(FSME-11-101)**

Purpose: To provide the Agreement States with the opportunity to comment* on the Office of Federal and State Materials and Environmental Management Program's (FSME) draft NUREG-1556, Volume 2, Revision 1, "Consolidated Guidance about Materials Licenses: Program-Specific Guidance about Industrial Radiography Licensees."

Background: The Nuclear Regulatory Commission (NRC) is revising the licensing guidance in the NUREG-1556 series. The NRC originally published NUREG-1556, Volume 2 in August 1998. The document is intended for use by applicants, licensees, and NRC staff and is also available to the Agreement States.

Discussion: NUREG-1556, Volume 2, Revision 1, has been updated, by a working group made up of NRC and Agreement State representatives, to include safety culture, security of radioactive materials, protection of sensitive information, an appendix on lay-barges and offshore radiography, and to incorporate changes in regulatory policies and practices.
