

## Example Information Collected for Statistical Purposes

Below is an example of the information collected based on a standard request for a World Wide Web document:

**xxx.yyy.com** - - [28/Jan/1997:00:00:01 -0500]  
"GET /sitename/news/nr012797.html HTTP/1.0" 200 16704 Mozilla 3.0

**xxx.yyy.com** -- this is the "host name" of the requester (you as the visitor). In this case, (...com) the requester is coming from a commercial address instead of a military or educational institution address.

**[28/Jan/1997:00:00:01 -0500]** -- this is the date and time of the request

**"GET /sitename/news/nr012797.html HTTP/1.0"** -- this is the location of the requested file

**200** -- this is the status code - 200 is OK - the request was filled

**16704** -- this is the size of the requested file in bytes

**Mozilla 3.0** -- this identifies the type of browser software used to access the page, which indicates what design parameters to use in constructing the pages

Similar information is gathered using "Cookies". Cookies are used for session identification rather than the individual IP Address to more accurately chart a user's activity.

**Client IP Username**  
username.usace.army.mil

**Headers Host**  
webmaster...usace.army.mil

**vars.auth-user**  
**SysDate**  
21/May/1997:15:46:21 +0100

**reqpb.clf-request**  
"GET / HTTP/1.0"

**srvhdrs.clf-status**  
200

**srvhdrs.content-length**  
2343

**headers.referer**  
-

**headers.user-agent**

**Mozilla/4.0b4 [en] (Win95; I)**

**headers.egCookie**

-

Requests for other types of documents use similar information. No other user-identifying information is collected. If you have any questions or comments about the information presented here, please forward them to:
