Preface to the 25th Edition

January 1, 2013

Introduction to the Harmonized Tariff Schedule

The Harmonized Tariff Schedule of the United States, Annotated for Statistical Reporting Purposes (HTS), is published by the U.S. International Trade Commission pursuant to section 1207 of the Omnibus Trade and Competitiveness Act of 1988 (Public Law 100-418; 19 U.S.C. 3007) (Trade Act).¹ The publication contains the legal text of the Harmonized Tariff Schedule, as amended and modified, together with statistical annotations established pursuant to section 484(f) of the Tariff Act of 1930, as amended (19 U.S.C. 1484(f)). Legal instruments and administrative actions affecting the 2013 edition of the HTS are set forth below in the “Changes in the current edition” section. Information about statistical annotations can be found in the final section of the preface.

The legal text of the HTS includes all provisions enacted by Congress or proclaimed by the President. These legal provisions are the General Rules of Interpretation (GRIs); Additional U.S. Rules of Interpretation; General Notes; chapters 1 through 99 (organized into sections I through XXII), section and chapter notes (including additional U.S. notes), headings and subheadings through the 8-digit level (with their numbers, article descriptions, tariff rates, and special tariff programs), Chemical Appendix, Pharmaceutical Appendix, and Intermediate Chemicals for Dyes Appendix. The classification of goods and interpretation of the HTS are the responsibility of U.S. Customs and Border Protection (Customs).

The GRIs, 4- and 6-digit nomenclature categories, and associated notes (not including additional U.S. notes) in chapters 1 through 97 reflect the international nomenclature of the Harmonized Commodity Description and Coding System, pursuant to the Harmonized System Convention, which is administered by the World Customs Organization (WCO). Under the convention, which became effective for the United States as of January 1, 1989, changes to the international nomenclature and certain classification decisions taken by the WCO are reflected in changes to the HTS.

The international nomenclature categories may be subdivided at the 8-digit U.S. rate line level to provide for rates of duty or to make classification distinctions of U.S. interest. Rates of duty in the HTS are established by U.S. legal action. Under the Trade Act, changes in the international nomenclature structure are periodically reflected in the HTS by proclamation, the most recent of which became effective on February 3, 2012 (Presidential Proclamation 8771 of December 29, 2011), following a USITC investigation under section 1205 of the Trade Act; the proclamation annexes were contained in USITC publication No. 4276.

¹ Section 1207(a) of the Trade Act provides that “[t]he Commission shall compile and publish, at appropriate intervals, and keep up to date the Harmonized Tariff Schedule and related information in the form of printed copy....” Section 1207(b) of the Trade Act provides that the published copy of the HTS “shall contain— (1) the then current Harmonized Tariff Schedule; (2) statistical annotations and related statistical information formulated under section 484(f) of the Tariff Act of 1930 (19 U.S.C. 1484(f)); and (3) such other matters as the Commission considers to be necessary or appropriate to carry out the purposes enumerated in the Preamble to the [Harmonized System] Convention.” Persons attempting to classify goods or to ascertain rates of duty should consult the HTS rather than the USITC’s online trade DataWeb or interactive tariff database on the USITC’s web site. The latter do not contain legal rules, notes, or complete product descriptions, and it may be difficult to determine if provisions of chapter 98 or 99 apply to particular shipments.

The HTS also contains nonlegal statistical elements, namely, the annotations, notes, suffixes, units of quantity and other matters formulated under section 484(f) of the Tariff Act of 1930. The table of contents, footnotes, Schedule C, Schedule D, alphabetical index, and change record are inserted for ease of reference only. The presence or absence of a footnote or the language contained in footnotes has no effect on the legal text or its interpretation, and users are encouraged to consult the preface, the change record, and chapters 98 and 99 to locate any provisions that may apply to specific goods. Procedures for requesting changes in statistical provisions of the HTS are set forth below.

Note that this edition of the HTS does *not* contain updated rules of origin for all U.S. free trade agreements; such updates must be proclaimed by the President. The rules of origin for the North American Free Trade Agreement, the U.S.-Australia Free Trade Agreement, the U.S.-Chile Free Trade Agreement, the U.S.-Singapore Free Trade Agreement, and the U.S.-Bahrain Free Trade Agreement have been updated to reflect amendments made by the WCO to the international Harmonized System in 2007 and proclaimed by the President in Proclamation 8097, effective February 3, 2007; no similar updates have been proclaimed for any other free trade agreements. No rules of origin for any existing free trade agreement have been updated to reflect the amendments made by the WCO to the international Harmonized System, effective January 1, 2012, and proclaimed by the President in Proclamation 8771, effective February 3, 2012.

Online electronic revisions to the printed HTS are posted to the Commission's web site (www.usitc.gov) periodically as legal or statistical actions are made effective, along with links to online documents published by other entities that may make changes to the HTS after the last revision posted by the Commission. Large-scale revisions affecting many chapters may also be issued as printed supplements; in some years, there are no supplements.

The entire HTS is posted for each revision, even if changes are not made in all chapters. The change record for each revision should be read in conjunction with the preface's list of legal or statistical bases for the changes in the revision. While each change record in a printed publication contains all changes since the previous printed document, the change record for each revision relates only to that revision.

Statistical reporting under the HTS

The statistical annotations contained in the HTS specify the statistical information that must be supplied on customs entry and withdrawal forms or in electronic filings with respect to articles imported into the customs territory of the United States. Thus, the HTS is designed to enable importers, customs brokers, Customs officers, and other interested persons to determine (1) how to classify an imported article, (2) what rates of duty apply under that classification, and (3) what statistical data must be reported for the article. Except as specified in the Notice to Exporters, HTS codes may be used in place of the reporting codes of Schedule B for reporting exports on the shipper's export declaration or under the program for electronic reporting of exports. The regulations and procedures of Customs and of the Bureau of the Census should also be consulted to ensure that statistical reporting is correct and that all their requirements are met.

Interested parties or their representatives may request changes to the statistical annotations of the HTS or Schedule B for exports. Such requests may be made under Section 484(f) of the Tariff Act of 1930² and directed to the Committee for Statistical Annotation of Tariff Schedules. Requests should be submitted no later than April 1 for changes to be effective July 1 the following year, and no later than August 1 for changes to be effective January 1 the following year. Parties should specify if the proposed change relates only to the HTS or Schedule B, or to both. These requests should be submitted to the Committee Chairman at the address below, or by electronic mail to 484f@usitc.gov.

Such requests should indicate precisely the nature of each desired change. They should provide the exact proposed language to be inserted or deleted (including any relevant units of quantity) and give detailed reasons for the requests. Confidential business information should not be submitted to the Committee. For requests relating to the HTS, the requestor should provide the names of importers and foreign manufacturers (when known) that are associated with the articles in question and should indicate the countries from which the articles are being imported. A proposed statistical category under which three (3) or fewer importers or exporters would likely report shipments generally will not be approved, in order to avoid the disclosure of confidential business information. Questions regarding the drafting or treatment of such requests should be

² Sec. 484(f) reads as follows:

“(f) Statistical Enumeration.— The Secretary, the Secretary of Commerce, and the United States International Trade Commission shall establish from time to time for statistical purposes an enumeration of articles in such detail as in their judgment may be necessary, comprehending all merchandise imported into the United States and exported from the United States, and shall seek, in conjunction with statistical programs for domestic production and programs for achieving international harmonization of trade statistics, to establish the comparability thereof with such enumeration of articles. All import entries and export declarations shall include or have attached thereto an accurate statement specifying, in terms of such detailed enumeration, the kinds and quantities of all merchandise imported and exported and the value of the total quantity of each kind of article.”

GENERAL RULES OF INTERPRETATION

Classification of goods in the tariff schedule shall be governed by the following principles:

1. The table of contents, alphabetical index, and titles of sections, chapters and sub-chapters are provided for ease of reference only; for legal purposes, classification shall be determined according to the terms of the headings and any relative section or chapter notes and, provided such headings or notes do not otherwise require, according to the following provisions:
2. (a) Any reference in a heading to an article shall be taken to include a reference to that article incomplete or unfinished, provided that, as entered, the incomplete or unfinished article has the essential character of the complete or finished article. It shall also include a reference to that article complete or finished (or falling to be classified as complete or finished by virtue of this rule), entered unassembled or disassembled.
(b) Any reference in a heading to a material or substance shall be taken to include a reference to mixtures or combinations of that material or substance with other materials or substances. Any reference to goods of a given material or substance shall be taken to include a reference to goods consisting wholly or partly of such material or substance. The classification of goods consisting of more than one material or substance shall be according to the principles of rule 3.
3. When, by application of rule 2(b) or for any other reason, goods are, *prima facie*, classifiable under two or more headings, classification shall be effected as follows:
(a) The heading which provides the most specific description shall be preferred to headings providing a more general description. However, when two or more headings each refer to part only of the materials or substances contained in mixed or composite goods or to part only of the items in a set put up for retail sale, those headings are to be regarded as equally specific in relation to those goods, even if one of them gives a more complete or precise description of the goods.
(b) Mixtures, composite goods consisting of different materials or made up of different components, and goods put up in sets for retail sale, which cannot be classified by reference to 3(a), shall be classified as if they consisted of the material or component which gives them their essential character, insofar as this criterion is applicable.
(c) When goods cannot be classified by reference to 3(a) or 3(b), they shall be classified under the heading which occurs last in numerical order among those which equally merit consideration.
4. Goods which cannot be classified in accordance with the above rules shall be classified under the heading appropriate to the goods to which they are most akin.
5. In addition to the foregoing provisions, the following rules shall apply in respect of the goods referred to therein:
(a) Camera cases, musical instrument cases, gun cases, drawing instrument cases, necklace cases and similar containers, specially shaped or fitted to contain a specific article or set of articles, suitable for long-term use and entered with the articles for which they are intended, shall be classified with such articles when of a kind normally sold therewith. This rule does not, however, apply to containers which give the whole its essential character;
(b) Subject to the provisions of rule 5(a) above, packing materials and packing containers entered with the goods therein shall be classified with the goods if they are of a kind normally used for packing such goods. However, this provision is not binding when such packing materials or packing containers are clearly suitable for repetitive use.
6. For legal purposes, the classification of goods in the subheadings of a heading shall be determined according to the terms of those subheadings and any related subheading notes and, *mutatis mutandis*, to the above rules, on the understanding that only subheadings at the same level are comparable. For the purposes of this rule, the relative section, chapter and subchapter notes also apply, unless the context otherwise requires.

ADDITIONAL U.S. RULES OF INTERPRETATION

1. In the absence of special language or context which otherwise requires--
 - (a) a tariff classification controlled by use (other than actual use) is to be determined in accordance with the use in the United States at, or immediately prior to, the date of importation, of goods of that class or kind to which the imported goods belong, and the controlling use is the principal use;
 - (b) a tariff classification controlled by the actual use to which the imported goods are put in the United States is satisfied only if such use is intended at the time of importation, the goods are so used and proof thereof is furnished within 3 years after the date the goods are entered;
 - (c) a provision for parts of an article covers products solely or principally used as a part of such articles but a provision for "parts" or "parts and accessories" shall not prevail over a specific provision for such part or accessory; and
 - (d) the principles of section XI regarding mixtures of two or more textile materials shall apply to the classification of goods in any provision in which a textile material is named.

[COMPILER'S NOTE: The rules of origin provisions for various United States free trade agreements have NOT been updated since major changes to the HTS were proclaimed effective on February 3, 2007, and will therefore contain tariff numbers that do not exist in the chapters of the HTS; these outdated rules are included in terms of HS 2002. However, the rules for the North American Free Trade Agreement, the United States-Australia Free Trade Agreement, the United States-Singapore Free Trade Agreement, the United States-Chile Free Trade Agreement, and the United States-Bahrain Free Trade Agreement have been updated, and the pertinent general notes *do* reflect proclaimed rectifications. See Presidential Proclamation 8097, which modified the HTS to reflect World Customs Organization changes to the Harmonized Commodity Description and Coding System and was effective as of Feb. 3, 2007; proclaimed modifications appear on the Web site of the United States International Trade Commission, www.usitc.gov.

The rules of origin for the United States-Chile Free Trade Agreement have been updated, as shown in the change record for this edition, to reflect the modifications to the HTS made by Presidential Proclamation 8771 of December 29, 2011 and effective as of February 3, 2012. This proclamation modified the HTS to reflect the WCO changes to the Harmonized System recommended to be effective in 2012. No other rules of origin provisions have been updated for this 2012 proclamation, and these provisions may reflect HTS numbers as in effect in 2002 or 2007.

These rates apply to those products which are properly classified under a provision for which a special rate is indicated and for which all of the legal requirements for eligibility for such program or programs have been met. Where a product is eligible for special treatment under more than one program, the lowest rate of duty provided for any applicable program shall be imposed. Where no special rate of duty is provided for a provision, or where the country from which a product otherwise eligible for special treatment was imported is not designated as a beneficiary country under a program appearing with the appropriate provision, the rates of duty in the "General" subcolumn of column 1 shall apply.

 - (B) In determining whether goods produced or manufactured in any such insular possession contain foreign materials to the value of more than 70 percent, no material shall be considered foreign which either--
 - (1) at the time such goods are entered, or
 - (2) at the time such material is imported into the insular possession,may be imported into the customs territory from a foreign country, and entered free of duty; except that no goods containing material to which (2) of this subparagraph applies shall be exempt from duty under subparagraph (A) unless adequate documentation is supplied to show that the material has been incorporated into such goods during the 18-month period after the date on which such material is imported into the insular possession.

