Monitoring of U.S. Imports of Tomatoes

Investigation No. 332-350

Publication 3646

November 2003

Preface

Section 316 of the North American Free-Trade Agreement Implementation Act (NAFTA Implementation Act), Public Law 103-182, requires the U.S. International Trade Commission (Commission) to monitor U.S. imports of "fresh or chilled tomatoes" and "fresh or chilled peppers, other than chili peppers," until January 1, 2009. As a result, the Commission instituted investigation No. 332-350, Monitoring of U.S. Imports of Tomatoes, and investigation No. 332-351, Monitoring of U.S. Imports of Peppers, under section 332(g) of the Tariff Act of 1930 (19 U.S.C. 1332(g)).

This report on the Commission's monitoring investigation covers tomatoes for fresh-market use and for processing. The purpose of this monitoring, as expressed in the NAFTA Implementation Act, is to permit the Commission to conduct an expedited investigation and, if appropriate, recommend to the President provisional relief should a petition for relief be filed under section 202 of the Trade Act of 1974 with respect to imports from all countries, or a petition requesting such relief be filed under section 302 of the NAFTA Implementation Act with respect to imports from Canada or Mexico. Generally, such provisional relief would remain in effect, pending completion of the investigation by the Commission and the taking of final action by the President.

This report contains statistical information gathered by the Commission on the U.S. tomato industry in the course of its monitoring. This information includes (1) consumption and trade data (including U.S. imports and U.S. exports) and (2) other industry data (including U.S. production quantity, value, unit value, and harvested area; U.S. cost-of-production estimates; shipments; quantities available at major shipping points; and average U.S. retail and shipping-point prices). The information presented in this report on the U.S. tomato industry was obtained from a number of sources, including the U.S. Department of Agriculture, the U.S. Department of Commerce, the Florida Tomato Committee, the University of Florida Cooperative Extension Service, and various other State agencies. This report principally covers 1998-2002 data and partial-year data for 2002 and 2003.¹

¹ Nothing in this report should be construed to indicate how the Commission would find in an investigation conducted under other statutory authority covering the same or similar subject matter.

Monitoring of U.S. Imports of Tomatoes

Highlights

The following are highlights of the statistical data collected on tomatoes for fresh-market use and processing for the 1998-2002 period.

Fresh-market Tomatoes

- Apparent U.S. consumption amounted to 2.4 million metric tons in 2002 up by 7 percent from 2.3 million metric tons in 2001; consumption in 2002 was valued at \$1.8 billion (table 1). The ratio of import volume to consumption in 2002 was 36 percent, down from 37 percent in 2001. U.S. production of tomatoes for fresh-market use was up by 5 percent from 1.6 million metric tons in 2001 to 1.7 million metric tons in 2002 (table 1). The value of production rose from \$1.1 billion in 2001 to \$1.2 billion in 2002, with a unit value of \$0.69 per kilogram in 2002.
- Florida and California have been the two States with the largest amount of production of fresh-market tomatoes since 1998, accounting for 39 percent and 31 percent, respectively, of total U.S. production volume of tomatoes for fresh-market use in 2002 (table 30). Other States with significant production volume during 1998-2002 included Ohio, Virginia, Tennessee, South Carolina, and New Jersey. Fresh tomatoes are harvested in Florida during October-June, in California primarily during June-November, and in most other States during March-September. U.S. harvested area of fresh-market tomatoes was up slightly from 124,250 acres in 2001 to 124,900 acres in 2002 (table 30).
- U.S. exports of fresh-market tomatoes fell by 17 percent from 180,615 metric tons in 2001 to 150,640 metric tons in 2002 (table 1), in part because of an antidumping complaint by Canadian growers filed against U.S. exports of fresh tomatoes in 2002. U.S. export volume was down by 6 percent during January-June 2003 as compared with exports during the corresponding months in 2002 (table 3). Canada was the leading market for U.S. exports of fresh-market tomatoes throughout the 1998-2002 period, accounting for 84 percent of the total volume (83 percent of value) in 2002.
- U.S. imports of fresh-market tomatoes rose by 4 percent from 823,541 metric tons in 2001 to 860,097 metric tons in 2002 (table 1). Imports were valued at \$795.2 million in 2002, up by 10 percent from the value in 2001. Imports were up by 27 percent by volume during January-June 2003 as compared with imports during the corresponding months in 2002. Mexico, the leading supplier of imports throughout the 1998-2002 period, accounted for 84 percent, by volume, of total imports of fresh-market tomatoes in 2002 (table 5). U.S. imports of fresh-market tomatoes from Canada fell 5 percent by volume from 2001 to 2002 and accounted for 12 percent of total imports in 2002. The bulk of imports from Canada are believed to have been greenhouse-grown tomatoes, against which U.S. tomato growers filed an antidumping petition in March 2001 but received a negative determination in the final investigation (731-TA-925 (Final)) April 2002.
- U.S. imports of cherry tomatoes remained virtually unchanged from 2001 to 2002 and amounted to 40,190 metric tons in 2002, with Mexico accounting for 98 percent of total imports in 2002 (table 6). Import value rose by 6 percent from \$47.3 million in 2001 to \$50.3 million in 2002. Imports of cherry tomatoes were down in January-June 2003 as compared with the corresponding months in 2002. U.S. imports of roma tomatoes amounted to 316,397 metric tons in 2002, up by 7 percent from 294,772 metric tons in 2001 (table 7). Mexico

