

There's more riding on your tires than You thought.

Properly inflated tires can save money, gas, and the air.

It's just a simple little thing but it can mean a lot. Keeping your vehicle's tires inflated to the maximum recommended pressure improves gas mileage and saves you money. It can also reduce traffic congestion due to flats caused by uneven tread wear. And, proper inflation can reduce pollution by improving the operating efficiency of your engine.

So keep it up, because —

It all adds up to cleaner air

Every 3 months,
every 3,000 miles
or every
1.3 million breaths.

Changing your oil and regular maintenance mean a cleaner running engine.

It's true. Regular oil changes, tune-ups, and maintenance can help improve your vehicle's performance and gas mileage, extend its life, and increase its resale value. It can also help reduce traffic congestion due to preventable breakdowns. Most important of all, taking good care of your car could help reduce emissions by more than half. And that should make you breathe a lot easier between oil changes.

So keep it up, because—

It all adds up to cleaner air

Regular service helps your car and the air.

Maintaining your car improves performance,
which helps to reduce pollution and
traffic congestion due to breakdowns.
So keep it up, because —

It all adds up to cleaner air