- (a) Motor vehicles and original motor-vehicle equipment which are Canadian articles and which fall in provisions for which the rate of duty "Free (B)" appears in the "Special" subcolumn may be entered free of duty. As used in this note--
 - (i) The term "Canadian article" means an article which originates in Canada, as defined in general note 12.
 - (ii) The term "original motor-vehicle equipment", as used with reference to a Canadian article (as defined above), means such a Canadian article which has been obtained from a supplier in Canada under or pursuant to a written order, contract or letter of intent of a bona fide motor vehicle manufacturer in the United States, and which is a fabricated component originating in Canada, as defined in general note 12, and intended for use as original equipment in the manufacture in the United States of a motor vehicle, but the term does not include trailers or articles to be used in their manufacture.
 - (iii) The term "motor vehicle", as used in this note, means a motor vehicle of a kind described in headings 8702, 8703 and 8704 of chapter 87 (excluding an electric trolley bus and a three-wheeled vehicle) or an automobile truck tractor principally designed for the transport of persons or goods.
 - (iv) The term "bona fide motor-vehicle manufacturer" means a person who, upon application to the Secretary of Commerce, is determined by the Secretary to have produced no fewer than 15 complete motor vehicles in the United States during the previous 12 months, and to have installed capacity in the United States to produce 10 or more complete motor vehicles per 40-hour week. The Secretary of Commerce shall maintain, and publish from time to time in the *Federal Register*, a list of the names and addresses of bona fide motor-vehicle manufacturers.
 - (b) If any Canadian article accorded the status of original motor-vehicle equipment is not so used in the manufacture in the United States of motor vehicles, such Canadian article or its value (to be recovered from the importer or other person who diverted the article from its intended use as original motor-vehicle equipment) shall be subject to forfeiture, unless at the time of the diversion of the Canadian article the United States Customs Service is notified in writing, and, pursuant to arrangements made with the Service--
 - (i) the Canadian article is, under customs supervision, destroyed or exported, or
 - (ii) duty is paid to the United States Government in an amount equal to the duty which would have been payable at the time of entry if the Canadian article had not been entered as original motor-vehicle equipment.

6. Articles Eligible for Duty-Free Treatment Pursuant to the Agreement on Trade in Civil Aircraft.

- (a) Whenever a product is entered under a provision for which the rate of duty "Free (C)" appears in the "Special" subcolumn and a claim for such rate of duty is made, the importer--
 - (i) shall maintain such supporting documentation as the Secretary of the Treasury may require; and
 - (ii) shall be deemed to certify that the imported article is a civil aircraft, or has been imported for use in a civil aircraft and will be so used.

The importer may amend the entry or file a written statement to claim a free rate of duty under this note at any time before the liquidation of the entry becomes final, except that, notwithstanding section 505(c) of the Tariff Act of 1930 (19 U.S.C. 1505(c)), any refund resulting from any such claim shall be without interest.

- (b) (i) For purposes of the tariff schedule, the term "civil aircraft" means any aircraft, aircraft engine, or ground flight simulator (including parts, components, and subassemblies thereof)--
 - (A) that is used as original or replacement equipment in the design, development, testing, evaluation, manufacture, repair, maintenance, rebuilding, modification, or conversion of aircraft; and
 - (B) (1) that is manufactured or operated pursuant to a certificate issued by the Administrator of the Federal Aviation Administration (hereafter referred to as the "FAA") under section 44704 of title 49, United States Code, or pursuant to the approval of the airworthiness authority in the country of exportation, if such approval is recognized by the FAA as an acceptable substitute for such an FAA certificate;
 - (2) for which an application for such certificate has been submitted to, and accepted by, the Administrator of the FAA by an existing type and production certificate holder pursuant to section 44702 of title 49, United States Code, and regulations promulgated thereunder; or
 - (3) for which an application for such approval or certificate will be submitted in the future by an existing type and production certificate holder, pending the completion of design or other technical requirements stipulated by the Administrator of the FAA.
- (ii) The term "civil aircraft" does not include any aircraft, aircraft engine, or ground flight simulator (or parts, components, and subassemblies thereof) purchased for use by the Department of Defense or the United States Coast Guard, unless such aircraft, aircraft engine, or ground flight simulator (or parts, components, and subassemblies thereof) satisfies the requirements of subdivisions (i)(A) and (i)(B)(1) or (2).
- (iii) Subdivision (i)(B)(3) shall apply only to such quantities of the parts, components, and subassemblies as are required to meet the design and technical requirements stipulated by the Administrator. 7. Products of Countries Designated as Beneficiary Countries for Purposes of the Caribbean Basin Economic Recovery Act (CBERA).

- (a) The following countries and territories or successor political entities are designated beneficiary countries for the purposes of the CBERA, pursuant to section 212 of that Act (19 U.S.C. 2702):

Antigua and Barbuda	Guyana	Saint Lucia
Aruba	Haiti	Saint Vincent and the Grenadines
Bahamas	Jamaica	Trinidad and Tobago
Barbados	Montserrat	Virgin Islands, British
Belize	Netherlands Antilles	
Dominica	St. Kitts and Nevis

- (b) (i) Unless otherwise excluded from eligibility by the provisions of subdivisions (d) or (e) of this note, any article which is the growth, product, or manufacture of a beneficiary country shall be eligible for duty-free treatment if that article is provided for in a subheading for which a rate of duty of "Free" appears in the "Special" subcolumn followed by the symbol "E" or "E*" in parentheses, and if--
- (A) that article is imported directly from a beneficiary country into the customs territory of the United States; and
- (B) the sum of (I) the cost or value of the materials produced in a beneficiary country or two or more beneficiary countries, plus (II) the direct costs of processing operations performed in a beneficiary country or countries is not less than 35 per centum of the appraised value of such article at the time it is entered. For purposes of determining the percentage referred to in (II) above, the term "beneficiary country" includes the Commonwealth of Puerto Rico, the United States Virgin Islands, and any former beneficiary country. The term "former beneficiary country" means a country that ceases to be designated as a beneficiary country under the Caribbean Basin Economic Recovery Act because the country has become a party to a free trade agreement with the United States. If the cost or value of materials produced in the customs territory of the United States (other than the Commonwealth of Puerto Rico) is included with respect to an article to which this note applies, an amount not to exceed 15 per centum of the appraised value of the article at the time it is entered that is attributed to such United States cost or value may be applied toward determining the percentage referred to in (II) above.
- (C) For the purposes of this note, the former beneficiary countries are as follows:
- El Salvador, Guatemala, Honduras, Nicaragua, Dominican Republic, Costa Rica, Panama
- (ii) Pursuant to subsection 213(a)(2) of the CBERA, the Secretary of the Treasury shall prescribe such regulation as may be necessary to carry out this note including, but not limited to, regulations providing that, in order to be eligible for duty-free treatment under CBERA, an article must be wholly the growth, product, or manufacture of a beneficiary country, or must be a new or different article of commerce which has been grown, produced, or manufactured in the beneficiary country, and must be stated as such in a declaration by the appropriate party; but no article or material of a beneficiary country shall be eligible for such treatment by virtue of having merely undergone--
- (A) simple combining or packaging operations, or
- (B) mere dilution with water or mere dilution with another substance that does not materially alter the characteristics of the article.
- (iii) As used in subdivision (b) of this note, the phrase "direct costs of processing operations" includes, but is not limited to--
- (A) all actual labor costs involved in the growth, production, manufacture, or assembly of the specific merchandise, including fringe benefits, on-the-job training and the cost of engineering, supervisory, quality control, and similar personnel; and

- (B) dies, molds, tooling, and depreciation on machinery and equipment which are allocable to the specific merchandise.

Such phrase does not include costs which are not directly attributable to the merchandise concerned or are not costs of manufacturing the product, such as (I) profit, and (II) general expenses of doing business which are either not allocable to the specific merchandise or are not related to the growth, production, manufacture, or assembly of the merchandise, such as administrative salaries, casualty and liability insurance, advertising, and salesmen's salaries, commissions or expenses.

- (iv) Notwithstanding section 311 of the Tariff Act of 1930 (19 U.S.C. 1311), the products of a beneficiary country which are imported directly from such country into Puerto Rico may be entered under bond for processing or manufacturing in Puerto Rico. No duty shall be imposed on the withdrawal from warehouse of the product of such processing or manufacturing if, at the time of such withdrawal, such product meets the requirements of subdivision (b)(i)(B) above.
- (v) Pursuant to subsection 213(a)(5) of the CBERA, duty-free treatment shall be provided under the CBERA to an article (other than an article enumerated in subsection 213(b) of the CBERA) which is the growth, product, or manufacture of Puerto Rico if--
 - (A) the article is imported directly from the beneficiary country into the customs territory of the United States,
 - (B) the article was by any means advanced in value or improved in condition in a beneficiary country, and
 - (C) any materials are added to the article in a beneficiary country, such materials are a product of a beneficiary country or the United States.
- (c) Articles provided for in a provision for which a rate of duty of "Free" appears in the "Special" subcolumn followed by the symbols "E" or "E*" in parentheses are eligible articles for purposes of the CBERA pursuant to section 213 of that Act. The symbol "E" indicates that all articles provided for in the designated provision are eligible for preferential treatment except those described in subdivision (e). The symbol "E*" indicates that some articles provided for in the designated provision are not eligible for preferential treatment, as further described in subdivision (d) of this note. Whenever an eligible article is imported into the customs territory of the United States in accordance with the provisions of subdivision (b) of this note from a country or territory listed in subdivision (a) of this note, it shall be eligible for duty-free treatment as set forth in the "Special" subcolumn, unless excluded from such treatment by subdivisions (d) or (e) of this note. Whenever a rate of duty other than "Free" appears in the special subcolumn followed by the symbol "E" in parentheses, articles imported into the customs territory of the United States in accordance with the provisions of subdivision (b) of this note from a country or territory listed in subdivision (a) of this note shall be eligible for such rate in lieu of the rate of duty set forth in the "General" subcolumn.
- (d) Articles provided for in a provision for which a rate of duty of "Free" appears in the "Special" subcolumn followed by the symbol "E*" in parentheses shall be eligible for the duty-free treatment provided for in this note, except--

 - (iii) the sum of--
 - (A) the cost or value of the materials produced in Israel, and including the cost or value of materials produced in the West Bank, the Gaza Strip or a qualifying industrial zone pursuant to general note 3(a)(v) to the tariff schedule, plus

(c) Regional value content. Except as provided in subdivision (c)(iv) of this note, the regional value content of a good shall be calculated, at the choice of the exporter or producer of such good, on the basis of either the transaction value method set out in subdivision (c)(i) or the net cost method set out in subdivision (c)(ii).

(i) Transaction value method. The regional value content of a good may be calculated on the basis of the following transaction value method:

$$RVC = \frac{TV - VNM}{TV} \times 100$$

where RVC is the regional value content, expressed as a percentage; TV is the transaction value of the good adjusted to a F.O.B. basis; and VNM is the value of non-originating materials used by the producer in the production of the good.

(ii) Net cost method. The regional value content of a good may be calculated on the basis of the following net cost method:

$$RVC = \frac{NC - VNM}{NC} \times 100$$

where RVC is the regional value content, expressed as a percentage; NC is the net cost of the good; and VNM is the value of non-originating materials used by the producer in the production of the good.

(iii) Except as provided in subdivisions (d)(i) and (d)(ii)(A)(2) of this note, the value of non-originating materials used by the producer in the production of a good shall not, for purposes of calculating the regional value content of the good under subdivision (c)(i) or (c)(ii) of this note, include the value of non-originating materials used to produce originating materials that are subsequently used in the production of such good.

(iv) The regional value content of a good shall be calculated solely on the basis of the net cost method set out in subdivision (c)(ii) of this note where--

- (A) there is no transaction value for the good;
- (B) the transaction value of the good is unacceptable under section 402(b) of the Tariff Act of 1930, as amended (19 U.S.C. 1401a(b));
- (C) the good is sold by the producer to a related person and the volume, by units of quantity, of sales of identical or similar goods to related persons (as defined in article 415 of the NAFTA) during the six-month period immediately preceding the month in which the good is sold exceeds 85 percent of the producer's total sales of such goods during that period;
- (D) the good is--
 - (1) a motor vehicle provided for in headings 8701 or 8702, subheadings 8703.21 through 8703.90, inclusive, or headings 8704, 8705 or 8706;
 - (2) identified in annex 403.1 or 403.2 to the NAFTA and is for use in a motor vehicle provided for in headings 8701 or 8702, subheadings 8703.21 through 8703.90, inclusive, or headings 8704, 8705 or 8706;
 - (3) provided for in subheadings 6401.10 through 6406.10, inclusive; or
 - (4) provided for in subheading 8469.11;

- (E) the exporter or producer chooses to accumulate the regional value content of the good in accordance with subdivision (e) of this note; or
 - (F) the good is designated as an intermediate material under subdivision (c)(viii) of this note and is subject to a regional value-content requirement.
- (v) If the regional value content of a good is calculated on the basis of the transaction value method set out in subdivision (c)(i) of this note and a NAFTA party subsequently notifies the exporter or producer, during the course of a verification of the origin of the good, that the transaction value of the good, or the value of any material used in the production of the good, is required to be adjusted or is unacceptable under section 402 of the Tariff Act of 1930, as amended (19 U.S.C. 1401a), the exporter or producer may then also calculate the regional value content of the good on the basis of the net cost method set out in subdivision (c)(ii) of this note.
- (vi) For purposes of calculating the net cost of a good under subdivision (c)(ii) of this note, the producer of the good may--
- (A) calculate the total cost incurred with respect to all goods produced by that producer; subtract any sales promotion, marketing and after-sales service costs, royalties, shipping and packing costs and non-allowable interest costs that are included in the total cost of all such goods; and then reasonably allocate the resulting net cost of those goods to the good;
 - (B) calculate the total cost incurred with respect to all goods produced by that producer; reasonably allocate the total cost to the good; and then subtract any sales promotion, marketing and after-sales service costs, royalties, shipping and packing costs and non-allowable interest costs that are included in the portion of the total cost allocated to the good; or
 - (C) reasonably allocate each cost that forms part of the total cost incurred with respect to the good so that the aggregate of these costs does not include any sales promotion, marketing and after-sales service costs, royalties, shipping and packing costs and non-allowable interest costs;
- provided that the allocation of all such costs is consistent with the provisions regarding the reasonable allocation of costs set out in regulations issued by the Secretary of the Treasury. The term "total cost" means all product costs, period costs and other costs incurred in the territory of Canada, Mexico and/or the United States.
- (vii) Except as provided in subdivision (c)(ix) of this note, the value of a material used in the production of a good shall--
- (A) be the transaction value of the material determined in accordance with section 402(b) of the Tariff Act of 1930, as amended; or
 - (B) in the event that there is no transaction value or the transaction value of the material is unacceptable under section 402(b) of the Tariff Act of 1930, as amended, be determined in accordance with subsections (c) through (h), inclusive, of such section; and
 - (C) where not included under subdivision (A) or (B), include--
 - (1) freight, insurance, packing and all other costs incurred in transporting the material to the location of the producer;
 - (2) duties, taxes and customs brokerage fees on the material that were paid in the territory of Canada, Mexico, and/or the United States; and

 - (ix) The value of an intermediate material shall be--
 - (A) the total cost incurred with respect to all goods produced by the producer of the good that can be reasonably allocated to that intermediate material; or
 - (B) the aggregate of each cost that is part of the total cost incurred with respect to that intermediate material that can be reasonably allocated to that intermediate material.
 - (x) The value of an indirect material shall be based on the Generally Accepted Accounting Principles applicable in the territory of Canada, Mexico, and/or the United States in which the good is produced.