accounted for 99 percent annually of total imports during the 1998-2002 period. Imports were up considerably in January-June 2003 as compared with imports during January-June 2002.

- U.S. imports of fresh-market tomatoes from Mexico, entered on a July-June crop-year basis, amounted to 814,332 metric tons in July 2002-June 2003, up 28 percent from 638,208 metric tons in July 2001-June 2002 (table 9). In recent years, about two-thirds annually of total U.S. imports of fresh-market tomatoes from Mexico entered through the Nogales Customs District. Most of the remainder entered through the San Diego District. In recent crop-years, more than one-half of total average annual imports from Mexico entered during January-April, overlapping the middle of the Florida shipping season.
- U.S. imports of fresh-market tomatoes from Canada, entered on a July-June crop-year basis, rose by 18 percent from 97,592 metric tons in 2001/02 to 115,111 metric tons in 2002/03 (table 10). During July 2002-June 2003, about 71 percent of total U.S. import volume of fresh-market tomatoes from Canada entered through the Detroit and Buffalo Customs Districts. During the same July 2002-June 2003 period, 48 percent of total crop-year import volume from Canada entered during March-June, coinciding with the latter half of the normal Florida shipping season.
- U.S. imports of fresh-market tomatoes from the Netherlands, entered on a July-June crop-year basis, fell by 31 percent from 29,067 metric tons in 2001/02 to 20,039 metric tons in 2002/03 (table 11). During July 2002-June 2003, nearly 60 percent of total imports from the Netherlands entered through the New York Customs District and about one-half of total crop-year imports entered during November-June, coinciding with the entire normal Florida shipping season.
- U.S. imports of fresh-market tomatoes from the European Union, entered on a July-June crop-year basis, rose by 42 percent from 35,126 metric tons in 2001/02 to 49,774 metric tons in 2002/03 (table 12). During the July 2002-June 2003 period, about two-thirds of total imports entered through the New York and Boston Customs Districts and 63 percent of imports entered during the November-June period, which coincides with the normal Florida marketing season. The Netherlands, Spain, and Belgium were the source for most of the imports.
- Average U.S. monthly retail prices of fresh-market tomatoes have trended significantly upward in recent years, from \$1.31 per pound annually in July 2001-June 2002 to \$1.71 per pound annually in July 2002-June 2003 (table 43). Average monthly shipping-point prices rose from \$0.31 per pound in 2001/02 to \$0.34 per pound in 2002/03. These prices usually vary a great deal throughout the season.

Processed Tomatoes

- U.S. production of tomatoes for processing rose by 26 percent from 8.4 million metric tons in 2001 to 10.6 million metric tons in 2002 (table 2). The value of production was estimated at \$683.1 million in 2002, up 25 percent from an estimated \$547.5 million in 2001. Unit values remained about the same at \$0.07 per kilogram annually throughout the 1998-2002 period.
- California, Indiana, and Ohio have been the leading States producing fresh tomatoes for processing, with production in these States together accounting for 98 percent of total

production volume in 2002 (table 32). U.S. harvested area of tomatoes for processing rose by 13 percent from 274,860 acres in 2001 to 311,800 acres in 2002, with California accounting for 95 percent of total harvested area in 2002.

- U.S. exports of processed tomatoes amounted to 148,799 metric tons in 2002, up by 5 percent from 141,910 metric tons in 2001; exports were valued at \$103.3 million in 2002 (table 2). Canada, Japan, Mexico, and Korea were the leading U.S. export markets for processed tomatoes in 2002, accounting for 79 percent of total export value in 2002 (table 4). Export volume during January-June 2003 was up by 22 percent over the amount exported during the corresponding period of 2002.
- U.S. imports of processed tomatoes rose by 13 percent from 43,902 metric tons in 2001 to 49,675 metric tons in 2002 (table 29). Imports were valued at \$59.2 million in 2002, up by 9 percent from \$54.2 million in 2001. Spain, Mexico, Israel, and Morocco were the leading sources of imported processed tomatoes in 2002, together accounting for 46 percent of import volume in that year. Imports during January-June 2003 were down considerably from the level during the corresponding period of 2002.

