

## Orbital Debris Quarterly News Articles

(excluding abstracts, meeting reports, launch tables, and box scores)

*Vol. 17, Issue 1* Upper Stage Explosion Places LEO Satellites at Risk  
Another Debris Avoidance Maneuver for the ISS  
APPEL Releases Orbital Debris iBook  
An Update of the FY-1C, Iridium 33, and Cosmos 2251 Fragments  
GRAIL Spacecraft Impact Moon in Accordance with OD Mitigation Requirements

---

*Vol. 16, Issue 4* NASA Sends Centaur Stage to Watery Grave  
New Russian Launch Failure Raises Breakup Concern  
Origin of the Inter-Agency Space Debris Coordination Committee (IADC)  
An Update on the Effectiveness of Postmission Disposal in LEO  
Detection of Optically Faint GEO Debris

*Vol. 16, Issue 3* Dr. John W. Lyver, IV, Retires as NASA Program Executive for Orbital Debris  
Status of Three Major Debris Clouds  
Development of DRAGONS – an MMOD Impact Sensor System  
15<sup>th</sup> Annual NASA/DoD OD Working Group Meeting  
The First NASA Orbital Debris Workshop  
Coring the WFPC2 Radiator for Impact Trace Residue Assessment

*Vol. 16, Issue 2* Increase in ISS Debris Avoidance Maneuvers  
Orbital Debris Discussions at the UN  
Controlling Rocket Body Reentry Risks  
Stranded Satellite Sent on Controlled Reentry  
Reentry of Explorer 8 Satellite  
Chinese Rocket Body Explosions Continue  
French Launch Vehicle Debris Lands in Brazil  
On the Probability of Random Debris Reentry Occurring on Land or Water, Part II  
Simulation of Micron-Sized Debris Populations in LEO

*Vol. 16, Issue 1* Only a Few Minor Satellite Breakups in 2011  
Two Derelict NOAA Satellites Experience Anomalous Events  
Smallsat Deployments Done Right  
TDRS and GOES Spacecraft Sent to Graveyard Orbits  
Recent Disposal of JAXA Akari Satellite  
Increasing Solar Activity Aids Orbital Debris Environment  
On the Probability of Random Debris Reentry Occurring on Land or Water

---

*Vol. 15, Issue 4* Reentry of NASA Satellite  
ERS-2 Maneuvered Into Shorter-lived Disposal Orbit  
AIAA Position Paper on Space Debris: 30 Years On  
DoD-NASA Orbital Debris Removal Workshop  
HIMS at NASA's 2011 Desert Research and Technologies Studies  
Proper Implementation of the 1998 NASA Breakup Model

*Vol. 15, Issue 3* International Space Station Again Dodges Debris  
New Evidence of Particle Impact on Jason-1 Spacecraft  
Reentry of U.S. Rocket Stage over South America  
Fiftieth Anniversary of First On-Orbit Satellite Fragmentation  
MMOD Impacts on ISS Airlock Shields  
A Note on Active Debris Removal

*Vol. 15, Issue 2* United Nations Discusses Space Debris and Long-Term Sustainability of Activities in Outer Space  
14th NASA/DoD Orbital Debris Working Group Meeting  
NASA/DoD Meeting on Active Debris Removal  
Kessler Receives 2011 Dirk Brouwer Award  
Russian Launch Vehicle Stage Reenters Over U.S.  
U.S. Commercial Earth Observation Spacecraft Executes Controlled Reentry  
New Chapter on Space Waste  
An Update on LEO Environment Remediation with Active Debris Removal  
Simulation of Micron-Sized Debris Populations in LEO

*Vol. 15, Issue 1* International Space Station Avoids Debris from Old NASA Satellite  
New Satellite Fragmentations Add to Debris Population  
Canadian Space Agency Becomes Newest Member of IADC  
NRC Review of the NASA MMOD Programs  
ISS Solar Array Guidewire MMOD Damage  
Challenges in Interpreting HST Impact Features

---

*Vol. 14, Issue 4* Reentries of GeneSat-1 and ICESat Spacecraft  
Unusual Satellite Fragmentation  
Chinese Debris Reaches New Milestone  
New NASA Course on Orbital Debris  
Habitat Particle Impact Monitoring System (HIMS)  
Comparison of ORSAT and SCARAB Reentry Codes for a Generic Satellite

*Vol. 14, Issue 3* New U.S. National Space Policy Cites Orbital Debris  
Disposal of TDRS-1  
Top Ten Satellite Breakups  
Drifting in GEO  
Measurements of the Orbital Debris Environment by the Haystack & HAX Radars During FY2007  
Overview of Orbital Debris Optical Measurements via Laboratory Techniques

*Vol. 14, Issue 2* Orbital Debris Success Story – A Decade in the Making  
Old and New Satellite Breakups Identified  
Update on Three Major Debris Clouds  
MMOD Inspection of the HST Bay 5 Multi-Lyer Insulation Panel  
Small Debris Observations from the Iridium 33/Cosmos 2251 Collision

