Packers and Stockyards Statistical Report 2005 Reporting Year

ABSTRACT

The 2005 Packers and Stockyards Statistical Report on livestock marketing and meat packing contains data on industry concentration, plant size, volume of packer feeding, packer financial performance, number of animals purchased by source of supply (public market versus direct purchase), and method of procurement (live versus carcass basis). Most of the data are reported by type of animal, State, or geographic region.

HIGHLIGHTS OF THE STATISTICAL REPORT	3
MERGERS AND ACQUISITIONS IN MEAT PACKING	7

PART I. MEAT PACKING

SECTION 1. Plants Slaughtering Livestock

TABLES

1	Number of slaughter packers and plants by livestock class and market type for selected years 1980–2005	11
2	Number of livestock slaughter plants by inspection type for selected years 1978–2005	14
3	Number of livestock slaughter plants by livestock class for selected years 1978–2005	15
4	Volume of livestock slaughter and number of plants by livestock class for 2005	16

SECTION 2. Purchases by Market Outlet

TABLES

5	Purchases of livestock by market type and livestock class for selected years 1977–2005	17
6	Purchases of livestock by market type, livestock class, and firm size for 2005	20
7	Purchases of slaughter animals by livestock class and State for 2005	21

	Page
8 Purchases of steers and heifers by market type and region for 2005	23
9 Purchases of cows and bulls by market type and region for 2005	24
10 Purchases of cattle by market type and region for 2005	25
11 Purchases of calves by market type and region for 2005	26
12 Purchases of hogs by market type and region for 2005	27
13 Purchases of sheep and lambs by market type and region for 2005	28

SECTION 3. Carcass-Basis Purchases

TABLES

14 Carcass-basis purchases by region and livestock class for 2005	29
15 Carcass-basis purchases by firm size and livestock class for selected years 1980–2005	30

SECTION 4. Packer Feeding and Forward Purchases

TABLES

16 Packer feeding, forward contracts, and marketing agreements as a percentage of steer and heifer slaughter by firm size for selected years 1988–2005	33
17 Packer feeding, forward contracts, and marketing agreements as a percentage of steer and heifer slaughter by firm size, by month for 1999–2005	34

SECTION 5. Size of Livestock Slaughter and Fabrication Plants and Firms

TABLES

	Page
18 Steer and heifer slaughter by plant size for selected years 1976–2005	35
19 Cow and bull slaughter by plant size for selected years 1976–2005	36
20 Cattle slaughter by plant size for selected years 1976–2005	37
21 Calf slaughter by plant size for selected years 1976–2005	38
22 Hog slaughter by plant size for selected years 1976–2005	39
23 Sheep and lamb slaughter by plant size for selected years 1976–2005	40
24 Boxed fed beef production by plant size for selected years 1979–2005	41

SECTION 6. Specialization of Packers

TABLES

25 Number of firms by firm size and number of classes of livestock slaughtered for selected years 1980–2005	42
26 Percentage of firms by firm size and number of classes of livestock slaughtered for selected years 1980–2005	43

SECTION 7. Meatpacking Concentration

TABLES

27 Steer and heifer slaughter concentration by 4, 8, 20, and 50 largest firms for selected years, 1980–2005	44
28 Cow and bull slaughter concentration by 4, 8, 20, and 50 largest firms for selected years 1980–2005	45

	Page
29 Cattle slaughter concentration by 4, 8, 20, and 50 largest firms for selected years 1980–2005	46
30 Calf slaughter concentration by 4, 8, 20, and 50 largest firms for selected years 1980–2005	47
31 Hog slaughter concentration by 4, 8, 20, and 50 largest firms for selected years 1980–2005	48
32 Sheep and lamb slaughter concentration by 4, 8, 20, and 50 largest firms for selected years 1980–2005	49
33 Boxed fed beef production concentration by 4, 8, 20, and 50 largest firms for selected years 1980–2005	50
34 Livestock purchase concentration by 4, 8, 20, and 50 largest firms for selected years 1980–2005	51

SECTION 8. Packer Financial Performance

TABLES

35 Sales, expenses, and operating income of 4, 8, 20, and 40 largest meatpacking firms for 2005	52
36 Selected financial ratios of 4, 8, 20, and 40 largest meatpacking firms for 2005	53
37 Gross income of 4, 8, 20, and 40 largest meatpacking firms for 1992–2005	54
38 Total operating expenses of 4, 8, 20, and 40 largest meatpacking firms for 1992–2005	55
39 Operating income of 4, 8, 20, and 40 largest meatpacking firms for 1992–2005	56