CONSUMPTION

Table 1

Fresh-market tomatoes: U.S. production, exports of domestic merchandise, imports for consumption, apparent consumption, and ratio of imports to consumption, 1998-2002

| Year | Production ¹ | Exports ² | Imports ³ | Apparent consumption | Ratio of imports to consumption |
|--|-------------------------|----------------------|----------------------|----------------------|---------------------------------|
| <i>Quantity (1,000 kilograms)</i> | | | | | <i>Percentage</i> |
| 1998 | 1,479,983 | 129,875 | 847,320 | 2,197,428 | 39 |
| 1999 | 1,666,274 | 151,657 | 740,656 | 2,255,273 | 33 |
| 2000 | 1,708,458 | 186,052 | 730,063 | 2,252,469 | 32 |
| 2001 | 1,611,484 | 180,615 | 823,541 | 2,254,410 | 37 |
| 2002 | 1,691,992 | 150,640 | 860,097 | 2,401,449 | 36 |
| <i>Value (1,000 dollars)</i> | | | | | |
| 1998 | 1,149,713 | 120,521 | 757,895 | 1,787,087 | 42 |
| 1999 | 951,046 | 122,675 | 689,322 | 1,517,693 | 45 |
| 2000 | 1,159,590 | 162,281 | 640,281 | 1,637,590 | 39 |
| 2001 | 1,080,166 | 146,424 | 721,616 | 1,655,358 | 44 |
| 2002 | 1,170,922 | 135,050 | 795,242 | 1,831,114 | 43 |
| <i>Unit value (Dollars per kilogram)⁴</i> | | | | | |
| 1998 | 0 .78 | 0 .93 | 0 .89 | 0 .81 | (⁵) |
| 1999 | .57 | .81 | .93 | .67 | (⁵) |
| 2000 | .68 | .87 | .88 | .73 | (⁵) |
| 2001 | .67 | .81 | .88 | .73 | (⁵) |
| 2002 | .69 | .90 | .92 | .76 | (⁵) |

¹ Data are for raw product intended for fresh-market use and are converted from pounds to kilograms using a factor of 2.20462 pounds per kilogram.

² Data are for fresh or chilled tomatoes (Schedule B No. 0702.00.0000, 0702.00.0010, 0702.00.0030, and 0702.00.0050) on a fresh-weight basis.

³ Data are for fresh or chilled tomatoes (Harmonized Tariff Schedule (HTS) subheadings 0702.00.20-0702.00.60) on a fresh-weight basis.

⁴ Calculated by the Commission.

⁵ Not meaningful.

Note.—Production data are revised annually and data for the most recent calendar years may not match data presented in earlier reports.

Note.—Production data are estimated from raw product intended for fresh-market sales, whereas export and import data are shipments actually recorded. Thus, apparent consumption may be somewhat smaller and the ratio of imports to consumption somewhat larger than shown.

Source: Production data compiled by the Commission from U.S. Department of Agriculture (USDA), National Agricultural Statistics Service (NASS), *Vegetables*, 2000 Summary: Jan. 2001, Vg 1-2 (01), p. 5; 2001 Summary: Jan. 2002, Vg 1-2 (02), p. 5; and 2002 Summary: Jan. 2003, Vg 1-2 (03), p. 5; exports and imports compiled from official statistics of the U.S. Department of Commerce, except as noted.

Table 2
Processed tomatoes: U.S. production, exports of domestic merchandise, and imports for consumption, 1998-2002

| Year | Production ¹ | Exports ² | Imports ³ |
|--|-------------------------|----------------------|----------------------|
| <i>Quantity (1,000 kilograms)</i> | | | |
| 1998 | 8,529,370 | 150,176 | 86,330 |
| 1999 | 11,644,655 | 127,683 | 41,113 |
| 2000 | 9,850,441 | 135,113 | 36,119 |
| 2001 | 8,390,308 | 141,910 | 43,902 |
| 2002 | 10,574,902 | 148,799 | 49,675 |
| <i>Value (1,000 dollars)</i> | | | |
| 1998 | 613,954 | 107,402 | 62,770 |
| 1999 | 912,988 | 100,649 | 23,418 |
| 2000 | 663,467 | 97,907 | 52,478 |
| 2001 | 547,473 | 100,624 | 54,250 |
| 2002 | 683,083 | 103,316 | 59,194 |
| <i>Unit value (Dollars per kilogram)⁴</i> | | | |
| 1998 | 0.07 | 0.72 | 0.86 |
| 1999 | .08 | .79 | .96 |
| 2000 | .07 | .72 | 1.45 |
| 2001 | .07 | .71 | 1.24 |
| 2002 | .06 | .69 | 1.19 |

¹ Data are for raw product intended for processing and are converted from pounds to kilograms using a factor of 2.20462 pounds per kilogram. U.S. production of processed tomato products on a processed-weight basis has not been reported for a number of years.