- (h) Accessories, spare parts and tools. Accessories, spare parts or tools delivered with the good that form part of the good's standard accessories, spare parts or tools, shall be considered as originating if the good originates and shall be disregarded in determining whether all the non-originating materials used in the production of the good undergo the applicable change in tariff classification set out in subdivision (t) of this note, provided that--
- (i) the accessories, spare parts or tools are not invoiced separately from the good;
 - (ii) the quantities and value of the accessories, spare parts or tools are customary for the good; and
 - (iii) if the good is subject to a regional value-content requirement, the value of the accessories, spare parts or tools shall be taken into account as originating or non-originating materials, as the case may be, in calculating the regional value content of the good.
- (i) Indirect materials. An indirect material shall be considered to be an originating material without regard to where it is produced. The term "indirect material" means a good used in the production, testing or inspection of a good but not physically incorporated into the good, or a good used in the maintenance of buildings or the operation of equipment associated with the production of a good, including the following: fuel and energy; tools, dies and molds; spare parts and materials used in the maintenance of equipment and buildings; lubricants, greases, compounding materials and other materials used in production or used to operate other equipment and buildings; gloves, glasses, footwear, clothing, safety equipment and supplies; equipment, devices and supplies used for testing or inspecting the goods; catalysts and solvents; and any other goods that are not incorporated into the good but whose use in the production of the good can reasonably be demonstrated to be a part of that production.
- (j) Packaging materials and containers for retail sale. Packaging materials and containers in which a good is packaged for retail sale shall, if classified with the good, be disregarded in determining whether all the non-originating materials used in the production of the good undergo the applicable change in tariff classification set out in subdivision (t) of this note, and, if the good is subject to a regional value-content requirement, the value of such packaging materials and containers shall be taken into account as originating or non-originating materials, as the case may be, in calculating the regional value content of the good.
- (k) Packing materials and containers for shipment. Packing materials and containers in which the good is packed for shipment shall be disregarded in determining whether--
- (i) the non-originating materials used in the production of the good undergo an applicable change in tariff classification set out in subdivision (t) of this note; and
 - (ii) the good satisfies a regional value-content requirement.
- (l) Transshipment. A good shall not be considered to be an originating good by reason of having undergone production that satisfies the requirements of this note if, subsequent to that production, the good undergoes further production or any other operation outside the territories of the NAFTA parties, other than unloading, reloading or any other operation necessary to preserve it in good condition or to transport the good to the territory of Canada, Mexico and/or the United States.
- (m) Non-qualifying operations. A good shall not be considered to be an originating good merely by reason of--
- (i) mere dilution with water or another substance that does not materially alter the characteristics of the good; or
 - (ii) any production or pricing practice with respect to which it may be demonstrated, on the basis of a preponderance of evidence, that the object was to circumvent this note.

Chapter 27.

Chapter rule: For the purposes of heading 2710, the following processes confer origin:

- (a) Atmospheric distillation—a separation process in which petroleum oils are converted, in a distillation tower, into fractions according to boiling point and the vapor then condensed into different liquefied fractions. Liquefied petroleum gas, naphtha, gasoline, kerosene, diesel/heating oil, light gas oils and lubricating oil are produced from petroleum distillation;
- (b) Vacuum distillation—distillation at a pressure below atmospheric but not so low that it would be classed as molecular distillation. Vacuum distillation is useful for distilling high-boiling and heat-sensitive materials such as heavy distillates in petroleum oils to produce light to heavy vacuum gas oils and residuum. In some refineries gas oils may be further processed into lubricating oils;
- (c) Catalytic hydroprocessing—the cracking and/or treating of petroleum oils with hydrogen at high temperature and under pressure, in the presence of special catalysts. Catalytic hydroprocessing includes hydrocracking and hydrotreating;
- (d) Reforming (catalytic reforming)—the rearrangement of molecules in a naphtha boiling range material to form higher octane aromatics (i.e., improved antiknock quality at the expense of gasoline yield). A main product is catalytic reformate, a blend component for gasoline. Hydrogen is another by-product;
- (e) Alkylation—a process whereby a high-octane blending component for gasolines is derived from catalytic combination of an isoparaffin and an olefin;
- (f) Cracking—a refining process involving decomposition and molecular recombination of organic compounds, especially hydrocarbons obtained by means of heat, to form molecules suitable for motor fuels, monomers, petrochemicals, etc.:
 - (i) Thermal cracking—exposes the distillate to temperatures of approximately 540° C to 650° C for varying periods of time. Process produces modest yields of gasoline and higher yields of residual products for fuel oil blending;
 - (ii) Catalytic cracking—hydrocarbon vapors are passed at approximately 400° C over a metallic catalyst (e.g., silica-alumina or platinum); the complex recombinations (alkylation, polymerization, isomerization, etc.) occur within seconds to yield high-octane gasoline. Process yields less residual oils and light gases than thermal cracking

- (g) Coking—a thermal cracking process for the conversion of heavy low-grade products, such as reduced crude, straight run pitch, cracked tars and shale oil, into solid coke (carbon) and lower boiling hydrocarbon products which are suitable as feed for other refinery units for conversion into lighter products; or
 - (h) Isomerization—the refinery process of converting petroleum compounds into their isomers.

Heading rule: For purposes of heading 2707, a chemical reaction is a process (including a biochemical process) which results in a molecule with a new structure by breaking intramolecular bonds and by forming new intramolecular bonds, or by altering the spatial arrangement of atoms in a molecule. - (B) An article that is eligible for preferential treatment under subdivision (e)(i) of this note shall not be ineligible for such treatment because the article is imported directly from a former CBTPA beneficiary country.
- (C) Notwithstanding subdivisions (e)(i)(A) and (e)(i)(B), an article that is a good of a former CBTPA beneficiary country for purposes of section 304 of the Tariff Act of 1930 (19 U.S.C. 1304) or section 334 of the Uruguay Round Agreements Act (19 U.S.C. 3592), as the case may be, shall not be eligible for preferential treatment under this note.

 - (2) the article, or a good used in the production of the article, undergoes production in Haiti.
- (ii) (A) The term "former CBTPA beneficiary country" means a country that ceases to be designated as a CBTPA beneficiary country under this note because the country has become a party to a free trade agreement with the United States.
- (B) For the purposes of this note, the following countries are former CBTPA beneficiary countries:

El Salvador, Guatemala, Honduras, Nicaragua, Dominican Republic, Costa Rica, Panama

18. United States-Jordan Free Trade Area Implementation Act.

- (a) The products of Jordan described in Annex 2.1 of the Agreement between the United States of America and the Hashemite Kingdom of Jordan on the Establishment of a Free Trade Area, entered into force on October 24, 2000, are subject to duty as provided herein. Products of Jordan, as defined in subdivisions (b) through (d) of this note, that are imported into the customs territory of the United States and entered under a provision for which a rate of duty appears in the "Special" subcolumn followed by the symbol "JO" in parentheses are eligible for the tariff treatment set forth in the "Special" subcolumn, in accordance with sections 101 and 102 of the United States-Jordan Free Trade Area Implementation Act (Public Law 107-43, 115 Stat. 243).
- (b) For purposes of this note, subject to the provisions of subdivisions (d) and (e), goods imported into the customs territory of the United States are eligible for treatment as "products of Jordan" only if--
- (i) such goods are imported directly from Jordan into the customs territory of the United States, and
- (ii) they are--
- (A) wholly the growth, product or manufacture of Jordan, or
- (B) new or different articles of commerce that have been grown, produced or manufactured in Jordan and meet the requirements of subdivision (c) of this note.
- (c) (i) For purposes of subdivision (b)(ii)(A) of this note, except as otherwise provided in subdivision (d) for textile and apparel articles, the expression "wholly the growth, product or manufacture of Jordan" refers both to--
- (A) an article which has been entirely grown, produced or manufactured in Jordan, and
- (B) all materials incorporated in an article which have been entirely grown, produced or manufactured in Jordan, but does not include articles or materials imported into Jordan from another country, whether or not such articles or materials were substantially transformed into new or different articles of commerce after their importation into Jordan.
- (ii) For purposes of subdivision (b)(ii)(B), goods are eligible for the tariff treatment provided in this note if the sum of--
- (A) the cost or value of the materials produced in Jordan, plus
- (B) the direct costs of processing operations performed in Jordan,
- is not less than 35 percent of the appraised value of such article at the time it is entered. If the cost or value of materials produced in the customs territory of the United States is included with respect to an article to which this subdivision applies, an amount not to exceed 15 percent of the appraised value of the article at the time it is entered that is attributable to such United States cost or value may be applied toward determining the percentage referred to in this subdivision.
- (iii) No article may be considered to meet the requirements of this note by virtue of having merely undergone--
- (A) simple combining or packaging operations, or
- (B) mere dilution with water or mere dilution with another substance that does not materially alter the characteristics of the article.
- (iv) For purposes of subdivision (ii)(A), the term "cost or value of materials" includes--
- (A) the manufacturer's actual cost for the materials,
- (B) when not included in the manufacturer's actual cost for the materials, the freight, insurance, packing and all other costs incurred in transporting the materials to the manufacturer's plant,
- (C) the actual cost of waste or spoilage (material list), less the value of recoverable scrap, and
- (D) taxes and/or duties imposed on the materials by a party to the Agreement, provided they are not remitted upon exportation.

When a material is provided to the manufacturer without charge, or at less than fair market value, its cost or value shall be determined by computing the sum of (I) all expenses incurred in the growth, production or manufacture of the material, including general expenses; (II) an amount for profit; and (III) freight, insurance, packing, and all other costs incurred in transporting the material to the manufacturer's plant. If the pertinent information is not available, the appraising officer may ascertain or estimate the value thereof using all reasonable ways and means at his disposal.

(v) For purposes of subdivision (ii)(B), the term "direct costs of processing operations" performed in Jordan means those costs either directly incurred in, or which can be reasonably allocated to, the growth, production, manufacture or assembly of the goods entered under the terms of subdivision (a) of this note. That term includes, but is not limited to, the following, to the extent that they are includible in the appraised value of goods imported into the customs territory of the United States—

- (A) all actual labor costs involved in the growth, production, manufacture or assembly of the specific merchandise, including fringe benefits, on-the-job training and the cost of engineering, supervisory, quality control and similar personnel, and
- (B) dies, molds, tooling and depreciation on machinery and equipment which are allocable to the specific merchandise,
- (C) research, development, design, engineering and blueprint costs insofar as they are allocable to the specific article, and
- (D) costs of inspecting and testing the specific article;

but that term does not include costs which are not directly attributable to the merchandise concerned, or are not costs of manufacturing the product, such as (I) profit, and (II) general expenses of doing business which are either not allocable to the specific merchandise or are not related to the growth, production, manufacture or assembly of the merchandise, such as administrative salaries, casualty and liability insurance, advertising and salesmen's salaries, commissions or expenses.

(vi) For purposes of subdivision (b)(i) of this note, except for goods covered by the provisions of subdivision (d) of this note, the term "imported directly" means—

- (A) direct shipment from Jordan to the United States without passing through the territory of any intermediate country, or
- (B) if shipment is through the territory of an intermediate country, the articles in the shipment do not enter into the commerce of any intermediate country and the invoices, bills of lading and other shipping documents show the United States as the final destination, or
- (C) if shipment is through an intermediate country and the invoices and other documents do not show the United States as the final destination, then the articles in the shipment are imported directly only if they—
 - (1) remain under the control of the customs authority in an intermediate country,
 - (2) do not enter into the commerce of an intermediate country except for the purpose of a sale other than at retail, provided that the articles are imported as a result of the original commercial transaction between the importer and the producer or the producer's sales agent, and
 - (3) have not been subjected to operations other than loading and unloading, and other activities necessary to preserve the article in good condition.

(d) Textile and apparel articles.