PART II. LIVESTOCK MARKETING

TABLES

	Page
40 Volume and value of marketed slaughter and nonslaughter livestock for firms selling on commission by livestock class, State, and region for 2005	59
41 Value and volume of purchased slaughter and nonslaughter livestock for dealers and firms buying on commission by State and region for 2005	61
42 Volume and value of marketed livestock for firms selling on commission and for dealers and firms buying on commission by livestock class for 1997–2005	63

PART III. ENTITIES REGISTERED WITH THE GRAIN INSPECTION, PACKERS AND STOCKYARDS ADMINISTRATION

TABLES

43 Number of bonded packers, posted stockyards, and entities registered with GIPSA by State and region on September 30, 2005	67
44 Number of bonded packers, posted stockyards, entities registered with GIPSA, and value of bond coverage for 1995–2005	69

PACKERS AND STOCKYARDS STATISTICAL REPORT 2005 REPORTING YEAR

Prepared by:

**Industry Analysis Division Staff
Grain Inspection, Packers and Stockyards Administration
U.S. Department of Agriculture**

INTRODUCTION

Reporting Firms

This report contains data on (1) slaughtering packers; (2) market agencies buying or selling livestock on commission, including auction markets and all other selling agencies; and (3) livestock dealers buying and selling livestock for their own accounts. It includes data for firms' 2005 reporting year. Part III of the report includes data on all entities registered with the Grain Inspection, Packers and Stockyards Administration.

All slaughtering packers operating in commerce in the United States have been subject to the Packers and Stockyards Act since its passage in 1921. Section 201.97 of Chapter 9 of the Code of Federal Regulations requires every packer, live poultry dealer, stockyard owner, market agency, and dealer, unless exempt, to file a report annually with the U.S. Department of Agriculture's (USDA) Grain Inspection, Packers and Stockyards Administration (GIPSA). Prior to reporting year 1977, packers slaughtering less than 1,000 head of cattle or less than 2,000 head of all classes of livestock annually were exempted from the reporting requirements. Beginning with reporting year 1977, packers that operate

in interstate commerce and purchase \$500,000 or more of livestock on an annual basis are required to file an annual report with GIPSA. Since both slaughter volume and the value of purchases vary from year to year, certain small slaughtering packers are required to file an annual report in some years but not in others. Packers beginning operation late in their fiscal years are not required to file annual reports for a partial year. Also, packers that have gone out of business are not required to file annual reports.

A number of firms that primarily slaughter livestock for others (custom slaughterers) are not required to file annual reports with GIPSA and their data are not included in this report. In 2005, 223 firms operating 320 plants reported to GIPSA (see table 1). In comparison, on January 1, 2005, there were 826 federally inspected plants and 2,116 non-federally inspected plants (see table 2). Many of these plants operated solely or primarily as custom slaughterers and were not required to file reports with GIPSA because the firms did not purchase more than \$500,000 worth of livestock annually.

The following table compares the number of plants operated by firms reporting to GIPSA in 2005 with all federally inspected (F.I.) plants slaughtering livestock by type of livestock and number of head. The size of plants of firms reporting to GIPSA is based on livestock procured for slaughter by the firm and does not count livestock the plants custom-slaughter for others. The size of F.I. plants includes all livestock slaughtered regardless of who owned the livestock.

**Number of plants operated by firms reporting to GIPSA
and number of federally inspected (F.I.) plants, 2005**

<u>Type of livestock</u>	<u>GIPSA</u>		<u>Federally inspected</u>	
	<u>Less than 1,000 head</u>	<u>All plants</u>	<u>Less than 1,000 head</u>	<u>All plants</u>
Cattle	44	172	488	657
Calves	28	60	195	227
Hogs	19	162	390	630
Sheep/lambs	24	58	420	496

Packers reporting to GIPSA accounted for the following percentages of U.S. commercial slaughter¹ in 2005:

<u>Type</u>	<u>Percent</u>
Steers and heifers	96
Cows and bulls	97
Cattle	97
Calves	89
Hogs	98
Sheep and lambs	74

Calendar Year/Reporting Year

A majority of meat packers use the calendar year as their fiscal, or operating, year for accounting and reporting purposes. Many packers, however, use fiscal years that end in months other than December. GIPSA includes the data supplied by these packers in

the year in which each packer’s fiscal year ends. Thus, for example, data from a packer whose fiscal year ends May 31, 2005 is included in this statistical report and includes information from June 1, 2004 until May 31, 2005.