*Vol. 14, Issue 1* NASA and DARPA Sponsor International Debris Removal Conference  
Avoiding Satellite Collisions in 2009  
MMOD Inspection of the HST Wide Field Planetary Camera 2 Radiator Update  
Shielding Against Micrometeoroid and Orbital Debris Impact with Metallic Foams  
An Updated Assessment of the Orbital Debris Environment in LEO

---

*Vol. 13, Issue 4* Thirtieth Anniversary of the NASA Orbital Debris Program Office  
International Conference on Orbital Debris Removal  
Old Spacecraft Suffers Minor Fragmentation  
Two Old Spacecraft Successfully Retired  
ORDEM2010 Beta Release  
2006 GEO Environment for ORDEM2010  
A 3-Year Summary of GEO “Survey and Chase” and Photometric Measurements with Two-Telescope Observations

- Vol. 13, Issue 3* Congressional Hearing Held on Orbital Debris and Space Traffic  
United Nations' COPUOS Receives Update on Iridium-Cosmos Collision  
MMOD Inspection of the HST WFPC2 Radiator  
Reentry Survivability Analysis of GPM Spacecraft  
Update on Recent Major Breakup Fragments
- Vol. 13, Issue 2* Satellite Collision Leaves Significant Debris Clouds  
ISS Crew Seeks Safe Haven during Debris Flyby  
Minor March Satellite Break-Up  
STS-126 Shuttle Endeavour Window Impact Damage
- Vol. 13, Issue 1* New Debris Seen from Decommissioned Satellite with Nuclear Power Source  
Fengyun-1C Debris: Two Years Later  
The ESA's ATV-1 Reentry Event  
Two New Microsatellite Impact Tests  
Review of Different Solar Cycle 24 Predictions  
Don Kessler Wins Space Safety Pioneer Award
- 

- Vol. 12, Issue 4* ISS Maneuvers to Avoid Russian Fragmentation Debris  
Eighteen-Year-Old Solid Rocket Motor Casing Found  
NASA's OD Chief Scientist Receives Awards  
Publication of the Handbook for Limiting Orbital Debris  
A New MMOD Sensor Resistive Grid Detector  
Stabilizing the Future LEO Debris Environment
- Vol. 12, Issue 3* The Multiple Fragmentations of Cosmos 2421  
William (Bill) Rochelle  
ISS Hand Rail and Extravehicular Activity Tool Impact Damage  
Haystack Radar Observations of Debris from the Fengyun-1C Antisatellite Test
- Vol. 12, Issue 2* Satellite Breakups During First Quarter of 2008  
Annual Space Debris Meeting at the UN  
11th NASA-DoD ODWG Meeting  
Publication of Final and Yearly CDT Reports  
DAS Update  
Publication of 14th Edition of History of On-Orbit Satellite Fragmentations  
Physical Properties of Large Fengyun-1C Breakup Fragments  
NASA's New Engineering Model ORDEM2008
- Vol. 12, Issue 1* Two Minor Fragmentations End Worst Debris Year Ever  
Fengyun-1C Debris: One Year Later  
STS-118 Radiator Impact Damage  
Debris Assessment Software 2.0 Now Available  
Seasonal Variations of the MODEST Data  
Measurement of Satellite Impact Fragments
- 

- Vol. 11, Issue 4* New NASA Procedural Requirement and Technical Standard for Limiting Orbital Debris  
Generation  
Another Collision Avoidance Maneuver Made by NASA Satellite  
Two Minor Satellite Fragmentations Identified in the Third Quarter  
ISS Zarya Control Module Impact Damage  
Three New Satellite Impact Tests  
A Preliminary Active Debris Removal Study

- Vol. 11, Issue 3* UN Committee Accepts Space Debris Mitigation Guidelines  
Investigation of MMOD Impact on STS-115 Shuttle Payload Bay Door  
Optical Observations of GEO Debris with Two Telescopes  
Optical Measurement Center Status
- Vol. 11, Issue 2* United Nations Adopts Space Debris Mitigation Guidelines  
Chinese Anti-satellite Test Creates Most Severe Orbital Debris Cloud in History  
Four Satellite Breakups in February Add to Debris Population  
The NASA Liquid Mirror Telescope  
Strategy for Detection of Eccentric Objects In or Near the Geosynchronous Region
- Vol. 11, Issue 1* Orbital Debris Mitigation Re-emphasized in the New U.S. National Space Policy  
Significant Increase in Satellite Breakups During 2006  
Delta IV Performs Successful Controlled Reentry  
Publication of the 2003 Haystack and HAX Radar Report  
A New Analysis on the Size Estimation Model Pieces  
Risk to LEO Spacecraft Due to Small Particle Impacts

- 
- Vol. 10, Issue 4* Three More Satellites Involved in Fragmentations  
John L. Africano  
Ground Truth Measurements of the FORMOSAT III Spacecraft  
Debris Flux Comparisons from the Haystack Radar Prior, During, and After the Last  
Solar Maximum

