

Location 5 Widen the eastbound Seminary Road approach to Mark Center Drive to allow three through lanes. Widen the northbound Mark Center Drive approach to four lanes to allow one left turn lane, one shared through/right turn lane and two right turn lanes. This improvement will provide triple rights for the northbound Mark Center to eastbound Seminary Road movement.

Location 7 Widen eastbound Seminary Road and the southbound I-395 on ramp one lane from Mark Center Drive to the ramp meter signal to provide a continuous two lane ramp from Seminary Road to the ramp meter. Restripe the southbound ramp connection from the rotary to provide a merge into the two lane ramp from eastbound Seminary Road.