Type of Outlet

Prior to 1988, GIPSA reported statistics separately for terminal markets, where several firms sell livestock on commission, and for auctions, where a single firm sells livestock on commission. Beginning in 1988, GIPSA combined livestock volumes sold through terminals and auctions, and reported those sales as “public markets” sales due to few terminal markets and the small numbers of livestock traded at terminal markets.

Consolidated Reports of Firms

Packing firms may elect to file consolidated reports for all of their slaughter operations or may file separate reports for each of their operating units. Since 1980, annual reports filed by separately filing operating units of a firm have been combined by GIPSA when reporting firm-level data, such as concentration ratios.

¹ Commercial slaughter includes slaughter conducted at both federally and State-inspected facilities.

HIGHLIGHTS OF THIS REPORT

Concentration of Meatpacking Firms

This report contains two series of concentration ratios² for steers and heifers, cows and bulls, cattle, hogs, and sheep and lambs. The first is based on procurement data reported to GIPSA by packers, and includes all livestock procured for slaughter by each firm, including livestock custom-slaughtered for reporting packers by other firms and livestock slaughtered in State-inspected plants. The data are reported by firms for their fiscal years. The second concentration series is based on slaughter data collected by USDA's Food Safety and Inspection Service (FSIS) from federally inspected plants. These data are for the calendar year. FSIS reports the number of animals slaughtered at each plant regardless of who owns the animals. GIPSA adjusts these data to reflect ownership of the animals at the time of slaughter based on information provided by reporting packers. Both series use total commercial slaughter for the calendar year as the denominator for calculating concentration ratios. Unless otherwise indicated, the discussion that follows is based on concentration ratios calculated using the adjusted FSIS data.

The four-firm concentration ratio for steer and heifer slaughter has been relatively stable since the mid-1990s. The ratio based on FSIS slaughter data remained at 80 percent in 2005. The four-firm concentration ratio based on annual reports filed with GIPSA fell 2 percentage points in 2005 to 79 percent. Steer and heifer slaughter has the highest four-firm concentration ratio in the red meatpacking industry. A broader measure of concentra-

² A concentration ratio is defined as the percentage of total activity (e.g., slaughter, livestock purchases) accounted for by the largest firms, usually the four largest firms.

tion, the Herfindahl–Hirschman Index³ (HHI), increased slightly from 1,791 in 2004 to 1,818 in 2005, but remained below its high value, set in the early 1990s (see table 27).

Four-firm concentration in cow and bull slaughter increased from 43 percent in 2004 to 48 percent in 2005 (see table 28). The HHI rose from 632 in 2004 to 785 in 2005.

Four-firm concentration in cattle slaughter increased from 69 percent in 2004 to 71 percent in 2005 (see table 29). The HHI increased from 1,366 in 2004 to 1,447 in 2005.

Four-firm concentration in hog slaughter remained relatively stable around 56 percent from the mid-1990s until 2003. The ratio increased to 64 percent in 2003 (see table 31). The ratio remained at 64 percent in 2005. The HHI rose slightly from 1,320 in 2004 to 1,340 in 2005.

Four-firm concentration in sheep and lamb slaughter has ranged between 65 percent and 73 percent from 1992 until present. In 2005, the ratio was 70 percent (see table 32). Based on the information reported to GIPSA, which removes custom slaughter from firm totals, four-firm slaughter in 2005 was lower at 56 percent. The HHI fell to 1,019 in 2005.

Overall concentration in the red meatpacking industry was relatively stable, between 61 and 63 percent, from 1993 to 1998, and

³ The HHI is defined as the sum over all firms of each firm's squared percentage of market share. The Department of Justice and the Federal Trade Commission consider markets to be unconcentrated when the value of the HHI is below 1,000, moderately concentrated when HHI is between 1,000 and 1,800, and highly concentrated when HHI is above 1,800. (U.S. Department of Justice and the Federal Trade Commission, Horizontal Merger Guidelines, issued April 2, 1992, revised April 8, 1997).

then increased to 66 percent in 2000 and reached an all-time high value of 69 percent in 2003 (see table 34). The ratio fell to 67 percent in 2004 and remained there in 2005. The HHI was 1,276 in 2005.

Number and Size of Plants

The total number of packing plants operated by firms reporting to GIPSA rose in 2004 for the first time in several years, from 308 in 2003 to 322 in 2004, about the same number as 2002 and remained almost steady at 320 in 2005 (see table 1).

While the overall number of packing plants operated by reporting packers has fallen over the years, the number of slaughter plants in the largest size categories has remained relatively steady (see tables 18 through 24).

Specialization of Packers

The total number of reporting meatpacking firms dropped from 810 in 1980 to 224 in 2003, but rose to 234 in 2004, returning to 223 in 2005. Table 25 shows that most of the decline occurred among firms that slaughter two or more types of livestock. Since the mid-1990s, the majority of packers purchasing more than \$5 million worth of slaughter livestock has specialized in only one type of livestock. Table 26 shows the trend in percentage terms. The proportion of packers slaughtering only one type of livestock has risen steadily from about 18 percent in 1980 to 53 percent in 2002. Since then it has remained steady.

Use of Public and Nonpublic Marketing Channels

Packer purchases at public markets include purchases at auction and terminal markets at public stockyards, and video auctions. Purchases through nonpublic marketing channels include direct purchases by packers at their plants, packer-owned buying stations, feedyards, and from dealers.

The proportion of most types of livestock bought by packers in public markets rose for all livestock types except hogs in 2005 (see table 5). These are the first increases in any of these markets since 2002. Hog packers' use of public markets declined slightly in 2005, to about 1 percent of their total hog purchases.

The proportion of slaughter cattle purchased in public markets has been relatively stable at 13 percent to 14 percent since the mid-1990s. In 2005, more than 70 percent of cattle purchased at public markets were cows and bulls. Packers purchased about 57 percent of their slaughter cows and bulls through public marketing channels, but only about 4 percent of slaughter steers and heifers were purchased through public markets (see tables 8 and 9).

Packers used public markets much more frequently to purchase steers and heifers in the South Atlantic and South Central regions, where far fewer fed cattle are traded (see table 8). Packers used public markets to purchase the majority of their slaughter cows and bulls in every region except the Southern Plains and East North Central regions (see table 9).

Hog slaughterers showed much less regional variation in their use of public markets (see table 12). In 2005, packers in most regions purchased less than 2 percent of their hogs in public markets. Packers in the North Atlantic region procured about 11 percent of

their hogs through public markets. In the Mountain region, where very few hogs are traded virtually all (97 percent) of hogs were sold through public markets.

Smaller packers continued to rely more on public markets for their slaughter needs than larger packers (see table 6). The 20 largest packers, based on total amount spent for all livestock slaughtered, procured the smallest proportion of their cattle and hog slaughter needs in public markets compared with other packers. In 2005, the 20 largest packers procured 10 percent of their cattle and less than one half of 1 percent of their hogs through public markets. In contrast, packers smaller than the top 20 procured 43 percent of their slaughter cattle and 6 percent of their hogs through public markets.

Carcass-Basis Procurement

The proportion of slaughter livestock purchased on a carcass basis (such as grade, weight, yield, guaranteed yield, or percentage lean) in 2005 ranged from 36 percent for calves to 79 percent for hogs (see table 14). The percentage of cattle purchased on a carcass basis rose compared to 2005, but was still below 2002's all-time high of 63 percent, reaching 56 percent in 2005 (see table 15). About 36 percent of all slaughter calves bought in 2005 were procured on a carcass basis, a decrease of 14 percentage points, bringing it more in line with recent proportions. The proportion of hogs purchased on a carcass basis was 79 percent in 2005, a new high, and was the highest among all types of slaughter livestock. The percentage of sheep and lambs purchased on a carcass basis fell from 70 percent in 2001 to 46 percent in 2004, but increased to 52 percent in 2005.

The 20 largest packers purchased a larger percentage of cattle and hogs on a carcass basis than did other packers (see table 15). In

2005 the 20 largest packers purchased 86 percent of their hogs and 58 percent of their cattle on a carcass basis, compared to other packers who purchased 33 percent of their hogs and 36 percent of their cattle on a carcass basis.

Packer Feeding, Forward Contracts, and Marketing Agreements

GIPSA defines committed procurement⁴ as livestock that are owned or fed by a packer more than 14 days prior to slaughter, livestock that are procured by a packer through a forward contract or marketing agreement that has been in place for more than 14 days, or livestock that are otherwise committed to a packer more than 14 days prior to slaughter. This definition includes animals procured through forward contracts, marketing agreements, and packer feeding arrangements.

