**AMENDMENT TO DEFENSE APPROPRIATIONS BILL
OFFERED BY MR. FATTAH OF PENNSYLVANIA**

In the Committee Report, at the appropriate place under the heading "Defense Health Program", insert the following:

1 FEDERAL NEUROSCIENCE WORKING GROUP
2 The Committee is aware that the Office of Science
3 and Technology Policy, within the Executive Office of the
4 President, is establishing an interagency working group
5 under the auspices of the National Science and Tech-
6 nology Council (NSTC) to coordinate investments in neu-
7 roscience research across the Federal Government and le-
8 verage the potential for significant, transformative ad-
9 vances in our fundamental understanding of learning,
10 brain development, and brain health and recovery. The
11 goal of the working group is to help coordinate, focus, and
12 enhance Federal efforts related to neuroscience, including
13 efforts to develop future clinical treatments for traumatic
14 and acquired brain injuries; increase our understanding
15 of cognition and apply that knowledge to the improvement
16 of education and learning; and improve our understanding
17 of, and develop better therapies for, neurodegenerative dis-
18 eases, childhood developmental disorders, and other neuro-

- 1 logical conditions. The Committee supports the activities
- 2 of the NSTC Neuroscience Working Group and urges the
- 3 Department of Defense to play an active role in it.

DEF / HONDA
AMENDMENT TO REPORT

AGREED TO
VV

AMENDMENT TO THE DEFENSE APPROPRIATIONS BILL

OFFERED BY MR. HONDA OF CALIFORNIA

At the appropriate place in the committee report under the heading "Semiconductor Industry", insert the following:

"The committee is concerned about the ability of the United States to maintain its global leadership in the production of semiconductor manufacturing equipment. In order to ensure U.S. dominance in this critical technology sector and that the Department of Defense has long-term, reliable domestic access to the most advanced technologies to manufacture and service next generation semiconductor fabrication technology, the committee directs the Department of Defense to submit a report to the congressional defense committees, not later than 90 days after enactment of this Act, on its plans to ensure leadership in the next generation of 450mm semiconductor fabrication equipment manufacturing technology in the United States."

**AMENDMENT TO DEFENSE APPROPRIATIONS BILL
OFFERED BY MR. LATOURETTE OF OHIO**

In the Committee Report, at the appropriate place under the heading "Research, Development, Test and Evaluation, Air Force", insert the following:

"The Committee notes that, since 2001, Congress has appropriated funds to develop new technologies and techniques to decontaminate complex weapons systems and related equipment to protect against the threat of contamination by chemical or biological agents. Although system components have been developed to deliver decontamination technologies in a variety of environmental and field conditions, the Committee is concerned that no funding was requested for fiscal year 2013 to further Joint Strike Fighter (JSF) decontamination system development, begin system integration, and complete system validation. As a mission critical system, the F-35 is required by Department of Defense policy to be survivable in chemical, biological, radiological, and nuclear (CBRN) environments. Accordingly, the Committee directs the Air Force to make as a high priority investments in technologies that will ensure the safety of pilots in potentially contaminated environments, and to ensure that funding

for such investments is adequately phased to support CBRN survivability requirements for the JSF and other mission critical systems.”
