ALL AGREEMENT STATES

UPDATE TO THE TRAINING COURSE LIST FOR FISCAL YEAR 2013 (FSME-13-010)

PURPOSE: The U.S. Nuclear Regulatory Commission (NRC) staff has updated the list of courses for Fiscal Year 2013 that directly relate to the Agreement State programs (enclosure). The availability of the H-304, "Medical Use for Radionuclides," the H-313, "Brachytherapy & Gamma Knife" and H-305, "Safety Aspects of Industrial Radiography" courses has been delayed. As these courses become available, NRC will issue additional updates to the Agreement States.

BACKGROUND: The NRC funds Agreement State staff training and associated travel to attend the current courses offered through the NRC training program for materials licensing and inspection staff. We believe this funding enhances State programs and fosters national consistency in the implementation of the materials licensing and inspection programs.

DISCUSSION: The attached training schedule updates the schedule that was originally issued on October 11, 2012. Three courses have been delayed pending the awarding of contracts. Once new contracts are signed and the Technical Training Center (TTC) confirms the dates for the next courses, we will notify the Agreement States at least 10 weeks prior to the dates to allow time to submit training applications. At the 8 week mark, the selection process will be completed and training acceptance letters will be issued.

The H-304 Medical Use for Radionuclides and the H-313 Brachytherapy & Gamma Knife courses have been in very high demand over the last few years. To address the need for an increased number of these courses, the NRC staff has sought expanded options in the new contract. However, as a result of these options the total value of the contract reached a level that requires additional internal approvals and has necessarily delayed finalization of a contract. The new contract will not be awarded in time to process applications and make travel arrangements prior to the original March course dates. Thus, the medical courses scheduled for March 11-15, and March 18-22, 2013 respectively, are being cancelled. In addition, the contract award for the H-305 Industrial Radiography has been delayed and thus the class scheduled for February 25 – March 1, 2013, has also been cancelled.

We apologize for this inconvenience. We recognize the importance of these courses to your qualification programs and we will diligently work with the TTC to get these new contracts in place, with more medical courses and more slots available to the Agreement States.

While we will continue to actively work on expanding the availability of NRC training courses, we all have an obligation to ensure that our respective employees are trained and qualified regardless of whether the NRC is able to cover the training and travel costs.