Overall, in 2005, the use of all forms of committed procurement by the top four steer and heifer packers rose slightly to 35 percent of their total steer and heifer procurement after falling for the two previous years.⁵ The top four steer and heifer packers' use of marketing agreements rose from 21 percent in 1999 to about 32 percent of their total steer and heifer procurement in 2002, but then declined and was 24 percent in 2005 (see table 16). The top four steer and heifer packers' use of forward contracts rose to 5 percent in 2005. Packer feeding of steers and heifers by the top

⁴ Committed procurement was previously referred to as captive supply.

⁵ GIPSA has audited the top four firms' committed procurement filings for steers and heifers from 1999 to 2005. Table 16 contains statistics calculated from audited data for the top four firms from 1999 to 2005 along with statistics from unaudited data reported by the top 15 packers for 1988–98. Table 17 shows monthly variation in use of committed procurement by the four leading steer and heifer packers.

four firms continued to fall in 2005, from about 10 percent in 2003, to 6 percent.

Packer Financial Performance

Tables 35 through 39 present financial ratios for several groupings of the 40 largest meatpacking firms. Firms are ranked by total amount spent for all livestock slaughtered. All firms included in these tables slaughter livestock. Some of the firms also further process carcasses, and some have large non-red meat operations. A few firms file consolidated financial statements in which their meatpacking and processing operations are combined with their other operations. Thus, the financial statistics calculated from packers' reports may include the financial performance of non-meat operations of some firms.

Profitability (measured by operating income as a percentage of sales) of the 40 largest meat packers has fluctuated widely since 1992 (see table 39). In 1992 and 1993, profitability of the top 40 firms was 1.2 percent of sales. Profitability rose to 2.9 percent of sales in 1994 and 3.7 percent in 1995. Profitability has ranged between 1.5 percent and 2.8 percent since then. Profitability of the top 40 firms was 1.7 percent in 2005.

Throughout the 1992–2000 period, the 20 largest packers reported higher operating income as a percentage of sales than packers ranked 21 through 40. Since then, there has been no clear trend. Firms ranked 21 through 40 exhibited much greater variability in profitability; for example, they were the most profitable group in 2002, with average operating income of 5.6 percent of sales, while they were the least profitable in 2003, with average operating income of 0.4 percent of sales. During the same period, firms ranked 9 through 20 reported larger operating profit margins than the top 4 or top 8 packers.

The top four firms generally reported operating on smaller gross margins (calculated as gross income divided by sales) than smaller firms (see tables 35 and 37). Between 1993 and 2005, the top four firms reported gross margins that were 10 to 20 percentage points below firms ranked 5 through 8 (see table 37), with the exception of 2002 and 2003. In 2002, gross margins for all groups ranged between 21 percent and 25 percent. In 2003, firms in all groups except those ranked 9 through 20 reported gross margins between 22 percent and 26 percent. In 2004 and 2005, middle-sized firms (those ranked 5 through 20) reported higher gross margins than larger or smaller firms.

The top four packers' operating expenses as a percentage of sales were also lower than other firms in 2005, with the exception of firms ranked smaller than 20 (see tables 35 and 38). The top four firms reported higher net sales per dollar of assets than any other groups in 2005 (see table 36).

Auction and Terminal Market Sales

Firms selling on commission market feeder livestock as well as livestock sold for slaughter. The number of cattle and calves marketed through firms selling on commission was 37 million in 2005, down marginally from 2004. The number has fluctuated between 37 million and 42 million since 1996 (see table 42). The volume of hogs marketed through firms selling on commission rose to 7.6 million head in 2005, the third consecutive annual increase. The number of sheep and lambs marketed through firms selling on commission fell to 3.1 million head in 2005, the lowest number in recent times.

Livestock Purchases by Dealers and Firms Buying on Commission

Purchases by dealers⁶ and firms buying on commission include both feeder livestock and livestock destined for slaughter. Purchases of cattle and calves by dealers and firms buying on commission remained almost unchanged at 32.3 million head in 2005 (see table 42). Purchases of hogs by dealers and order buyers rose in 2005 to 20.6 million head, the largest total since 1999. The number of sheep and lambs purchased by dealers and order buyers in 2005 fell to 2.2 million head, the smallest total in recent years.

