank

#### **AYRES, COHEN AND HAYAKAWA (MECHANICAL)**

Hideo Akagi  
Marx Ayres  
Terry Chandler  
Norm Cohen  
George Hayakawa  
Hugo Podhrazky  
Watson Takahashi

# CONTENTS

## **VOLUME ONE DESIGN MANUAL**

100	Basic Concepts
200	The Planning Modules
300	The Building Subsystems
400	Procedure

## **VOLUME TWO DATA BASE**

500	Data Base Requirements
-----	------------------------

## **VOLUME THREE PROJECT REPORT**

600	Narrative
700	Appendices

**(BLANK PAGE)**

# Contents of Volume One - Design Manual

	Figures and Tables in Volume One	viii
<b>100</b>	<b>BASIC CONCEPTS</b>	
110	The Prototype Design	1- 1
120	Application	1- 13
<b>200</b>	<b>THE PLANNING MODULES</b>	
210	The Structural Bay	1- 15
220	The Service Module	1- 19
230	The Space Module	1- 47
240	The Fire Section	1- 77
250	Planning Module Applications	1- 83
<b>300</b>	<b>THE BUILDING SUBSYSTEMS</b>	
310	Structure	1- 103
320	Ceiling	1- 137
330	Partitions	1- 165
340	Heating-Ventilating-Cooling	1- 189
350	Plumbing Distribution	1- 205
360	Electrical Distribution	1- 215

## FIGURES

1–

110-1	The Planning Modules	5
110-2	The Service Module as a Building Block for Alternative Building Configurations	6
110-3	The Building Subsystems	9
210-1	The Structural Bay	16
220-1	The Service Module	20
220-2	Nominal Service Module Dimensions	23
220-3	Typical Service Bay	30
220-4	Split Service Bay	32
220-5	Internal Service Bay	33
220-6	Primary Subzones: Section Through Beams	38
220-7	Secondary Subzones: Section Parallel to Beams	39
220-8	Secondary Subzones: Plan of Primary Subzone S3	41
230-1	The Space Module	48
230-2	Plan Zones	53
230-3	Patient Room Critical Dimensions	55
230-4	Bedroom Width Variations	57
230-5	Sanitary Zone Options: Sample Studies	58
230-6	Sanitary Zone Options: Sample Studies	59
230-7	Sanitary Zone Options: Sample Studies	60
230-8	Space Module Summary Sheet	63
230-9	Space Module Type 1	65
230-10	Space Module Type 2	66
230-11	Space Module Type 3	67
230-12	Space Module Type 4	68
230-13	Space Module Type 5	69
230-14	Space Module Type 6	70
230-15	Space Module Type 7	71
230-16	Space Module Type 8	72
230-17	Space Module Type 9	73
230-18	Space Module Type 10	74
230-19	Space Module Type 11	75
240-1	The Fire Section	78
240-2	Fire Section Planning: System vs. Conventional	80
240-3	Partition Requirements	82

## Figures and Tables in Volume One

250-1	Simple and Compound Assemblies	87
250-2	Examples of Classified Configurations	89
250-3	Service Strip Alternate Strategy: Air-Handling Unit Adjacent to Service Module with Ducted Supply	95
250-4	Service Strip Alternate Strategy: Air-Handling Unit Located on Roof	96
250-5	Service Strip Alternate Strategy: Air-Handling Unit Located in Service Zone with Ducted Supply	97
250-6	Assembly Characteristics of the Space Module and Service Module	99
250-7	Service Module Assembly Characteristics	101
250-8	Summary of Assembly Characteristics	102
310-1	Basic Design of Structural Subsystem	106
310-2	Relationship Between Main Structural Members	107
310-3	Typical Set of Openings in Shear Wall Between Service Bay and Rest of Service Module	117
310-4	Building Separations	125
310-5	Examples of Collectors for Lateral Forces	127
310-6	Accommodation of Change of Direction of Framing System when Beam Span is 45 Feet	130
310-7	Accommodation of Change of Direction of Framing System when Beam Span is not 45 Feet	131
310-8	Framing System for Portion of Floor with Service Strips	133
320-1	Basic Design of Ceiling Subsystem	138
320-2	Ceiling Components	140
320-3	Example of a Poured Reinforced Gypsum Platform	142
320-4	Example of a Precast Lightweight Concrete Platform	145
320-5	Example of a Dry Gypsum Platform	146
320-6	Example of a Metal Deck Platform	147
320-7	Ceiling Dimensions	153
320-8	Method of Support of Ceiling-Mounted Equipment from Structure Above	156
320-9	Acoustic Criteria for Various Assemblies	158
330-1	Basic Design of Partition Subsystem	166
330-2	Components of Partition Subsystem	167
330-3	Examples of Rated Perimeter Relief Runner Details at Head of Partition	168
330-4	Partition Generic Design Option 1: Gypsum Board on Metal Studs	170
330-5	Partition Generic Design Option 2: Laminated Gypsum Board	171
330-6	Furring Around Surface Mounted Services	173

## Figures and Tables in Volume One

340-1	Basic Design of HVC Subsystem	190
340-2	Typical Subzone Organization for HVC Distribution: Section	192
340-3	Service Bay and Secondary Subzones: Plan	195
340-4	Typical HVC Load Distribution	198
340-5	Air-Handling-Unit Capacities	199
350-1	Basic Design of Plumbing Distribution Subsystem	206
350-2	Typical Subzone Organization for Plumbing Distribution: Section	208
350-3	Secondary Subzones for Plumbing Distribution: Plan	209
350-4	Floor Drain Dimensions	211
360-1	Basic Design of Electrical Distribution Subsystem	216
360-2	Typical Subzone Organization for Electrical Distribution: Section	217
360-3	Load Distribution by Percentage of Total Load	220
360-4	Load Distribution in Heavy Demand Areas	221
	<b>TABLES</b>	<b>1–</b>
310-1	Design Live Loads	120
310-2	Summary of Vertical Design Loads	121
370-1	Coordination Checklist Index	232
