

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555-0001

(FSME-12-087, November, Program, 10 CFR 31)

November 7, 2012

ALL AGREEMENT STATES

**NRC NOTIFICATION OF ISSUANCE OF OFFICE OF THE INSPECTOR GENERAL
AUDIT REPORT RELATED TO NRC'S 10 CFR PART 31 GENERAL LICENSING PROGRAM
(OIG-12-A-21) (FSME-12-087)**

Purpose: On September 26, 2012, the Office of the Inspector General (OIG) of the U.S. Nuclear Regulatory Commission (NRC) issued the above referenced audit report. This audit report can be found on NRC's public Web site at: <http://pbadupws.nrc.gov/docs/ML1227/ML12270A243.pdf>. This letter is intended to inform all Agreement States of the OIG findings and recommendations related to NRC operations. No action or response on the part of the Agreement States is requested or required. The Agreement States may choose to adopt and address the OIG recommendations included in the referenced audit report.

Background: General licensed (GL) devices containing byproduct materials are issued pursuant to 10 CFR Parts 31 and 32. GL related details can be found in web link <http://www.nrc.gov/materials/miau/general-use.html>. The audit objective was to determine if NRC's GL program provides for the necessary accountability and tracking of GL to protect public health and safety. The OIG audit report makes two recommendations related to providing information on applicable regulatory requirements for new and existing NRC GLs.