MERGERS AND ACQUISITIONS IN MEAT PACKING

Numerous mergers and acquisitions have occurred in meat packing during the past several years, but the rate slowed in 2004. The following list includes all mergers and acquisitions in 2005 and 2006 involving at least one firm that is required to file an annual report with GIPSA.

Meat Packer Mergers and Acquisitions, 2004 and 2005
(Listed by alphabetical order of acquiring company)

2005

Acquiring Company: American Foods Group, Inc.;
Alexandria, MN.
Company Acquired: Rosen Meat Group; Fairmont, MN.

2005, continued

Acquiring Company: Cargill Meat Solutions; Wichita, KS.
Company Acquired: Beef Packers, Inc.; Fresno, CA.
(completed April 3, 2006)

Acquiring Company: Seaboard Farms; Shawnee Mission, KS.
Company Acquired: Daily's; Missoula, MT.

Acquiring Company: Strauss Veal & Lamb; Franklin, WI.
Company Acquired: Swissland Packing Co.; Ashkum, IL.

Acquiring Company: Sun Capital Partners; Boca Raton, FL.
Company Acquired: Creekstone Farms Premium Beef;
Arkansas City, KS.

2006

Acquiring Company: National Beef Packing Co.; Kansas City,
Mo.
Company Acquired: Vintage Foods L.P.; Los Angeles, CA.

Acquiring Company: National Beef Packing Co.; Kansas City,
Mo.
Company Acquired: Brawley Beef LLC.; Brawley, CA.

Acquiring Company: XL Foods, Inc.; Alberta, Canada.
Company Acquired: The non-fed cattle business of Swift &
Co.; Greeley, CO.

⁶ Dealers buy and sell for their own account.

PART I. MEAT PACKING

Table 1.—Number of slaughter packers and plants¹ by livestock class and market type for selected years 1980–2005

¹ Includes plants custom slaughtering for reporting slaughtering packers.

² Does not include custom-slaughter plants that are used by reporting packers.

³ Includes purchases of livestock from all sources except terminal and auction markets.

⁴ Includes purchases from terminal and auction markets. Terminal markets use more than one market agency to sell livestock on commission; auctions markets use only one. A market agency is defined as any person engaged in the business of (a) buying or selling in commerce livestock on a commission basis or (b) furnishing stockyard services.

⁵ Cattle includes steers, heifers, cows, and bulls.

(GIPSA-SR-07-1)

Total	135,076	137,623	139,402	98.1	96.9	320	826	2,116

NA denotes data not available.

¹ Number of plants reporting to GIPSA for the 2005 reporting year, and number of federally inspected and non-federally inspected plants on January 1, 2005.

² Based on fiscal year totals of firms purchasing more than \$500,000 of livestock. Firms going out of business during reporting year and firms operating only a few months during reporting year often do not purchase more than \$500,000 of livestock and are not required to report.

³ Commercial slaughter of steers, heifers, cows, and bulls was estimated by assuming the same proportion of total cattle as for federally inspected slaughter.

⁴ Cattle includes steers, heifers, cows, and bulls.

Source: U.S. Department of Agriculture, Livestock Slaughter, 2005 Summary, National Agricultural Statistics Service, MTAN1-2-1; and annual reports filed with GIPSA for reporting year 2005 by packers purchasing more than \$500,000 of livestock annually.

¹ Includes steers, heifers, cows, and bulls.

² Includes terminal and auction markets. Terminal markets use more than one market agency to sell livestock on commission; auctions use only one. A market agency is defined as any person engaged in the business of (a) buying or selling in commerce livestock on a commission basis or (b) furnishing stockyard services.

³ Includes purchases of livestock from all sources except from terminal and auction markets.

⁴ Numbers may not sum to total due to rounding.

(GIPSA-SR-07-1)

(D) Entry was withheld to avoid disclosing data of individual companies.

¹ Carcass-basis purchases refer to livestock purchased on the basis of carcass grade, weight, yield, guaranteed yield, lean percent, or combinations thereof.

² Includes steers, heifers, cows, and bulls.

³ Based on total amount spent for all types of livestock slaughtered. Not all packers in each grouping slaughtered all types of livestock; some processed only a single type of livestock, and others only two or three (see tables 25 and 26).

(GIPSA-SR-07-1)

(C) Prior to 1986, the category was combined with plants slaughtering 500,000 head or more.

(D) Entry was withheld to avoid disclosing data of individual companies. Data are included in the next smaller class.

¹ Includes plants slaughtering 10,000 to 99,999 head.