(i) For purposes of this note, a textile or apparel article imported directly from Jordan into the customs territory of the United States shall be eligible for the tariff treatment provided in subdivision (a) of this note only if—

- (A) the article is wholly obtained or produced in Jordan;
- (B) the article is a yarn, thread, twine, cordage, rope, cable or braiding, and—
 - (1) the constituent staple fibers are spun in Jordan, or

- (2) the continuous filament is extruded in Jordan;
- (C) the article is a fabric, including a fabric classified in chapter 59 of the tariff schedule, and the constituent fibers, filaments or yarns are woven, knitted, needled, tufted, felted, entangled or transformed by any other fabric-making process in Jordan; or
- (D) the article is any other textile or apparel article that is wholly assembled in Jordan from its component pieces.

Such textile and apparel articles not wholly obtained or produced in Jordan must comply with the requirements of this subdivision and of subdivision (c)(ii) of this note.

- (ii) For purposes of subdivision (d)(i)(A) of this note, an article is “wholly obtained or produced in Jordan” if it is wholly the growth, product or manufacture of Jordan.
- (iii) Notwithstanding the provisions of subdivision (d)(i)(D) and except as provided in subdivisions (d)(5) and (d)(6) of this note, subdivision (d)(i)(A), (d)(i)(B) or (d)(i)(C), as appropriate, shall determine whether a good that is classified in one of the following headings or subheadings of the tariff schedule shall be considered to meet the requirements of subdivision (b) of this note: 5609, 5807, 5811, 6209.20.50 (the requirement of this subdivision applies only to babies’ diapers of this provision), 6213, 6214, 6301, 6302, 6304, 6305, 6306, 6307.10, 6307.90, 6308 and 9404.90.
- (iv) Notwithstanding the provisions of subdivision (d)(i)(D) and except as provided in subdivisions (d)(v) and (d)(vi) of this note, a textile or apparel article which is knit-to-shape in Jordan shall be considered to meet the requirements of subdivision (b) of this note.
- (v) Notwithstanding the provisions of subdivision (d)(i)(D) of this note, a good classified in subheading 6117.10, heading 6213 or 6214 or subheadings 6302.22, 6302.29, 6302.53, 6302.59, 6302.93, 6302.99, 6303.92, 6303.99, 6304.19, 6304.93, 6304.99, 9404.90.85 or 9494.90.95 of the tariff schedule, except for a good classified in any such provision as of cotton or of wool or consisting of fiber blends containing 16 percent or more by weight of cotton, shall be considered to meet the requirements of subdivision (b) of this note if the fabric in the good is both dyed and printed in Jordan, and such dyeing and printing is accompanied by two or more of the following finishing operations: bleaching, shrinking, fulling, napping, decatizing, permanent stiffening, weighting, permanent embossing or moireing.
- (vi) Notwithstanding the provisions of subdivision (d)(i)(C) of this note, a fabric classified in the tariff schedule as of silk, cotton, man-made fiber, or vegetable fiber shall be considered to meet the requirements of subdivision (b) of this note if the fabric is both dyed and printed in Jordan, and such dyeing and printing is accompanied by two or more of the following finishing operations: bleaching, shrinking, fulling, napping, decatizing, permanent stiffening, weighting, permanent embossing or moireing.
- (vii) If the origin of a textile or apparel article cannot be determined under subdivision (d)(i) or (d)(iii) through (d)(vi), inclusive, of this note, then that article shall be considered to meet the requirements of subdivision (b) of this note if—
 - (A) the most important assembly or manufacturing process occurs in Jordan, or
 - (B) if the applicability of subdivision (b) of this note cannot be determined under subdivision (d)(vii)(A) of this note, the last important assembly or manufacturing occurs in Jordan.
- (e) Exclusion. A good shall not be considered to meet the requirements of subdivision (b) of this note if the good—
 - (i) is imported into Jordan, and, at the time of importation, would be classified in heading 0805 of the tariff schedule, and
 - (ii) is processed in Jordan into a good classified in subheadings 2009.11 through 2009.39, inclusive, of the tariff schedule.

 - (B) a description of the operations performed in the production of the article in Jordan and identification of the direct costs of processing operations;

- This declaration shall be prepared, signed and submitted upon request by the U.S. customs officer concerned. The information necessary for the preparation of the declaration shall be retained in the files of the importer for a period of five years.
- (g) The Secretary of the Treasury, after consultation with the United States Trade Representative, shall prescribe such regulations as may be necessary to carry out this note.

 - (B) if no change in tariff classification is required, the good otherwise satisfies the applicable requirements set forth in such subdivision (o).

An importer may make a claim for preferential treatment under this note based on the importer's knowledge or on information in the importer's possession that the good qualifies as an originating good. For the purposes of this note, the term "SFTA country" refers only to Singapore or to the United States.

 - (I) waste and scrap derived from—
 - (1) production in the territory of Singapore or of the United States, or both; or
 - (2) used goods collected in such territory, provided such goods are fit only for the recovery of raw materials;

- (ii) (A) For the purposes of subdivision (i)(J), the term "recovered goods" means materials in the form of individual parts that are the result of:
 - (1) the complete disassembly of used goods into individual parts; and
 - (2) the cleaning, inspecting, testing or other processing of those parts as necessary for improvement to sound working condition by one or more of the following processes: welding, flame spraying, surface machining, knurling, plating, sleeving and rewinding; the foregoing in order for such parts to be assembled with other parts, including other recovered parts, in the production of a remanufactured good as defined in subdivision (ii)(B).

(C) For the purposes of this note—

(1) the term “material” means a good that is used in the production of another good;

(2) the term “material that is self-produced” means a good, such as a part or ingredient, that is produced by a producer and used by such producer in the production of another good;

(3) the term “used” as it appears in this subdivision means used or consumed in the production of goods; and

(4) a “nonoriginating material” is a material that has not satisfied the requirements of this note.

(D) For the purposes of this note, the term “production” means growing, raising, mining, harvesting, fishing, trapping, hunting, manufacturing, processing, assembling or disassembling a good; and the term “producer” means a person who grows, raises, mines, harvests, fishes, traps, hunts, manufactures, processes, assembles or disassembles a good.

(iii) A good shall not be considered to be an originating good if, after it has undergone production that satisfies the requirements of this note, the good undergoes subsequent production or any other operation outside the territory of Singapore and of the United States, other than unloading, reloading or any other operation necessary to preserve it in good condition or to transport the good to the territory of Singapore or of the United States.

(d) Textile and apparel articles.

(i) Except as provided in subdivision (ii) below, a textile or apparel good provided for in chapters 50 through 63 of the tariff schedule that is not an originating good under the terms of this note because certain fibers or yarns used in the production of the component of the good that determines the tariff classification of the good do not undergo an applicable change in tariff classification set out in subdivision (o) of this note, shall nonetheless be considered to be an originating good if the total weight of all such fibers or yarns in that component is not more than seven percent of the total weight of that component. Notwithstanding the preceding sentence, a textile or apparel good containing elastomeric yarns in the component of the good that determines the tariff classification of the good shall be considered an originating good only if such yarns are wholly formed in the territory of Singapore or of the United States.

(ii) Notwithstanding any other provision of this note, an apparel good of chapter 61 or 62 of the tariff schedule shall be considered to be an originating good if it is both cut (or knit to shape) and sewn or otherwise assembled in the territory of Singapore or of the United States, or both, from fabric or yarn, regardless of the origin of such fabric or yarn, designated by the appropriate United States government authority as fabric or yarn not available in commercial quantities in a timely manner in the United States. Such designation must have been made in a notice published in the *Federal Register* on or before November 15, 2002, identifying apparel goods made from such fabric or yarn as eligible for entry into the United States under subheading 9819.11.24 or 9820.11.27 of chapter 98 of the tariff schedule. For purposes of this subdivision, reference in such a notice to yarn or fabric formed in the United States is deemed to include yarn or fabric formed in Singapore.

 - (B) if the good is subject to a regional value-content requirement under the terms of subdivision (g) or (o) of this note, the value of such nonoriginating materials is taken into account in calculating the regional value content of the good; and
 - (C) the good meets all other applicable criteria set forth in this note for qualifying as an originating good.
- (ii) Subdivision (e)(i) does not apply to—

GN p. 200

Singapore

- (A) For the build-down method, the regional value content may be calculated on the basis of the formula $RVC = ((AV - VNM)/AV) \times 100$, where RVC is the regional value content, expressed as a percentage; AV is the adjusted value; and VNM is the value of non-originating materials that are acquired and used by the producer in the production of the good; or

- (ii) Value of materials.
- (A) For purposes of calculating the regional value content of a good under subdivision (i) and for purposes of applying the de minimis provisions of subdivision (e) of this note, the value of a material is:
 - (1) in the case of a material imported by the producer of the good, the adjusted value of the material;
 - (2) in the case of a material acquired in the territory where the good is produced, except for a material to which subdivision (3) below applies, the adjusted value of the material; or
 - (3) in the case of a material that is self-produced, or in a case in which the relationship between the producer of the good and the seller of the material influenced the price actually paid or payable for the material, including a material obtained without charge, the sum of—
 - (I) all expenses incurred in the production of the material, including general expenses; and
 - (II) an amount for profit.
 - (B) The value of materials may be adjusted as follows:
 - (1) for originating materials, the following expenses, if not included under subdivision (A) above, may be added to the value of the originating material:
 - (I) the costs of freight, insurance, packing and all other costs incurred in transporting the material to the location of the producer;
 - (II) duties, taxes and customs brokerage fees on the material paid in the territory of Singapore or of the United States, or both, other than duties and taxes that are waived, refunded, refundable or otherwise recoverable, including credit against duty or tax paid or payable; and
 - (III) the cost of waste and spoilage resulting from the use of the material in the production of the good, less the value of renewable scrap or by-product; and
 - (2) for non-originating materials, if included under subdivision (A) above, the following expenses may be deducted from the value of the nonoriginating material:
 - (I) the costs of freight, insurance, packing and all other costs incurred in transporting the material to the location of the producer;
 - (II) duties, taxes and customs brokerage fees on the material paid in the territory of Singapore or of the United States, or both, other than duties and taxes that are waived, refunded, refundable or otherwise recoverable, including credit against duty or tax paid or payable;
 - (III) the cost of waste and spoilage resulting from the use of the material in the production of the good, less the value of renewable scrap or by-products;
 - (IV) the cost of processing incurred in the territory of Singapore or of the United States in the production of the non-originating material; and
 - (V) the cost of originating materials used in the production of the nonoriginating material in the territory of Singapore or of the United States.

(h) Accessories, spare parts and tools.

Accessories, spare parts or tools that are delivered with a good and that form part of the good's standard accessories, spare parts or tools shall be treated as originating goods for purposes of this note if the good is an originating good, and shall be disregarded in determining whether all the nonoriginating materials used in the production of the good undergo an applicable change in tariff classification specified in subdivision (o) of this note, provided that:

- (i) the accessories, spare parts or tools are not invoiced separately from the good;
- (ii) the quantities and value of the accessories, spare parts or tools are customary for the good; and
- (iii) if the good is subject to a regional value-content requirement, the value of the accessories, spare parts or tools shall be taken into account as originating or non-originating materials, as the case may be, in calculating the regional value content of the good under subdivision (g) of this note.

(i) Fungible goods and materials.

(i) A person claiming the treatment provided in this note for a good may claim that a fungible good or material is originating either based on the physical segregation of each fungible good or material or by using an inventory management method. For purposes of this subdivision, the term "inventory management method" means:

- (A) averaging,
- (B) "last-in, first-out,"
- (C) "first-in, first out," or
- (D) any other method that is recognized in the generally accepted accounting principles of the country in which the production is performed (whether Singapore or the United States) or otherwise accepted by that country.

The term "fungible goods" or "fungible materials" means goods or materials, as the case may be, that are interchangeable for commercial purposes and the properties of which are essentially identical.

(ii) A person selecting an inventory management method under subdivision (i) above for particular fungible goods or materials shall continue to use that method for those fungible goods or materials throughout the fiscal year of that person.

(j) Packaging materials and containers.

(i) Packaging materials and containers in which a good is packaged for retail sale, if classified with the good for which the tariff treatment under the terms of this note is claimed, shall be disregarded in determining whether all the nonoriginating materials used in the production of the good undergo the applicable change in tariff classification set out in subdivision (o) of this note and, if the good is subject to a regional value-content requirement, the value of such packaging materials and containers shall be taken into account as originating or non-originating materials, as the case may be, in calculating the regional value content of the good.

(ii) Packing materials and containers in which a good is packed for shipment shall be disregarded in determining whether—

- (A) the nonoriginating materials used in the production of the good undergo an applicable change in tariff classification set out in subdivision (o) of this note; and
- (B) the good satisfies a regional value-content requirement.

(k) Indirect materials.

