

# ARKSTORM

## A Scenario of a Massive West Coast Storm

By Dale Cox, Project Manager, USGS Multi-Hazards Demonstration Project

- Scientists are preparing ARkStorm for emergency planning and disaster preparedness
- A series of “Atmospheric River” events slams into the West Coast with hurricane force over several weeks
- Weather models show expected hazards such as floods, landslides, and erosion impacting life and property
- Storms of this magnitude are projected to become more frequent and intense as a result of changing climate conditions