² Data are for prepared or preserved tomatoes (Schedule B No. 2002.10.0000, 2002.90.0060, and 2002.90.0080) on a processed-weight basis.

³ Data are for frozen tomatoes (HTS subheadings 0710.80.40-0710.80.50) on a frozen-weight basis; dried tomatoes (HTS subheadings 0712.90.74, 0712.90.75, and 0712.90.78) on a dried-weight basis; and prepared or preserved tomatoes (HTS subheadings 2002.10.00 and 2002.90.00) on a processed-weight basis.

⁴ Calculated by the Commission.

Note.—Production data are revised annually and figures for the most recent calendar years may not match data presented in earlier reports.

Note.—Consumption of processed tomato products is not applicable since production is on a raw-product basis and imports include frozen, dried, and canned products on their respective processed-weight basis.

Note.—Unit values for U.S. tomato production are low, relative to those for exports and imports, because production includes only raw product intended for processing, not finished product. Exports and imports are finished products.

¹ Data are for fresh or chilled tomatoes (HTS subheadings 0702.00.20-0702.00.60) on a fresh-weight basis.

² Calculated by the Commission.

Note.—Because of rounding, figures may not add to the totals shown.

Note.—Unit values for tomatoes from such countries as Canada, Israel, and most EU countries are generally significantly higher than unit values for products from Mexico because they are believed to be primarily greenhouse-grown tomatoes.

¹ Data are for fresh or chilled tomatoes (HTS subheadings 0702.00.2030, 0702.00.2035, 0702.00.4030, 0702.00.6030, and 0702.00.6035) on a fresh-weight basis.

² Calculated by the Commission.

Note.—Because of rounding, figures may not add to the totals shown.

Note.—Unit values for tomatoes from such countries as Canada, Israel, New Zealand, and most EU countries are generally significantly higher than unit values for products from Mexico because they are believed to be primarily greenhouse-grown tomatoes.

Table 37**Estimated production costs for fresh-market tomatoes in double-crop system grown in North Florida, by average cost per acre, 1992/2000 to 2002/03 crop-years¹***(In dollars)*

| Cost item | 1999/2000 | 2001/02 | 2002/03² |
|------------------------------|------------------|----------------|----------------------------|
| Preharvest costs: | | | |
| Operating costs: | | | |
| Seed | 336 | 336 | 344 |
| Fertilizer | 349 | 350 | 340 |
| Fumigant | 602 | 530 | 561 |
| Other pesticides | 991 | 827 | 884 |
| Labor | 334 | 790 | 561 |
| Machinery | 762 | 720 | 681 |
| Interest | 261 | 245 | 244 |
| Miscellaneous | 1,334 | 830 | 1,257 |
| Subtotal | <u>4,969</u> | <u>4,628</u> | <u>4,872</u> |
| Fixed costs: | | | |
| Land rent | 450 | 350 | 383 |
| Machinery | 208 | 208 | 183 |
| Management | 1,073 | 1,008 | 1,122 |
| Overhead | 1,342 | 1,260 | 1,295 |
| Subtotal | <u>3,073</u> | <u>2,826</u> | <u>2,983</u> |
| Total preharvest costs | <u>8,042</u> | <u>7,454</u> | <u>7,855</u> |
| Harvest and marketing costs: | | | |
| Harvest and hauling | 1,078 | 1,078 | 1,129 |
| Packing | 2,590 | 2,590 | 2,713 |
| Containers | 1,050 | 1,050 | 1,100 |
| Selling | 210 | 210 | 220 |
| Organization fees | 70 | 126 | 92 |
| Subtotal | <u>4,998</u> | <u>5,054</u> | <u>5,254</u> |
| Total production costs | <u>13,040</u> | <u>12,508</u> | <u>13,109</u> |

¹ Data for the 2000/01 crop-year were never reported by the industry.² Calculated by the Commission using the simple average of the 3 previous crop-years.

Note.—These cost budgets are constructed based on input prices obtained from various industry sources and are believed to reflect typical costs of production for growers in a given production area, but do not necessarily reflect the actual industry average cost of production.

Note.—Because of rounding, figures may not add to the totals shown.