An indirect material shall be considered to be an originating material for purposes of this note without regard to where it is produced, and its value shall be the cost registered in the accounting records of the producer of the good. The term "indirect material" means a good used in the production, testing or inspection of a good but not physically incorporated into the good, or a good used in the maintenance of buildings or the operation of equipment associated with the production of a good, including—

- (i) fuel and energy;

- (l) Record-keeping requirements and verification.
- (i) An importer of a good, for which treatment as an originating good of a SFTA country is claimed under the provisions of this note, shall be prepared to submit, upon request by the appropriate customs officer, a statement setting forth the reasons that the good qualifies as an originating good under the provisions of this note, including pertinent cost and manufacturing information, as provided in pertinent regulations.
 - (ii) Importers shall maintain for a period of five years after the date of importation their records relating to the importation of the good and shall, upon request by the appropriate customs officer, make available records which are necessary to demonstrate that a good qualifies as an originating good under the provisions of this note, including records concerning:
 - (A) the purchase of, cost of, value of and payment for the good;
 - (B) the purchase of, cost of, value of and payment for all materials, including indirect materials, used in the production of the good; and
 - (C) the production of the good in the form in which the good is exported.
 - (iii) For purposes of determining whether a good imported into the customs territory of the United States from the territory of Singapore qualifies as an originating good under the provisions of this note, the appropriate customs officer may conduct a verification by means of—
 - (A) requests for information from the importer;
 - (B) written requests for information to an exporter or a producer in the territory of Singapore or of the United States;

 - (E) visits to the premises of an exporter or a producer in the territory of Singapore or of the United States, in accordance with any procedures that these countries jointly adopt pertaining to the verification, as set forth in pertinent regulations; or
 - (F) such other procedures as the United States and Singapore may agree, as set forth in pertinent regulations.
- (m) Goods that shall be considered originating goods. For the purposes of subdivision (b)(ii) of this note, goods that, in their condition as imported, are classifiable in the tariff provisions enumerated in the first column and are described opposite such provisions, when such goods are imported into the customs territory of the United States from the territory of Singapore, shall be considered originating goods for the purposes of this note:

- (n) Interpretation of rules of origin.
- (i) Unless otherwise specified, and except for goods whose origin is determined under subdivision (m) of this note, a rule in subdivision (o) of this note that is set out adjacent and is applicable to an 8-digit tariff item shall take precedence over a rule applicable to a 6-digit subheading superior thereto and covering the goods of such tariff item, and a rule set out adjacent and applicable to a subheading shall take precedence over a rule applicable to a 4-digit heading superior thereto and covering the goods of such subheading. For purposes of this subdivision and subdivision (o) of this note, a tariff provision is a "heading" if its article description is not indented; a provision is a "subheading" if no subordinate 8-digit rate lines appear below it.
 - (ii) References to weight in the rules set forth in subdivision (o) of this note for goods provided for in chapters 1 through 24 of the tariff schedule mean dry weight, unless otherwise specified in the tariff schedule.

- (iii) Except as provided herein, a requirement of a change in tariff classification in subdivision (o) of this note applies only to nonoriginating materials except as follows:
- (A) agricultural and horticultural goods grown in the territory of a SFTA country shall be treated as originating in the territory of that country even if they are grown from seed, bulbs, rootstock, cuttings, slips or other live parts of plants imported from a country other than a SFTA country; and
 - (B) goods of the provisions listed below which are exported from the territory of a SFTA country shall be treated as nonoriginating:
 - (I) heading 1202, if the goods were not harvested in the territory of a SFTA country;
 - (II) subheading 2008.11, if any material provided for in heading 1202 used in the production of such goods was not harvested in the territory of a SFTA country; or
 - (III) subheading 1806.10, if such goods contain 90 percent or more by dry weight of sugar and sugar syrups of subheading 2106.90, if any material provided for in subheading 1701.99 used in the production of such goods is not an originating good.
 - (iv) A good of chapters 1 through 40, inclusive, shall not be considered to be originating solely by reason of mere dilution with water or another substance that does not materially alter the characteristics of the good.
 - (v) For purposes of applying this note to goods of chapters 27 through 40, inclusive, of the tariff schedule, a "chemical reaction" is a process (including a biochemical process) which results in a molecule with a new structure by breaking intramolecular bonds and by forming new intramolecular bonds, or by altering the spatial arrangement of atoms in a molecule. The following are not considered to be chemical reactions for purposes of this note:
 - (A) dissolving in water or other solvents;
 - (B) the eliminating of solvents including solvent water; or
 - (C) the addition or elimination of water of crystallization.

A chemical reaction as defined above is considered to result in an originating good for purposes of this note. Notwithstanding any of the change of tariff classification rules of subdivision (o) of this note, this "chemical reaction rule" may be applied to any good classified in chapters 28 through 40, inclusive.

- (o) Change in tariff classification rules. [NOTE: Not updated for Pres.Proc. 8771, effective Feb. 3, 2012.]

 - (II) an amount for profit.
- (B) The value of materials may be adjusted as follows:
- (1) for originating materials, the following expenses, if not included under subdivision (A) above, may be added to the value of the originating material:
 - (I) the costs of freight, insurance, packing and all other costs incurred in transporting the material to the location of the producer;
 - (II) duties, taxes and customs brokerage fees on the material paid in the territory of Chile or of the United States, or both, other than duties and taxes that are waived, refunded, refundable or otherwise recoverable, including credit against duty or tax paid or payable; and
 - (III) the cost of waste and spoilage resulting from the use of the material in the production of the good, less the value of renewable scrap or by-product; and
 - (2) for non-originating materials, if included under subdivision (A) above, the following expenses may be deducted from the value of the nonoriginating material:
 - (I) the costs of freight, insurance, packing and all other costs incurred in transporting the material to the location of the producer;
 - (II) duties, taxes and customs brokerage fees on the material paid in the territory of Chile or of the United States, or both, other than duties and taxes that are waived, refunded, refundable or otherwise recoverable, including credit against duty or tax paid or payable;

- (C) Any cost or value referred to in this note shall be recorded and maintained in accordance with the generally accepted accounting principles applicable in the territory of the country in which the good is produced (whether Chile or the United States). Such principles are the principles, rules and procedures, including both broad and specific guidelines, that define the accounting practices accepted in the territory of Chile or of the United States, as the case may be.
- (h) Accessories, spare parts or tools.
- Accessories, spare parts or tools delivered with a good that form part of the good's standard accessories, spare parts or tools shall be treated as a material used in the production of the good, if:

(i) Fungible goods and materials.

(i) A person claiming the tariff treatment provided in this note for a good may claim that a fungible good or material is originating either based on the physical segregation of each fungible good or material or by using an inventory management method. For purposes of this subdivision, the term "inventory management method" means:

(A) averaging,

(B) "last-in, first-out,"

(C) "first-in, first out," or

(D) any other method that is recognized in the generally accepted accounting principles of the country in which the production is performed (whether Chile or the United States) or otherwise accepted by that country.

The term "fungible goods" or "fungible materials" means goods or materials, as the case may be, that are interchangeable for commercial purposes and the properties of which are essentially identical.

(ii) A person selecting an inventory management method under subdivision (i) above for particular fungible goods or materials shall continue to use that method for those fungible goods or materials throughout the fiscal year of that person.

(j) Packaging materials and containers.

(i) Packaging materials and containers in which a good is packaged for retail sale, if classified with the good for which the tariff treatment under the terms of this note is claimed, shall be disregarded in determining whether all nonoriginating materials used in the production of the good undergo the applicable change in tariff classification set out in subdivision (n) of this note and, if the good is subject to a regional value-content requirement, the value of such packaging materials and containers shall be taken into account as originating or nonoriginating materials, as the case may be, in calculating the regional value content of the good.

(ii) Packing materials and containers for shipment shall be disregarded in determining whether—

(A) the nonoriginating materials used in the production of the good undergo an applicable change in tariff classification set out in subdivision (n) of this note; and

(B) the good satisfies a regional value-content requirement.

(k) Indirect materials.

An indirect material shall be considered to be an originating material for purposes of this note without regard to where it is produced. The term "indirect material" means a good used in the production, testing or inspection of a good but not physically incorporated into the good, or a good used in the maintenance of buildings or the operation of equipment associated with the production of a good, including—

(i) fuel and energy;

(ii) tools, dies and molds;

(iii) spare parts and materials used in the maintenance of equipment or buildings;

(iv) lubricants, greases, compounding materials and other materials used in production or used to operate equipment and buildings;

(v) gloves, glasses, footwear, clothing, safety equipment and supplies;

(vi) equipment, devices and supplies used for testing or inspecting the goods;

(vii) catalysts and solvents; and

(viii) any other goods that are not incorporated into the good but the use of which in the production of the good can reasonably be demonstrated to be a part of that production.

(l) Record-keeping requirements and verification.

- (i) An importer of a good, for which treatment as an originating good of a UCFTA country is claimed under the provisions of this note, shall make a written declaration that the good qualifies as originating, under the terms of applicable regulations, and shall be prepared to submit, upon request by the appropriate customs officer, a certificate of origin demonstrating that the good qualifies as an originating good under the provisions of this note, including pertinent cost and manufacturing information and all other information requested by such customs officer.
- (ii) Importers shall maintain for a period of five years after the date of importation of the good a certificate of origin or other information demonstrating that the good qualifies as originating, and all other documents that are required under applicable regulations relating to the importation of the good, in relating to the importation of the good, including records concerning:
 - (A) the purchase of, cost of, value of and payment for the good;
 - (B) where appropriate, the purchase of, cost of, value of and payment for all materials, including indirect materials, used in the production of the good; and
 - (C) where appropriate, the production of the good in the form in which the good is exported;and shall, upon request by the appropriate customs officer, make available such records as are necessary under applicable regulations to demonstrate that a good qualifies as an originating good under the provisions of this note.
- (iii) For purposes of determining whether a good imported into the customs territory of the United States from the territory of Chile qualifies as an originating good under the provisions of this note, the appropriate customs officer may conduct a verification under such terms or procedures as the United States and Chile may agree, as set forth in pertinent regulations.

(m) Interpretation of rules of origin.

- (i) Unless otherwise specified, a rule in subdivision (n) of this note that is set out adjacent and is applicable to a 6-digit subheading in the tariff schedule shall take precedence over a rule applicable to a 4-digit heading superior thereto and covering the goods of such subheading. For purposes of this subdivision and subdivision (n) of this note, a tariff provision is a "heading" if its article description is not indented; a provision is a "subheading" if it is designated by 6 digits under the Harmonized Commodity Description and Coding System.
- (ii) References to weight in the rules set forth in subdivision (n) of this note for goods provided for in chapters 1 through 24 of the tariff schedule are to dry weight, unless otherwise specified in the tariff schedule.
- (iii) A requirement of a change in tariff classification in subdivision (n) of this note applies only to nonoriginating materials.
- (iv) A good shall not be considered to be originating solely by virtue of having undergone:
 - (A) simple combining or packaging operations, or
 - (B) mere dilution with water or another substance that does not materially alter the characteristics of the good.
- (v) For purposes of applying this note to goods of chapters 6 through 14, inclusive, agricultural and horticultural goods grown in the territory of Chile or of the United States shall be treated as originating therein even if grown from seed, bulbs, rootstock, cuttings, slips or other live parts of plants imported from a country other than Chile or the United States.
- (vi) (A) For purposes of applying this note to goods of chapters 28 through 38, inclusive, the following provisions confer origin to a good of any heading or subheading in such chapters, except as otherwise specified in this subdivision.
 - (B) Notwithstanding subdivision (vi)(A), a good of chapters 28 through 38 is an originating good if it meets the applicable change in tariff classification or satisfies the applicable value content requirement specified in subdivision (n) of this note.
 - (C) A good of chapters 28 through 38, except goods of heading 3823, that results from a chemical reaction in the territory of Chile or of the United States, or both, shall be treated as an originating good. For purposes of such chapters, a "chemical reaction" is a process (including a biochemical process) that results in a molecule with a new structure by breaking intramolecular bonds and by forming new intramolecular bonds, or by altering the spatial arrangement of atoms in a molecule.

The following are not considered to be chemical reactions for the purposes of determining whether a good is originating:

- (1) dissolving in water or in another solvent;
- (2) the elimination of solvents, including solvent water; or
- (3) the addition or elimination of water of crystallization.

- (D) A good of chapters 28 through 38 that is subject to purification shall be treated as an originating good provided that the purification occurs in the territory of Chile or of the United States, or both, and results in the following:
- (1) the elimination of 80 percent of the impurities; or
 - (2) the reduction or elimination of impurities resulting in a good suitable:
 - (I) as a pharmaceutical, medicinal, cosmetic, veterinary or food grade substance;
 - (II) as a chemical product or reagent for analytical, diagnostic or laboratory uses;
 - (III) as an element or component for use in micro-elements;
 - (IV) for specialized optical uses;
 - (V) for non-toxic uses for health and safety;
 - (VI) for biotechnical use;
 - (VII) as a carrier used in a separation process; or
 - (VIII) for nuclear grade uses.
- (E) A good of chapters 30, 31 or 33 through 38, except for heading 3808, shall be treated as an originating good if the deliberate and proportionally controlled mixing or blending (including dispersing) of materials to conform to predetermined specifications, resulting in the production of a good having physical or chemical characteristics that are relevant to the purposes or uses of the good and are different from the input materials, occurs in the territory of Chile or of the United States, or both.
- (F) A good of chapters 30, 31 or 33 shall be treated as an originating good if the deliberate and controlled modification in particle size of the good, including micronizing by dissolving a polymer and subsequent precipitation, other than by merely crushing or pressing, resulting in a good having a defined particle size, defined particle size distribution, or defined surface area, which is relevant to the purposes of the resulting good and have different physical or chemical characteristics from the input materials, occurs in the territory of Chile or of the United States, or both.
- (G) A good of chapters 28 through 38 shall be treated as an originating good if the production of standards materials occurs in the territory of Chile or of the United States, or both. For the purposes of this note, "standards materials" (including standard solutions) are preparations suitable for analytical, calibrating or referencing uses, having precise degrees of purity or proportions that are certified by the manufacturer.
- (H) A good of chapters 28 through 38 shall be treated as an originating good if the isolation or separation of isomers from mixtures of isomers occurs in the territory of Chile or of the United States, or both.
- (I) A good that undergoes a change from one classification to another in the territory of Chile or of the United States, or both, as a result of the separation of one or more materials from a man-made mixture shall not be treated as an originating good unless the isolated material underwent a chemical reaction in the territory of Chile or of the United States, or both.

