

FACTS II

Edit 13: Closing Validation

FACTS II has been running for eight years now. It has been quite a success. Most of the amounts in the Prior-year column of the Program & Financing Schedule in the Presidents Budget come directly from FACTS II. Discrepancies between the SF 133, the P & F Schedule, and the FMS 2108 are just about gone. Quarterly and year-end processing has been accelerated.

One major weakness in FACTS II is that all edits run within a particular fiscal year cycle. Until now, there have been no checks between the ending balances for one fiscal year and the beginning balances for the next fiscal year. With Edit 13 and the adjustment attribute, that will be changing.

Edit 13- How it works: FACTS II will effectively perform closing entries, according to USSGL rules. It will calculate what the beginning trial balance should be for all TAFS that should have one. It will then compare the beginning balances submitted by the agency to the calculated amounts, and generate an error report for all that don't match. This will be an information only report through FY 2008. It will become a fatal edit, probably in 1st Quarter 2009, but not before. This will not only improve the quality of FACTS II data, but prepare us for the integration of FACTS I and FACTS II in FIRST.

Reference the table below for information on specific SGL Accounts.
