

## Philip D. Rack

Joint Faculty  
Dept. of Materials Science and Engineering  
University of Tennessee–Knoxville  
Center for Nanophase Materials Sciences  
Oak Ridge National Laboratory  
(865) 974-5344  
[prack@utk.edu](mailto:prack@utk.edu)

---

### Education

Georgia Institute of Technology, Atlanta	Materials Science & Engineering	B.S., 1993
University of Florida, Gainesville	Materials Science & Engineering	Ph.D., 1997

### Professional Experience

2011–Present	Leonard G. Penland Chair of the College of Engineering
2010–Present	Full Professor, Department of Materials and Engineering, University of Tennessee–Knoxville
2005–2010	Associate Professor, Department of Materials and Engineering, University of Tennessee–Knoxville
2001–2005	Assistant Professor, Department of Materials and Engineering, The University of Tennessee–Knoxville
1998–2001	Assistant Professor, Department of Microelectronic Engineering, Rochester Institute of Technology, Rochester, NY
1998–2001	Advisory Scientist, Advanced Vision Technologies, Inc., West Henrietta, NY
1997–1999	Senior Research and Development Engineer, Advanced Vision Technologies, Inc, West Henrietta, NY

### Professional and Synergistic Activities

2005–Present	Joint Faculty Appointment, Center for Nanophase Materials Science, ORNL
--------------	---

### Honors and Awards

2011 Leonard G. Penland Chair of the College of Engineering  
2011 Chancellor's Award for Research and Creative Achievement  
2011 College of Engineering Allen & Hoshall Engineering Faculty Award  
2009 University of Tennessee College of Engineering Research Fellow Award  
2009 Department of Materials Science and Engineering Faculty Research Award  
2007 University of Tennessee College of Engineering Research Fellow Award  
2006 University of Tennessee College of Engineering Research Fellow Award  
2005 Best Poster Award: Microscopy and Microanalysis National Meeting  
2005 Best Poster Award: National Materials Research Society Spring Meeting  
2003 Ralph E. Powe Junior Faculty Achievement Award  
2003 University of Tennessee College of Engineering Outstanding Young Teacher Award  
2002 Georgia Institute of Technology Council of Outstanding Young Engineering Alumni  
1997 AVS National Graduate Research Award  
1995 MRS National Graduate Student Award  
1997 AVS Graduate Student Poster Award  
1995 AVS Graduate Student Poster Award  
1993 Graduated *Magna Cum Laude* in Materials Science and Engineering, GIT

**Publications** Author of >100 articles in refereed journals including 5 invited reviews and 2 book chapters  
Full publication list follows CV.

### **Research Synopsis**

1. Nanoscale self and directed assembly/organization of metallic nanoparticles for advanced functionality.  
We are studying the dynamics of liquid phase instabilities and transport of metallic thin films and nanostructures as a means to organize nanoparticle ensembles. The program combines unique experimental studies with both continuum and molecular dynamics simulations to understand the relevant nanoscale time and length scales.
2. Combinatorial thin film synthesis  
Using a specially designed thin film sputtering approach, we use combinatorial thin film deposition to synthesize material libraries for rapid materials discovery. We have studied many different material properties including electronic, optical, catalytic, mechanical, and glass forming ability.
3. Nanoscale device synthesis and integration  
Leveraging our extensive experience in nanoscale materials synthesis and nanofabrication, we facilitate new complex device designs for advanced functional materials and devices. More recently we have studied paralleled arrays of vertically aligned nanostructures for intracellular and neuronal probes as well as a new active matrix thin film transistor array coupled with electrofluidic cells for an advanced microfluidic platform.
4. Nanoscale electron/ion/photon beam induced synthesis  
In this program we study critical mechanisms involved in particle (electron/ion/photon)-adsorbate-solid interactions to unravel pathways that lead to beam induced synthesis. We combine advanced synthesis methods and characterization techniques with both continuum and Monte-Carlo simulations with the goal of developing new routes for advanced functional nanoscale materials synthesis.

### **Graduate and Postdoctoral Advisors:**

Graduate Advisor: Dr. Paul H. Holloway (University of Florida)

### **Thesis Advisor and Postgraduate-Scholar Sponsor:**

Lena Zavyalova (MS, Motorola), Yuepeng Deng (PhD, Vitek Corporation) Stephen Randolph (MS, PHD, FEI Inc.), Seung-Ik Jun (PhD, PSM America), Yifei Zhang (PhD, ORNL), Daryl Smith (PhD, DAS Freelance), \*Ryan Rucker (MS, Micron), Jung Won Park (PhD, Dpix), Matthew Lassiter (PhD, Aegis Technologies), Seyeoul Kwon (LG Electronics), Jon Peak (resident post-doc), \*Yueying Wu, \*Jiyong Noh, \*Siwei Tsang, \*Carlos Gonzalez, \*Daniel Schaeffer, \*Shaofang Fu.

Post Doc Advisees (5 total) \*denotes current – Jason D. Fowlkes (ORNL), Yinfeng Guan (Dpix), \*Joo Hyon Noh, \*Nicholas Roberts, \* Daryl Smith

Total Graduate Students Advised: 17

Total Postdoctoral Scholars Advised: 5

## Publications

**Philip D. Rack, Ph. D.**

Center for Nanophase Materials Sciences