(iv) Definitions. For the purposes of this note:

- (A) The term "direct costs of processing operations," with respect to a good, includes, to the extent they are includable in the appraised value of the good when imported into Morocco or the United States, as the case may be, the following:
- (1) all actual labor costs involved in the growth, production or manufacture of the good, including fringe benefits, on-the-job training and the costs of engineering, supervisory, quality control and similar personnel;

 - (5) costs of packaging the good for export to the territory of the other country.

The term "direct costs of processing operations" does not include costs that are not directly attributable to a good or are not costs of growth, production or manufacture of the good, such as profit and such as general expenses of doing business that are either not allocable to the good or are not related to the growth, production or manufacture of the good, such as administrative salaries, casualty and liability insurance, advertising and sales staff salaries, commission or expenses.

- (B) The term "material" means a good, including a part or ingredient, that is used in the growth, production or manufacture of another good that is a new or different article of commerce that has been grown, produced or manufactured in Morocco, the United States or both; and
- (C) The term "material produced in the territory of Morocco or of the United States, or both" means a good that is either wholly the growth, product or manufacture of Morocco, the United States, or both, or a new or different article of commerce that has been grown, produced or manufactured in the territory of Morocco or of the United States, or both.
- (D) The term "new or different article of commerce" means, except as provided in this subdivision, a good that--
- (1) has been substantially transformed from a good or material that is not wholly the growth, product or manufacture of Morocco, the United States, or both; and
 - (2) has a new name, character or use distinct from the good or material from which it was transformed,
- but a good shall not be considered a new or different article of commerce by virtue of having undergone simple combining or packaging operations, or mere dilution with water or another substance that does not materially alter the characteristics of the good.
- (E) The term "simple combining or packaging operations" means operations such as adding batteries to electronic devices, fitting together a small number of components by bolting, gluing or soldering, or packing or repacking components together.

- (2) the good or material loses its separate identity in the manufacturing or processing operation.
- (v) A good shall not be considered to be imported directly into the territory of the United States if, after exportation from the territory of Morocco or of the United States, the good undergoes production, manufacturing or any other operation outside the territory of Morocco or of the United States, other than unloading, reloading or any other operation necessary to preserve the good in good condition or to transport the good to the territory of Morocco or of the United States.
- (e) Textile and apparel articles.
- (i) Except as provided in subdivision (ii) below, a textile or apparel good that is not an originating good under the terms of this note, because certain fibers or yarns used in the production of the component of the good that determines the tariff classification of the good do not undergo an applicable change in tariff classification set out in subdivision (h) of this note, shall be considered to be an originating good if the total weight of all such fibers or yarns in that component is not more than seven percent of the total weight of that component. Notwithstanding the preceding sentence, a textile or apparel good containing elastomeric yarns in the component of the good that determines the tariff classification of the good shall be considered to be an originating good only if such yarns are wholly formed in the territory of Morocco or of the United States.

 - (iii) For purposes of this note, in the case of a textile or apparel good that is a yarn, fabric or group of fibers, the term “component of the good that determines the tariff classification of the good” means all of the fibers in the yarn, fabric or group of fibers.

 - (B) the good satisfies any other applicable requirements of this note.
 - (ii) For purposes of interpreting the rules of origin set forth in subdivision (h) of this note--

 - (C) Any cost or value referred to in this note shall be recorded and maintained in accordance with the generally accepted accounting principles applicable in the territory of the country in which the good is produced (whether Australia or the United States). Such principles comprise the recognized consensus or substantial authoritative support in the territory of Australia or of the United States, as the case may be, with respect to the recording of revenues, expenses, costs, assets and liabilities, the disclosure of information and the preparation of financial statements.  - (B) For purposes of determining the regional value content under this subdivision for an automotive good that is a motor vehicle provided for in any of headings 8701 through 8705, an importer, exporter or producer may average the amounts calculated under the formula contained in subdivision (A) above, over the producer's fiscal year--
 - (I) with respect to all motor vehicles in any one of the categories described in subdivision (C), below; or
 - (II) with respect to all motor vehicles in any such category that are exported to the territory of the United States or Australia.
 - (C) A category is described for purposes of subdivision (B)(I) above if it--
 - (I) is the same model of motor vehicles, is in the same class of vehicles, and is produced in the same plant in the territory of Australia or of the United States, as the good described in subdivision (B) for which regional value content is being calculated;
 - (II) is the same class of motor vehicles, and is produced in the same plant in the territory of Australia or of the United States, as the good described in subdivision (B) for which regional value content is being calculated; or
 - (III) is the same model line of motor vehicles produced in either the territory of Australia or of the United States, as the good described in subdivision (B) for which regional value content is being calculated.
 - (D) For purposes of determining the regional value content under subdivision (A) above for automotive goods provided for in any of subheadings 8407.31 through 8407.34, in subheading 8408.20 or in heading 8409, 8705, 8707 or 8708, that are produced in the same plant, an importer, exporter or producer may--

 - (III) make a separate determination under subdivision (I) or (II) for automotive goods that are exported to the territory of the United States or of Australia.
- (E) Consistent with the provisions regarding allocation of costs set out in generally accepted accounting principles, the net cost of the automotive good under subdivision (B) shall be calculated by--
- (I) calculating the total cost incurred with respect to all goods produced by the producer of the automotive good, subtracting any sales promotion, marketing and after-sales service costs, royalties, shipping and packing costs and nonallowable interest costs that are included in the total cost of all such goods, and then reasonably allocating the resulting net cost of those goods to the automotive good;
 - (II) calculating the total cost incurred with respect to all goods produced by that producer, reasonably allocating the total cost to the automotive good, and then subtracting any sales promotion, marketing and after-sales services costs, royalties, shipping and packing costs and nonallowable interest costs that are included in the portion of the total cost allocated to the automotive good; or
 - (III) reasonably allocating each cost that forms part of the total cost incurred with respect to the automotive good so that the aggregate of these costs does not include any sales promotion, marketing and after-sales costs, royalties, shipping and packing costs or nonallowable interest costs.

- (G) For purposes of this note, the term "model line" means a group of motor vehicles having the same platform or model name.
- (H) For purposes of this note, the term "nonallowable interest costs" means interest costs incurred by a producer that exceed 700 basis points above the applicable official interest rate for comparable maturities of the country (whether Australia or the United States).
- (I) For purposes of this note, the term "reasonably allocating" means apportioning in a manner that would be appropriate under generally accepted accounting principles.
- (J) For purposes of this note, the term "total cost" means all product costs, period costs and other costs for a good incurred in the territory of Australia or of the United States, or both.
- (h) Accessories, spare parts or tools.

- (A) be treated as originating goods if the good is an originating good; and
- (B) be disregarded in determining whether all the nonoriginating materials used in the production of the good undergo the applicable change in tariff classification set out in subdivision (n) of this note.
- (ii) Subdivision (i) above shall apply only if--
 - (A) the accessories, spare parts or tools are not invoiced separately from the good;
 - (B) the quantities and value of the accessories, spare parts or tools are customary for the good; and
 - (C) if the good is subject to a regional value content requirement, the value of the accessories, spare parts or tools is taken into account as originating or nonoriginating materials, as the case may be, in calculating the regional value content of the good.
- (i) Fungible goods and materials.
 - (i) A person claiming that a fungible good or fungible material is an originating good may base the claim either on the physical segregation of the fungible good or fungible material or by using an inventory management method with respect to the fungible good or fungible material. For purposes of this subdivision, the term "inventory management method" means:
 - (A) averaging,
 - (B) "last-in, first-out,"
 - (C) "first-in, first out," or
 - (D) any other method that is recognized in the generally accepted accounting principles of the country in which the production is performed (whether Australia or the United States) or otherwise accepted by that country.

The term "fungible good" or "fungible material" means a good or material, as the case may be, that is interchangeable with another good or material for commercial purposes and the properties of which are essentially identical to such other good or material.
 - (ii) A person selecting an inventory management method under subdivision (i) above for a particular fungible good or fungible material shall continue to use that method for that fungible good or fungible material throughout the fiscal year of that person.
- (j) Packaging materials and containers.
 - (i) Packaging materials and containers in which a good is packaged for retail sale, if classified with the good for which the tariff treatment under the terms of this note is claimed, shall be disregarded in determining whether all nonoriginating materials used in the production of the good undergo the applicable change in tariff classification set out in subdivision (n) of this note and, if the good is subject to a regional value content requirement, the value of such packaging materials and containers shall be taken into account as originating or nonoriginating materials, as the case may be, in calculating the regional value content of the good.
 - (ii) Packing materials and containers for shipment shall be disregarded in determining whether--
 - (A) the nonoriginating materials used in the production of the good undergo the applicable change in tariff classification set out in subdivision (n) of this note; and
 - (B) the good satisfies a regional value content requirement.
- (k) Indirect materials.

An indirect material shall be considered to be an originating material for purposes of this note without regard to where it is produced, and its value shall be the cost registered in the accounting records of the producer of the good. The term "indirect material" means a good used in the production, testing or inspection of a good but not physically incorporated into the good, or a good used in the maintenance of buildings or the operation of equipment associated with the production of a good, including--

 - (i) fuel and energy;
 - (ii) tools, dies and molds;

- (iii) spare parts and materials used in the maintenance of equipment or buildings;
 - (iv) lubricants, greases, compounding materials and other materials used in production or used to operate equipment and buildings;
 - (v) gloves, glasses, footwear, clothing, safety equipment and supplies;
 - (vi) equipment, devices and supplies used for testing or inspecting the goods;
 - (vii) catalysts and solvents; and
 - (viii) any other goods that are not incorporated into the good but the use of which in the production of the good can reasonably be demonstrated to be a part of that production.
- (l) Record-keeping requirements and verification.
- (i) An importer of a good, for which treatment as an originating good of a UAFTA country is claimed under the provisions of this note, shall make a written declaration that the good qualifies as originating, under the terms of applicable regulations, and shall be prepared to submit, upon request by the appropriate customs officer, a statement setting forth the reasons that the good qualifies as an originating good under the provisions of this note, including pertinent cost and manufacturing information and all other information requested by such customs officer.
 - (ii) Importers shall maintain, for a period prescribed in applicable regulations and starting on the date of importation of the good, all information demonstrating that the good qualifies as originating in a format that may be provided for in such regulations, along with all other required documents relating to the importation of the good, including records concerning:
 - (A) the purchase of, cost of, value of and payment for the good;
 - (B) where appropriate, the purchase of, cost of, value of and payment for all materials, including indirect materials, used in the production of the good; and
 - (C) where appropriate, the production of the good in the form in which the good is exported;and shall, upon request by the appropriate customs officer, make available such records as are necessary under applicable regulations to demonstrate that a good qualifies as an originating good under the provisions of this note.
 - (iii) For purposes of determining whether a good imported into the customs territory of the United States from the territory of Australia qualifies as an originating good under the provisions of this note, the appropriate customs officer may conduct a verification under such terms or procedures as the United States and Australia may agree, as set forth in pertinent regulations.
- (m) Interpretation of rules of origin.
- (i) Unless otherwise specified, the requirements of any rule in subdivision (n) of this note that is set out adjacent to a heading or subheading of the tariff schedule and specifies a change of tariff classification applies only to nonoriginating materials. For purposes of this subdivision and subdivision (n) of this note, a tariff provision is a "heading" if its article description is not indented; a provision is a "subheading" if it is designated by 6 digits under the Harmonized Commodity Description and Coding System.
 - (ii) Where a specific rule in subdivision (n) of this note is defined using the criterion of a change in tariff classification, and the rule is written to exclude tariff provisions at the level of a chapter, heading or subheading of the tariff schedule, such rule shall be construed to require that materials classified in those excluded provisions be originating for the good to qualify as originating.
 - (iii) When a heading or subheading of the tariff schedule is subject to alternative specific rules in subdivision (n) of this note, the rule will be considered to be met if a good satisfies one of the alternatives.
 - (iv) When a single rule applies to a group of headings or subheadings, and that rule specifies a change of heading or subheading, the requirement shall be considered to permit a change within a single heading or subheading in such group or between headings or subheadings of that group. When, however, a rule requires a change in heading or subheading from a provision "outside that group" such change in heading or subheading must occur from a heading or subheading that is outside the group of headings or subheadings set out in the rule.
 - (v) References to weight in the rules set forth in subdivision (n) of this note for goods provided for in chapters 1 through 24 of the tariff schedule are to dry weight, unless otherwise specified in the tariff schedule.