- Vol. 10, Issue 3* First Satellite Breakups of 2006  
ISS Large Area Debris Collector (LAD-C) Update  
STS-114 Micrometeoroid/Orbital Debris (MMOD) Post-Flight Assessment  
New Satellite Impact Experiments  
Detection of Small GEO Debris with MODEST Data Using an Automatic  
Detection Algorithm

- Vol. 10, Issue 2* Instability of the Current Orbital Debris Population  
Draft United Nations space Debris Mitigation Guidelines  
Disposal of Geosynchronous Spacecraft in 2005  
Flux Comparisons from the Goldstone, Haystack, and HAX Radars  
Modeling the Effect of High Solar Activity on the Orbital Debris Environment  
Orbital Debris Photometric Study  
Developing a Mass Density Distribution for Breakup Debris

- Vol. 10, Issue 1* Collision Avoidance Maneuver Performed by NASA's Terra Spacecraft  
ERBS and UARS Spacecraft Complete Postmission Disposal Activities  
Large Area Debris Collector (LAD-C) Update  
Revision of Space Shuttle Wing Leading Edge Reinforced Carbon-Carbon Failure  
Criteria Base on Hypervelocity Impact and Arc-Jet Testing  
Object Reentry Survivability Analysis Tool (ORSAT) – Version 6.0  
Disposal of Globalstar Satellites  
Disposal of GPS Spacecraft

- 
- Vol. 9, Issue 4* The Orbital Debris Community Loses One of its Pioneers  
Two NASA Spacecraft to be Retired; Debris Mitigation Plans Being Implemented  
Real-time Survey and Follow-up Observations of GEO Debris  
Reentry Survivability Analysis of the Terra Satellite  
Progress in Space Tether Sever Modeling

- Vol. 9, Issue 3    Space Debris Mitigation Guidelines at the UN  
 Recent Satellite Breakups  
 SBRAM Upgrade to Version 2.0  
 The GEO Environment as Determined by the CDT: Inclination Distributions  
 Michigan Orbital Debris Survey Telescope (MODEST) Results  
 A New Low-Velocity Satellite Impact Experiment
- Vol. 9, Issue 2    Accidental Collisions of Cataloged Satellites Identified  
 Another NAVSTAR PAM-D Recovered after Reentry  
 Annual United Nations Meeting on Space Debris  
 Recent Satellite Breakup  
 2005 NASA/DoD Orbital Debris Working Group Meeting  
 Enhancement of Space Shuttle Models Used in BUMPER Micrometeoroid and Orbital  
 Debris Risk Analysis  
 A Bayesian Approach of Size Estimation for Haystack and HAX Radar Cross Section  
 Observations  
 No Fire from the Dragon this Year
- Vol. 9, Issue 1    Modeling and Monitoring the Decay of NASA Satellites  
 Recent Satellite Breakups  
 NASA Orbital Debris Program Office Hosting IADC Website  
 Haystack Orbital Debris Radar Measurements Update  
 Varying Solar Flux Models and their Effect on the Future Debris Environment Projection  
 ST9 Solar Sail – A Potential Meteoroid and Orbital Debris Sensor
- 
- Vol. 8, Issue 4    Recent Satellite Breakups  
 Burton G. Cour-Palais, 18 April 1925-20 July 2004  
 Reentry Survivability Analysis of the Hubble Space Telescope (HST)  
 An Assessment of the Role of Solid Rocket Motors in the Generation of Orbital Debris  
 Searching for Faint Debris in the GEO Ring  
 Historical Small Debris Collision Activities
- Vol. 8, Issue 3    FUSE Satellite Releases Unexpected Debris  
 Publication of the 13<sup>th</sup> Edition of *History of On-Orbit Satellite Fragmentations*  
 FCC Issues New Orbital Debris Mitigation Regulations  
 Annual Meeting of the IADC  
 A Debris Avoidance Feasibility Study for Robotic Satellites  
 PINDROP – An Acoustic Particle Impact Detector  
 Utilizing the Ultra-Sensitive Goldstone Radar for Orbital Debris Measurements  
 Orbital Evolution of GEO Debris with Very High Area-to-Mass Ratios  
 Mitigating Orbital Debris via Space Vehicle Disposals  
 Publication of the NASA Orbital Debris Informational CD
- Vol. 8, Issue 2    Rocket Body Debris Falls in Argentina  
 Fragmentation of Cosmos 2383  
 Publication of the 1999-2002 Haystack/HAX Report  
 NASA AMOS Spectral Study (NASS) Project Update  
 Working Toward an Albedo Distribution Model: SiBAM – Size-Based Albedo Model  
 A LEO Mitigation Study on the Duration of Spacecraft Lifetime and Postmission  
 Disposal Success Rate  
 Estimation of  $\geq 1$  cm Debris Flux Uncertainty in LEO  
 Reentry Survivability Analysis of Gamma-ray Large Area Space Telescope  
 (GLAST) Satellite  
 How to Calculate the Average Cross Sectional Area