(GIPSA-SR-07-1)

NA denotes data not available. Mil. denotes millions.

¹ Conc. equals concentration, which is the percentage of total commercial slaughter accounted for by the firms included in the stated size group.

² Share equals percentage of total commercial slaughter.

³ HHI (Herfindahl-Hirschman Index) equals the sum of each firm's squared percentage share of total commercial slaughter.

⁴ Comm. sltr. equals total commercial slaughter of fed and non-fed steers and heifers during the calendar year.

⁵ Numerator values are number of head procured for slaughter during each firm's reporting (fiscal) year.

⁶ Numerator values are number of head slaughtered in calendar year. Number of plants may differ from data reported to GIPSA due to timing of plant openings and closings.

NA denotes data not available. Mil. denotes millions.

¹ Conc. equals concentration, which is the percentage of total commercial slaughter accounted for by the firms included in the stated size group.

² Share equals percentage of total commercial slaughter.

³ HHI (Herfindahl-Hirschman Index) equals the sum of each firm's squared percentage share of total commercial slaughter.

⁴ Comm. sltr. equals total commercial slaughter of sheep and lambs during the calendar year.

⁵ Numerator values are number of head procured for slaughter during each firm's reporting (fiscal) year.

⁶ Numerator values are number of head slaughtered in calendar year. Number of plants may differ from data reported to GIPSA due to timing of plant openings and closings.

Source: Packer annual reports filed with GIPSA; Livestock Slaughter, Annual Summary, National Agricultural Statistics Service, USDA, MTAN 1-2-1, various issues; and federally inspected slaughter data from National Agricultural Statistics Service.

NA denotes data not applicable because there were fewer than 50 firms. Mil. denotes millions.

¹ May include processing plants that do not slaughter.

² Conc. equals concentration, which is the percentage of total boxed beef production accounted for by the firms included in the stated size group. Numerator values are GIPSA data for firms' reporting years.

³ Share equals percentage of total U.S. boxed beef production. Numerator values are for firms' reporting years.

⁴ HHI (Herfindahl-Hirschman Index) equals the sum of each firm's squared percentage share of total U.S. boxed beef production.

⁵ Until 2005, includes all U.S. production during the calendar year by slaughtering and nonslaughtering fabricators, but not retail stores. Beginning in 2005, includes only production by packers reporting to GIPSA.

¹ Based on total amount spent for all livestock slaughtered.

² May include processing plants that do not slaughter.

³ Purc. equals livestock purchases.

⁴ Conc. equals concentration, which is the percentage of total commercial slaughter livestock value accounted for by the firms included in the stated size group.

⁵ Share equals percentage of total U.S. livestock purchases. Numerator values are for firms' reporting years.

⁶ HHI (Herfindahl-Hirschman Index) equals the sum of each firm's squared percentage share of total livestock purchases.

⁷ Total value of all livestock purchased for slaughter by reporting packers during their reporting years, plus the value of livestock slaughtered by nonreporting packers during the calendar year, based on reported average prices and weights.

Source: Livestock Slaughter, Annual Summary, National Agricultural Statistics Service, USDA, MTAN 1-2-1, various issues; U.S. Department of Agriculture, Agricultural Prices, National Agricultural Statistics Service, various issues; and packer annual reports filed with GIPSA. (GIPSA-SR-07-1)

Canada & Puerto Rico	2	0	0	1	9	0	11

¹ Packers, dealers, market agencies, and packer buyers are required to be bonded based on the value of their livestock purchases. The number of bonded packers includes some subsidiaries or other separate operating units of packers and packers buying less than \$500 thousand of livestock, so the number of bonded packers in this table is larger than the number of firms reported elsewhere in this report.

² Includes terminal and auction markets located at stockyards. Excludes video and electronic auctions that are not operated at stockyards.

³ SOC are market agencies selling on commission; BOC are market agencies buying on commission. A market agency is any person engaged in the business of (1) buying or selling livestock in commerce on a commission basis or (2) furnishing stockyard services.

⁴ Includes firms that provide clearing services, which provide bond coverage for dealers and market agencies buying on commission.

⁵ Individual buyers employed by bonded packers; they are required to be registered with GIPSA.

(GIPSA-SR-07-1)

Table 44.—Number of bonded packers, posted stockyards, entities registered with GIPSA, and value of bond coverage for 1996–2006

Item	September 30 –

¹ Beginning in 1998, includes registrants operating in Canada.