- (vi) For purposes of applying this note to goods of chapters 6 through 14, inclusive, agricultural and horticultural goods grown in the territory of Australia or of the United States shall be treated as originating therein even if grown from seed, bulbs, rootstock, cuttings, grafts, shoots, buds or other live parts of plants imported from a country other than Australia or the United States.
- (vii) Any good of chapters 27 through 40, inclusive (except a good of heading 3823), of the tariff schedule, that is the product of a chemical reaction shall be considered to be an originating good if the chemical reaction occurred in the United States or Australia. Notwithstanding any of the individual tariff classification rules, this "chemical reaction" rule may be applied to any good classified in the above chapters. For purposes of applying this note to goods of the above chapters, a "chemical reaction" is a process (including a biochemical process) which results in a molecule with a new structure by breaking intramolecular bonds and by forming new intramolecular bonds, or by altering the spatial arrangement of atoms in a molecule. The following are not considered to be chemical reactions for purposes of this note:
 - (A) dissolving in water or other solvents;
 - (B) the elimination of solvents including solvent water; or
 - (C) the addition or elimination of water of crystallization.
- (viii) For the purposes of chapters 28 through 35 and chapters 38 and 39, purification is considered to be origin conferring under this note provided that one of the following criteria is satisfied:
 - (A) purification of a good resulting in the elimination of 80 percent by weight of the content of existing impurities; or
 - (B) reduction or elimination of impurities resulting in a good suitable for one or more of the following applications:
 - (I) pharmaceutical, medicinal, cosmetic, veterinary or food grade substances;
 - (II) chemical products and reagents for analytical, diagnostic or laboratory uses;
 - (III) elements and components for use in micro-elements;
 - (IV) specialized optical uses;
 - (V) non-toxic uses for health and safety;
 - (VI) biotechnical use;
 - (VII) carriers used in a separation process; or
 - (VIII) nuclear grade uses.
- (ix) For the purposes of chapters 30 and 31, heading 3302, subheading 3502.20, headings 3506 through 3507, heading 3707 and chapters 39 and 40, the deliberate and proportionally controlled mixing or blending (including dispersing) of materials to conform to predetermined specifications which results in the production of a good having physical or chemical characteristics which are relevant to the purposes or uses of the good and are different from the input materials is considered to be origin conferring for purposes of this note.
- (x) For the purposes of chapters 30, 31 and 39, the following shall be considered to be origin conferring for purposes of this note:
 - (A) the deliberate and controlled reduction in particle size of a good, other than by merely crushing (or pressing) resulting in a good having a defined particle size, defined particle size distribution or defined surface area, which are relevant to the purposes of the resulting good and have different physical or chemical characteristics from the input materials; or
 - (B) the deliberate and controlled modification in particle size of a good, other than by merely pressing, resulting in a good having a defined particle size, defined particle size distribution or defined surface area, which are relevant to the purposes of the resulting good and have different physical or chemical characteristics from the input materials.

- (xi) For the purposes of chapters 28 through 32, 35 and 38, the production of standards materials is considered to be origin conferring for purposes of this note. The term "standards materials" (including standard solutions) means preparations suitable for analytical, calibrating or reference uses having precise degrees of purity or proportions which are certified by the manufacturer.
- (xii) For the purposes of chapters 28 through 32, 35 and 39, the isolation or separation of isomers from mixtures of isomers shall be considered origin conferring for purposes of this note.
- (xiii) For the purposes of chapters 28 through 38, a nonoriginating material/component will not be deemed to have satisfied all applicable requirements of these rules by reason of a change from one tariff classification to another merely as the result of the separation of one or more individual materials or components from a man-made mixture unless the isolated material/component, itself, also underwent a chemical reaction.

 - (2) calculating the total cost incurred with respect to all goods produced by that producer, reasonably allocating the total cost to the automotive good, and then subtracting any sales promotion, marketing and after-sales service costs, royalties, shipping and packing costs and nonallowable interest costs that are included in the portion of the total cost allocated to the automotive good; or
 - (3) reasonably allocating each cost that forms part of the total cost incurred with respect to the automotive good so that the aggregate of all such costs does not include any sales promotion, marketing and after-sales service costs, royalties, shipping and packing costs or nonallowable interest costs.

in such form and manner as may be required in applicable regulations.

(ii) Record-keeping requirements.--An importer of a good, for which entry is claimed under the terms of this note, shall maintain, for a minimum of five years from the date of importation of the good, all records and documents necessary to demonstrate that the good qualified for the tariff and other treatment provided for under the terms of this note, in such form and manner as may be required in applicable regulations.

(iii) Verification.--For purposes of determining whether a good imported into the customs territory of the United States from the territory of another party to the Agreement qualifies as an originating good under the provisions of this note, the appropriate customs officer may conduct a verification as set forth in pertinent regulations.

(m) Interpretation and application of rules of origin.

- (i) Unless otherwise specified, the requirements of any rule in subdivision (n) of this note that is set out adjacent to a heading or subheading of the tariff schedule and specifies a change of tariff classification applies only to nonoriginating materials. For purposes of this subdivision and subdivision (n) of this note, a tariff provision is a "heading" if its article description is not indented; a provision is a "subheading" if it is designated by 6 digits under the Harmonized Commodity Description and Coding System; and the terms "chapter" and "section" refer to a chapter or section, respectively, of the tariff schedule.
- (ii) Where a specific rule in subdivision (n) of this note is defined using the criterion of a change in tariff classification, and the rule is written to exclude tariff provisions at the level of a chapter, heading or subheading of the tariff schedule, such rule shall be construed to require that materials classified in those excluded provisions be originating for the good to qualify as originating.
- (iii) When a heading or subheading of the tariff schedule is subject to alternative specific rules in subdivision (n) of this note, the rule will be considered to be met if a good satisfies one of the alternatives.

- (iv) When a single rule is applicable to a group of headings or subheadings, and that rule of origin specifies a change of heading or subheading, the requirement shall be interpreted so that the change of heading or subheading may occur within a single heading or subheading or between headings or subheadings of the group. When, however, a rule refers to a change in heading or subheading "outside that group," such change in heading or subheading must occur from a heading or subheading that is outside the group of headings or subheadings set out in the rule.
- (v) References to weight in the rules set forth in subdivision (n) of this note for goods provided for in chapters 1 through 24 of the tariff schedule are to dry weight, unless otherwise specified in the tariff schedule.
- (vi) For purposes of applying this note to goods of chapters 6 through 14, inclusive, agricultural and horticultural goods shall be treated as originating in the territory of a party to the Agreement even if grown from seeds, bulbs, rootstock, cuttings, grafts, shoots, buds or other live parts of plants imported from a country other than a party to the Agreement.
- (vii) This subdivision confers origin on the goods specified in the provisions below, except as otherwise specified herein. Notwithstanding the preceding sentence, a good is originating if it meets the applicable change in tariff classification rules specified in subdivision (n) of this note.
 - (A) A good of chapters 27 through 40, inclusive (except a good of heading 3823), of the tariff schedule, that is the product of a chemical reaction in the territory of one or more of the parties to the Agreement shall be treated as originating. For purposes of applying this subdivision to goods of the foregoing chapters, a "chemical reaction" is a process (including a biochemical process) that results in a molecule with a new structure by breaking intramolecular bonds and by forming new intramolecular bonds, or by altering the spatial arrangement of atoms in a molecule. The following are not considered to be chemical reactions for purposes of determining whether a good is originating:
 - (1) dissolution in water or in another solvent;
 - (2) the elimination of solvents, including solvent water; or
 - (3) the addition or elimination of water of crystallization.
 - (B) For the purposes of chapters 28 through 35 and chapters 38 and 39, a good that is subject to purification shall be treated as originating provided that one of the following occurs in the territory of one or more of the parties to the Agreement:
 - (1) the purification results in the elimination of 80 percent of the impurities; or
 - (2) the purification results in the reduction or elimination of impurities, rendering the good suitable:
 - (I) as a pharmaceutical, medicinal, cosmetic, veterinary or food grade substance;
 - (II) as a chemical good or reagent for analytical, diagnostic or laboratory uses;
 - (III) as an element or component for use in micro-elements;
 - (IV) for specialized optical uses;
 - (V) for non toxic uses for health and safety;
 - (VI) for biotechnical use;
 - (VII) as a carrier used in a separation process; or
 - (VIII) for nuclear grade uses.
 - (C) A good of chapters 30 or 31, heading 3302, subheading 3502.20, headings 3506 through 3507, inclusive, heading 3707 or chapters 39 or 40 shall be treated as originating if the deliberate and proportionally controlled mixing or blending (including dispersing) of materials to conform to predetermined specifications, resulting in the production of a good having physical or chemical characteristics which are relevant to the purposes or uses of the good and are different from the input materials, occurs in the territory of one or more of the parties to the Agreement.
 - (D) A good of chapter 30, 31 or 39 shall be treated as originating if the following occurs in the territory of one or more of the parties to the Agreement:

- (1) the deliberate and controlled reduction in particle size of a good, other than by merely crushing (or pressing), resulting in a good having a defined particle size, defined particle size distribution or defined surface area, which are relevant to the purposes of the resulting good and have different physical or chemical characteristics from the input materials; or
 - (2) the deliberate and controlled modification in particle size of a good, other than by merely pressing, resulting in a good having a defined particle size, defined particle size distribution or defined surface area, which are relevant to the purposes of the resulting good and have different physical or chemical characteristics from the input materials.
- (E) A good of chapters 28 through 32, 35 or 38 shall be treated as originating if the production of standards materials occurs in the territory of one or more of the parties to the Agreement. For purposes of this subdivision, "standards materials" (including standards solutions) are preparations suitable for analytical, calibrating or referencing uses, having precise degrees of purity or proportions which are certified by the manufacturer.
- (F) A good of chapters 28 through 32, 35 or 39 shall be treated as originating if the isolation or separation of isomers from mixtures of isomers occurs in the territory of one or more of the parties to the Agreement.
- (G) A good of chapters 28 through 38 that undergoes a change from one tariff classification to another in the territory of one or more of the parties to the Agreement as the result of the separation of one or more individual materials from a man-made mixture shall not be treated as originating unless the isolated material underwent a chemical reaction in the territory of one or more of the parties to the Agreement.
- (viii) (A) A textile good of chapters 50 through 60 of the tariff schedule and imported under heading 9822.05.01 of the tariff schedule shall be considered originating if it is wholly formed in the territory of one or more of the parties to the Agreement from--
- (1) one or more fibers and yarns listed in U.S. note 20 to subchapter XXII of chapter 98; or
 - (2) a combination of the fibers and yarns listed in U.S. note 20 to such subchapter XXII and one or more fibers and yarns that originate under the terms of this note.

The originating fibers and yarns referred to in subdivision (A)(2) may contain up to 10 percent by weight of fibers or yarns that do not undergo an applicable change in tariff classification set out in subdivision (n) of this note. Any elastomeric yarn (except latex) contained in the originating yarns referred to in subdivision (A)(2) must be formed in the territory of one or more of the parties to the Agreement.

- (B) An apparel good of chapter 61 or 62 of the tariff schedule and imported under heading 9822.05.01 of the tariff schedule shall be considered originating if it is cut or knit to shape, or both, and sewn or otherwise assembled in the territory of one or more of the parties to the Agreement, and if the fabric of the outer shell, exclusive of collars, cuffs and ribbed waistbands (only if the ribbed waistband is present in combination with cuffs and identical in fabric construction to the cuffs) where applicable, is wholly of--
- (1) one or more fabrics listed in U.S. note 20 to subchapter XXII of chapter 98; or
 - (2) one or more fabrics or knit to shape components formed in the territory of one or more of the parties to the Agreement from one or more of the yarns listed in U.S. note 20 to such subchapter XXII; or
 - (3) any combination of the fabrics referred to in subdivision (B)(1), the fabrics or knit to shape components referred to in subdivision (B)(2), or one or more fabrics originating under this note.

The originating fabrics referred to in subdivision (B)(3) may contain up to 10 percent by weight of fibers or yarns that do not undergo an applicable change in tariff classification set out in subdivision (n) of this note. Any elastomeric yarn (except latex) contained in an originating fabric or knit to shape component referred to in subdivision (B)(3) must be formed in the territory of one or more of the parties to the Agreement.

- (C) A textile good of chapter 63 or 94 of the tariff schedule and imported under heading 9822.05.01 of the tariff schedule shall be considered originating if it is cut or knit to shape, or both, and sewn or otherwise assembled in the territory of one or more of the parties to the Agreement, and if the component that determines the tariff classification of the good is wholly of--
- (1) one or more fabrics listed in U.S. note 20 to subchapter XXII of chapter 98; or
 - (2) one or more fabrics or knit to shape components formed in the territory of one or more of the parties to the Agreement from one or more of the yarns listed in U.S. note 20 to such subchapter XXII; or

The originating fabrics referred to in subdivision (C)(3) may contain up to 10 percent by weight of fibers or yarns that do not undergo an applicable change in tariff classification set out in subdivision (n) of this note. Any elastomeric yarn (except latex) contained in an originating fabric or knit to shape component referred to in subdivision (C)(3) must be formed in the territory of one or more of the parties to the Agreement.

(iv) Definitions. For the purposes of this note:

- (A) The term “direct costs of processing operations” means those costs either directly incurred in, or that can reasonably be allocated to, the growth, production or manufacture of the good, including the following, to the extent they are includable in the appraised value of goods when imported into Oman or the United States, as the case may be, the following:
- (1) all actual labor costs involved in the growth, production or manufacture of the good, including fringe benefits, on-the-job training and the cost of engineering, supervisory, quality control and similar personnel;
 - (2) tools, dies, molds and other indirect materials, and depreciation on machinery and equipment that are allocable to the specific good;
 - (3) research, development, design, engineering and blueprint costs, to the extent that they are allocable to the specific good;
 - (4) costs of inspecting and testing the specific good; and
 - (5) costs of packaging the specific good for export to the territory of the other country.

The term “direct costs of processing operations” does not include costs that are not directly attributable to the good or are not costs of growth, production or manufacture of the good, such as: (I) profit, and (II) general expenses of doing business that are either not allocable to the specific good or are not related to the growth, production or manufacture of the good, such as administrative salaries, casualty and liability insurance, advertising and salesmen’s staff salaries, commissions or expenses.

