EMERGENCY MANAGEMENT & ROBOTICS
FOR HAZARDOUS ENVIRONMENTS

9-12 March 2008
Albuquerque, New Mexico

Call for Participation

Workshop on Robots for Emergency Response
March 9, 2008

This workshop will feature talks pertaining to the application of robots to various facets of emergency response. The applications can include, but are not limited to, urban search and rescue, bomb-disposal or other explosive mitigation, hazardous material inspection and cleanup. Although the requirements for using robots in these different applications vary, there are some common areas of technology that could be shared.

This workshop's goals are:
- dissemination of research in response robotics of various types
- establishment of common operational environment characteristics or requirements to guide development of technologies and of performance measures
- promoting dialogue between technology developers and responders from various backgrounds to stimulate greater progress

Workshop Organizers:
Elena Messina
National Institute of Standards and Technology
elena.messina@nist.gov

Adam Jacoff
National Institute of Standards and Technology
adam.jacoff@nist.gov

Raj Madhavan
National Institute of Standards and Technology and Oak Ridge National Laboratory
raj.madhavan@nist.gov
