Name: Kelly Snook

Title: Astrobiologist (Aerospace Engineer, Planetist)

What I do: I study Mars! I use spacecraft instruments and computers to model the dusty atmosphere of Mars, and I work with scientists and engineers to study places on Earth that might teach us how to explore and someday live on Mars.

Education: Ph.D. in Aeronautics & Astronautics M.S. in Aeronautics & Astronautics B.S. in Aerospace Engineering

Experience: seven years of research and one-and-one-half years of structural dynamics work

Skills: working with people, science (quantum physics and cosmology), computers (information technology)

Interests: scuba diving, music composition, travel, being outdoors, religion

"Imagination is more important than knowledge." - Albert Einstein