- (B) The term “material” means a good, including a part or ingredient, that is used in the growth, production or manufacture of another good that is a new or different article of commerce that has been grown, produced or manufactured in Oman or of the United States, or both.
- (C) The term “material produced in the territory of Oman or of the United States, or both” means a good that is either wholly the growth, product or manufacture of Oman or of the United States, or both, or a new or different article of commerce that has been grown, produced or manufactured in the territory of Oman or of the United States, or both.
- (D) The term “new or different article of commerce” means, except as provided in this subdivision, a good that--
- (1) has been substantially transformed from a good or material that is not wholly the growth, product or manufacture of Oman, the United States, or both; and
 - (2) has a new name, character or use distinct from the good or material from which it was transformed,
- but a good shall not be considered a new or different article of commerce by virtue of having merely undergone (I) simple combining or packaging operations, or (II) mere dilution with water or another substance that does not materially alter the characteristics of the good.
- (E) The term “simple combining or packaging operations” means operations such as adding batteries to devices, fitting together a small number of components by bolting, gluing or soldering, and repacking or packaging components together.
- (F) The term “recovered goods” means materials in the form of individual parts that result from--
- (1) the complete disassembly of used goods into individual parts; and
 - (2) the cleaning, inspecting, testing or other processing of those parts as necessary for improvement to sound working condition.

- (H) The term “substantially transformed” means, with respect to a good or a material, changed as the result of a manufacturing or processing operation so that--
- (1) (aa) the good or material has multiple uses and is converted into a good with limited uses;
 - (bb) the physical properties of the good or material are changed to a significant extent; or
 - (cc) the operation undergone by the good or material is complex in terms of the number of different processes and materials involved, as well as the time and level of skill required to perform those processes; and
- (2) the good or material loses its separate identity in the resulting, new good or material.
- (v) A good shall not be considered to be imported directly into the territory of the United States from the territory of Oman for purposes of this note if the good undergoes production, manufacturing or any other operation outside the territory of Oman or of the United States, other than unloading, reloading or any other operation necessary to preserve the good in good condition or to transport the good to the territory of Oman or of the United States.
- (e) Textile and apparel articles.
- (i) Except as provided in subdivision (ii) below, a textile or apparel good that is not an originating good under the terms of this note, because certain fibers or yarns used in the production of the component of the good that determines the tariff classification of the good do not undergo an applicable change in tariff classification set out in subdivision (h) of this note, shall be considered to be an originating good if the total weight of all such fibers or yarns in that component is not more than seven percent of the total weight of that component. Notwithstanding the preceding sentence, a textile or apparel good containing elastomeric yarns in the component of the good that determines the tariff classification of the good shall be considered to be an originating good only if such yarns are wholly formed in the territory of Oman or of the United States. For purposes of this note, in the case of a textile or apparel good that is a yarn, fabric or group of fibers, the term “component of the good that determines the tariff classification of the good” means all of the fibers in the yarn, fabric or group of fibers.
 - (ii) Notwithstanding the rules set forth in subdivision (h) of this note, textile and apparel goods classifiable under general rule of interpretation 3 to the tariff schedule as goods put up in sets for retail sale shall not be considered to be originating goods unless each of the goods in the set is an originating good or the total value of the nonoriginating goods in the set does not exceed ten percent of the customs value of the set.
 - (iii) For purposes of this note, the term “textile or apparel good” means a good listed in the Annex to the Agreement on Textiles and Clothing referred to in section 101(d)(4) of the Uruguay Round Agreements Act (19 U.S.C. 3511(d)(4)).
 - (iv) For purposes of this note, the special duty rate set forth in heading 9916.99.20 of the tariff schedule for goods of chapter 61 or 62 described therein that contain textile materials enumerated in U.S. note 13 to subchapter XVI of chapter 99 shall apply to goods described in such heading 9916.99.20 and imported thereunder if such goods meet the applicable conditions of this note other than the condition that they be originating goods.
- (f) Indirect materials.
- Indirect materials shall be disregarded in determining whether a good qualifies as an originating good, except that the cost of such indirect materials may be included in meeting the 35 percent value-content requirement of subdivision (b)(ii) of this note, where applicable. An “indirect material” means a good used in the growth, production, manufacture, testing or inspection of a good but not physically incorporated into the good, or a good used in the maintenance of buildings or the operation of equipment associated with the growth, production or manufacture of a good, including--
- (i) fuel and energy;
 - (ii) tools, dies and molds;
 - (iii) spare parts and materials used in the maintenance of equipment and buildings;

- (i) the specific rule, or specific set of rules, that applies to a particular heading or subheading is set out immediately adjacent to the heading or subheading;
- (ii) a rule applicable to a subheading shall take precedence over a rule applicable to the heading which is parent to that subheading;
- (iii) a requirement of a change in tariff classification applies only to non-originating materials; and
- (iv) a reference to a "chapter" is to a chapter of the tariff schedule; a reference to a "heading" is to a provision whose article description is not indented and which is designated by 4 digits, whether or not followed by subsequent zeroes; and a reference to a "subheading" is to a provision whose article description is indented and which is designated by 6 digits, whether or not followed by subsequent zeroes.

Peru

- (A) For the build-down method, the regional value content of a good may be calculated on the basis of the formula

$$RVC = \frac{AV - VNM}{AV} \times 100$$

where RVC is the regional value content of the good, expressed as a percentage; AV is the adjusted value of the good; and VNM is the value of nonoriginating materials that are acquired and used by the producer in the production of the good, but does not include the value of a material that is self-produced.

$$RVC = \frac{NC - VNM}{NC} \times 100$$

where RVC is the regional value content of the automotive good, expressed as a percentage; NC is the net cost of the automotive good; and VNM means the value of nonoriginating materials that are acquired and used by the producer in the production of the automotive good, but does not include the value of a material that is self-produced. - (2) with respect to all motor vehicles in any such category that are exported to the territory of Peru or the United States.

- (2) is the same class of motor vehicles, and is produced in the same plant in the territory of Peru or the United States, as the good described in subdivision (B) for which regional value content is being calculated; or
- (3) is the same model line of motor vehicles produced in the territory of Peru or the United States as the good described in subdivision (B) for which regional value content is being calculated.

- (D) For purposes of determining the regional value content under subdivision (A) above for automotive materials provided for in any of subheadings 8407.31 through 8407.34, in subheading 8408.20 or in heading 8409, 8706, 8707 or 8708, that are produced in the same plant, an importer, exporter or producer may--

- (E) The importer, exporter or producer of an automotive good shall, consistent with the provisions regarding allocation of costs provided for in generally accepted accounting principles, determine the net cost of an automotive good under subdivision (B) by--

- (1) calculating the total cost incurred with respect to all goods produced by the producer of the automotive good, subtracting any sales promotion, marketing and after-sales service costs, royalties, shipping and packing costs and nonallowable interest costs that are included in the total cost of all such goods, and then reasonably allocating the resulting net cost of those goods to the automotive good;

- (2) calculating the total cost incurred with respect to all goods produced by that producer, reasonably allocating the total cost to the automotive good, and then subtracting any sales promotion, marketing and after-sales service costs, royalties, shipping and packing costs and nonallowable interest costs that are included in the portion of the total cost allocated to the automotive good; or
 - (3) reasonably allocating each cost that forms part of the total cost incurred with respect to the automotive good so that the aggregate of these costs does not include any sales promotion, marketing and after-sales service costs, royalties, shipping and packing costs or nonallowable interest costs.
- (F) For purposes of this note, the term “class of motor vehicles” means any one of the following categories of motor vehicles:

- (J) For purposes of this note, the term “total cost” means all product costs, period costs and other costs for a good incurred in the territory of Peru, the United States, or both, and does not include profits that are earned by the producer, regardless of whether they are retained by the producer or paid out to other persons as dividends, or taxes paid on those profits, including capital gains taxes.

- (N) For purposes of this note, the term “used” means utilized or consumed in the production of goods.
- (g) Accessories, spare parts or tools.
- (i) Subject to subdivision (g)(ii) and (g)(iii), accessories, spare parts or tools delivered with a good that form part of the good's standard accessories, spare parts or tools shall--

 - (B) be disregarded in determining whether all the nonoriginating materials used in the production of the good undergo the applicable change in tariff classification set out in subdivision (n) of this note.
 - (ii) Subdivision (g)(i) shall apply only if--
 - (A) the accessories, spare parts or tools are classified with and not invoiced separately from the good, regardless of whether such accessories, spare parts or tools are specified or separately identified in the invoice for the good; and

(h) Fungible goods and materials.

(i) A person claiming that a fungible good or fungible material is an originating good may base the claim either on the physical segregation of the fungible good or fungible material or by using an inventory management method with respect to the fungible good or fungible material. For purposes of this subdivision, the term "inventory management method" means:

(A) averaging,

(B) "last-in, first-out,"

(C) "first-in, first out," or

(i) Packaging or packing materials and containers.

(i) For retail sale.--Packaging materials and containers in which a good is packaged for retail sale, if classified with the good, shall be disregarded in determining whether all the nonoriginating materials used in the production of the good undergo the applicable change in tariff classification set out in subdivision (n) of this note, and, if the good is subject to a regional value content requirement, the value of such packaging materials and containers shall be taken into account as originating or nonoriginating materials, as the case may be, in calculating the regional value content of the good.

(ii) For shipment.--Packing materials and containers for shipment shall be disregarded in determining whether a good is an originating good.

(j) Indirect materials.

An indirect material shall be treated as an originating material for purposes of this note without regard to where it is produced. The term "indirect material" means a good used in the production, testing or inspection of another good but not physically incorporated into that other good, or a good used in the maintenance of buildings or the operation of equipment associated with the production of a good, including--

- (B) the purchase, cost and value of, and payment for, all materials, including indirect materials, used in the production of the good; and
- (C) the production of the good in the form in which it was exported.
- (iii) Verification.--For purposes of determining whether a good imported into the customs territory of the United States from the territory of Peru qualifies as an originating good under the provisions of this note, the appropriate customs officer may conduct a verification as set forth in pertinent regulations.

(m) Interpretation and application of rules of origin.

- (i) Unless otherwise provided herein, the requirements of any specific rule, or specific set of rules, in subdivision (n) of this note that is set out adjacent to a heading or subheading of the tariff schedule and specifies a change of tariff classification applies only to nonoriginating materials. For purposes of this subdivision and subdivision (n) of this note, a tariff provision is a "heading" if its article description is not indented; a provision is a "subheading" if it is designated by 6 digits under the Harmonized Commodity Description and Coding System; and the terms "chapter" and "section" refer to a chapter or section, respectively, of the tariff schedule.
- (ii) Where a specific rule in subdivision (n) of this note is defined using the criterion of a change in tariff classification, and the rule is written to exclude tariff provisions at the level of a chapter, heading or subheading of the tariff schedule, such rule shall be construed to require that materials classified in those excluded provisions be originating for the good to qualify as originating.
- (iii) When a heading or subheading of the tariff schedule is subject to alternative specific rules in subdivision (n) of this note, the rule will be considered to be met if a good satisfies one of the alternatives.
- (iv) When a single rule is applicable to a group of headings or subheadings, and that rule of origin specifies a change of heading or subheading, the requirement shall be interpreted so that the change of heading or subheading may occur within a single heading or subheading or between headings or subheadings of the group. When, however, a rule refers to a change in heading or subheading "outside that group," such change in heading or subheading must occur from a heading or subheading that is outside the group of headings or subheadings set out in the rule.
- (v) References to weight in the rules set forth in subdivision (n) of this note for goods provided for in chapters 1 through 24 of the tariff schedule are to dry weight, unless otherwise specified in the tariff schedule.
- (vi) For purposes of applying this note to goods of chapters 6 through 14, inclusive, agricultural and horticultural goods grown in the territory of a party shall be treated as an originating good even if grown from seeds, bulbs, rootstock, cuttings, grafts, shoots, buds or other live parts of plants imported from a non-party.
- (vii) This subdivision confers origin on the goods specified in the provisions below, except as otherwise specified herein. Notwithstanding the preceding sentence, a good is originating if it meets the applicable change in tariff classification rules specified in subdivision (n) of this note.

For purposes of applying this subdivision to goods of the foregoing chapters, a "chemical reaction" is a process (including a biochemical process) that results in a molecule with a new structure by breaking intramolecular bonds and by forming new intramolecular bonds, or by altering the spatial arrangement of atoms in a molecule. The following are not considered to be chemical reactions for purposes of determining whether a good is originating:
- (1) dissolution in water or in another solvent;
 - (2) the elimination of solvents, including solvent water; or
 - (3) the addition or elimination of water of crystallization.
- (B) For the purposes of chapters 28 through 40, a good that is subject to purification shall be treated as originating provided that one of the following occurs in the territory of Peru, the United States, or both:

 - (2) the purification results in the reduction or elimination of impurities, rendering the good suitable:
 - (I) as a pharmaceutical, medicinal, cosmetic, veterinary or food grade substance;
 - (II) as a chemical product or reagent for analytical, diagnostic or laboratory uses;
 - (III) as an element or component for use in micro-elements;

- (D) A good of chapter 30, 31, 33 or 39 shall be treated as originating if the deliberate and controlled reduction in particle size of a good, including micronizing by dissolving a polymer and subsequent precipitation, other than by merely crushing or pressing, resulting in a good having a defined particle size, defined particle size distribution or defined surface area, which is relevant to the purposes of the resulting good and have different physical or chemical characteristics from the input materials occurs in the territory of Peru, the United States, or both
- (E) A good of chapters 28 through 38 shall be treated as originating if the production of standards materials occurs in the territory of Peru, the United States, or both. For purposes of this subdivision, "standards materials" (including standards solutions) are preparations suitable for analytical, calibrating or referencing uses, having precise degrees of purity or proportions that are certified by the manufacturer.
- (F) A good of chapters 28 through 39 shall be treated as originating if the isolation or separation of isomers from mixtures of isomers occurs in the territory of Peru, the United States, or both.
- (G) A good of chapters 28 through 38 that undergoes a change from one tariff classification to another in the territory of Peru, the United States, or both, as a result of the separation of one or more individual materials from a man-made mixture shall not be treated as originating unless the isolated material underwent a chemical reaction in the territory of Peru, the United States, or both.