² SOC are market agencies selling on commission; BOC are market agencies buying on commission. A market agency is defined as any person engaged in the business of (1) buying or selling in commerce livestock on a commission basis or (2) furnishing stockyard services.

³ Includes firms that provide clearing services, which provide bond coverage for some dealers and market agencies buying on commission.

⁴ Individual buyers employed by bonded packers; they are required to be registered with GIPSA.

⁵ Packers, dealers, market agencies, and packer buyers are required to be bonded based on the volume of their livestock purchases. The number of bonded packers includes some subsidiaries or other separate operating units of packers and packers buying less than \$500 thousand of livestock, so the number of bonded packers in this table is larger than the number of firms reported elsewhere in this report.

⁶ Includes terminal and auction markets located at stockyards. Excludes video/electronic auctions that are not operated at a stockyard.

⁷ Cover selling-on-commission transactions.

⁸ Cover buying-on-commission and dealer transactions.

⁹ Cover buying-on-commission and dealer transactions and clearing-services (bond coverage for another's livestock purchases).

¹⁰ Cover packer livestock purchase transactions.

STATISTICAL REPORT COMMENT FORM

We welcome your comments about *The Packers and Stockyards Statistical Report* and suggestions on how this report might be improved in the future.

1. Rate the usefulness of each item in the report on the following scale:

	1	2	3	4	5
	Not Useful	Somewhat Useful	Average	Useful	Excellent
Introduction.....	1	2	3	4	5
Highlights of the Statistical Report.....	1	2	3	4	5
Mergers and Acquisitions in meat packing.....	1	2	3	4	5
Tables.....	1	2	3	4	5

2. State the table number of the three tables from the report that were most pertinent to you. Then rate each table's usefulness using the scale shown above.

Table Number: _____ 1 2 3 4 5

Table Number: _____ 1 2 3 4 5

Table Number: _____ 1 2 3 4 5

3. Do the introductory text and table descriptions provide sufficient explanation(s)?

Yes No If no, suggest how the text can be made clearer.

4. Could this report be improved at all by including other data in the report or in another way?

If you wish to comment, complete the form and return it (original or photocopy) to:

USDA, Grain Inspection Packers and Stockyards Administration
 Packers and Stockyards Programs, ESS
 1400 Independence Ave. SW, Stop 3647
 Washington, D.C. 20250-3647

or fax it to us at (202) 690-1266 or email us at pspess.gipsa@usda.gov. If you wish to submit your response via e-mail, your may include your comments in the body of your email message.

According to the Paperwork reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information is 0580-0015. The time required to complete this collection is estimated to average 5 minutes per response, including the time to review instructions, search existing data resources, gather the data needed, and complete and review the information collection.

**INSTRUCTIONS FOR COMPLETING
STATISTICAL REPORT COMMENT FORM P&SP-6010**

You may use any of the following methods to submit the form:

- 1) Mail the document to the following address:
 USDA, Grain Inspection Packers and Stockyards Administration
 Packers and Stockyards Programs
 STOP 3647
 1400 Independence Ave. SW
 Washington, DC 20250-3647
- 2) E-mail the form to: pspess.gipsa@usda.gov with the subject line as “Stat Report Comment” and include your comments in the body of your email message, or
- 3) Fax the form to: (202) 690-1266.

Line No.	Subject	Instructions
1	Rate the Usefulness of Parts of the Report	Circle a rating to indicate the relative usefulness of the four components of the statistical report. (Rate on a scale where 1 is not useful and 5 is highly useful.)
2	Rate Tables	Enter the numbers of the 3 tables that are most relevant to your work. Then, circle a rating to indicate the relative usefulness of those three reports. (Rate on a scale where 1 is not useful and 5 is highly useful.)
3	Introductory Text and Explanations	Check the appropriate box to indicate whether the introductory text and table descriptions were sufficient in their explanations. If no, please enter suggestions to make the text clearer.
4	Improvements and Other Data	Enter any other comments and suggestions for (1) how to improve the report and (2) additional information that you feel should be included in future reports.

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, age, disability, and where applicable, sex, marital status, familial status, parental status, religion, sexual orientation, genetic information, political beliefs, reprisal, or because all or a part of an individual's income is derived from any public assistance program. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD). To file a complaint of discrimination write to USDA, Director, Office of Civil Rights, 1400 Independence Avenue, S.W., Washington, D.C. 20250-9410 or call (800) 795-3272 (voice) or (202) 720-6382 (TDD).
