

LANDSCAPE PLANTS

The Approved Plant List includes over 250 plants that are native to Hawaii and non-native. Although these plants are either readily available commercially or are known to be economically feasible to commercially cultivate, nursery growers should be consulted on plant size and quantity availability, prior to the specification of such plants.

Care must be taken to select the appropriate native plant for the right condition and location. Some native plants are more suited for use as specimens or accent rather than in mass plantings.

The Approved Plant List is not exclusive. **ANY PLANT NOT IDENTIFIED ON THE APPROVED NATIVE/NON NATIVE PLANT LISTS AND PROHIBITED PLANT LIST, MUST BE REVIEWED AND APPROVED BY THE MCBH KANEHOE ENVIRONMENTAL DEPARTMENT.** It is strongly recommended using the assistance of a licensed landscape architect in the State of Hawaii in selecting plants appropriate to the each MCBH installation to ensure the size and installation of plant material is given so the plants selected will have an increased chance of survival. The landscape architect must use his/her personal judgment in selecting the appropriate materials for each specific situation.

Native Plants:

Native plants are those that arrived to a location on their own, typically by 'wind, water or wing.' Native plants that evolved into species unique to a single location are considered endemic. Indigenous plants are those found naturally in multiple locations. Native plants have adapted to survive in harsh and often inhospitable conditions. They often require less water, care and maintenance. They are also an important part of a region's biological and cultural heritage. This is particularly true in Hawaii where native plants were used for food, cordage, medicine, clothing, and construction. The use of native plants in ornamental landscapes encourages cultivation, which in turn helps prevent extinction of species.

A Presidential Memorandum, released on April 26, 1994, directs federal agencies, "where cost effective and to the extent practicable, to use regionally native plants for landscaping", along with employing landscape practices that conserve water and prevent pollution. Similarly, a State of Hawaii law (HRS 103D-408) requires the State to incorporate indigenous and Polynesian-introduced plants into its landscaping projects whenever and wherever feasible.

Native plants that are appropriate for landscaping in one location may not be appropriate in another. Plant native plants in conditions similar to where they would naturally be found. To ensure native plants in their wild habitat are protected and perpetuated, plants should be acquired from nurseries, growers and landscape contractors that are familiar with the laws and ethics associated with the cultivation of native plants.

Polynesian Introductions:

Approximately 33 species of plants were brought to Hawaii by Polynesian voyagers in their canoes. These plants are not native but introduced species, although many have been here for over 1,000 years. These plants are an integral part of the Hawaiian culture, like Native Plants as they were used for life's daily needs. As with native species, these introduced plants are adapted to Hawaii's environment. However, plants that are appropriate in one location may not be appropriate in another. It is best to plant Polynesian-introduced species in conditions similar to where they would naturally be found.

Invasive Species:

Alien plants seriously threaten Hawaii's unique native flora and ecosystem. These plants smother native vegetation, displacing native species or preventing their reestablishment.

Executive Order 13112, Invasive Species (3 February 1999) seeks to prevent the introduction of invasive species and provides for their control to minimize the economic, ecological and human health impacts caused by invasive species. Federal agencies are required, to the extent practicable and permitted by law, to prevent the introduction of invasive species, to control their populations, to restore native species and habitat in ecosystems that have been invaded, and to promote public education on invasive species.

The State of Hawaii Department of Land & Natural Resources (DLNR), Division of Forestry & Wildlife's (DOFAW) list of "Hawaii's Most Invasive Horticultural Plants" and the Oahu Invasive Species Committee (OISC), the Hawaii-Pacific Weed Risk Assessment, and the most current version of the Landscape Industry Council of Hawaii's Invasive Plant List should be consulted, when selecting plant material for a project.

LANDSCAPE PLANTS (Approved Plant Material List-Native and Polynesian Introduced)

Any plant considered for any landscape project not identified on the Approved Native/Non Native Plant Lists and Prohibited Plant List, must be reviewed and approved by the MCB Hawaii Kaneohe Bay Environmental Department.

BOTANICAL NAME	COMMON NAME
Trees:	
Acacia auriculiformis	Darwin Black Wattle
Acacia confusa	Formosan Koa
Acacia crassicarpa	Northern Wattle
Acacia holosericea	Candelabra Wattle
Acacia longifolia	Sydney Golden Wattle
Acacia mangium	Mangium
Acacia mearnsii	Black Wattle
Acacia melanoxylon	Australian Blackwood
Acacia nilotica	Gum Arabic Tree
Acacia parramattensis	Green Wattle
Acacia stenophylla	Shoestring Acacia
Ailanthus altissima	Tree of Heaven
Araucaria columnaris	Cook Pine
Araucaria heterophylla	Norfolk Island Pine
Bucida buceras	Jucaro, Geometry Tree
Buddleia madagascariensis	Smokebush
Caesalpinia decapetala	Cat's Claw
Castilla elastica	Panama Rubber Tree
Casuarina equisetifolia	Ironwood
Cecropia obtusifolia	Trumpet Tree
Cecropia peltata	Trumpet Tree
Chrysophyllum oliviforme	Satin Leaf
Cinnamomum camphora	Camphor Tree
Cinnamomum verum	Cinnamon Tree
Citharexylum spinosum	Fiddlewood
Citrus hystrix	Kaffir Lime
Clusia rosea	Autograph Tree
Coccoloba uvifera	Sea Grape
Conocarpus erectus	Silver Buttonwood
Enterolobium cyclocarpum	Earpod
Erythrina variegata 'Tropic Coral'	Vertical Wiliwili
Eucalyptus spp.	Eucalyptus
Euphorbia pulcherrima	Poinsettia
Euphorbia tirucalli	Pencil Plant
Falcataria moluccana	Albizia
Ficus benghalensis	Indian Banyan
Ficus deltoidea	Mistletoe Fig
Ficus elastica	False Rubber Tree
Ficus lyrata	Fiddleleaf Fig
Ficus microcarpa	Chinese Banyan
Ficus religiosa	Bodhi Tree
Filicium decipiens	Fern Tree
Grevillea robusta	Silk Oak
Jatropha curcus	Jatropha
Jatropha multifida	Coral Plant
Jatropha pandurifolia	Rose Flowered Jatropha
Lycium chinense	Chinese Desert Thorn
Macaranga mappa	Bingabing
Medinilla cumingii	Medinilla
Melaleuca quinquenervia	Paperbark
Melia azedarach	Chinaberry
Melochia umbellata	Gunpowder Tree

LANDSCAPE PLANTS (**Prohibited Plant Material List**)

THE FOLLOWING PLANTS ARE PROHIBITED ABOARD ANY MCB HAWAII INSTALLATION.
