PROGRAMS  
RSA SENIOR MANAGEMENT TEAM

SUBJECT: Dissemination of the publication entitled: Achieving Successful  
Employment Outcomes With the Use of Technology, developed by the  
Twenty-Fourth Institute on Rehabilitation Issues (IRI).

CONTENT: The purpose of this Information Memorandum (IM) is to transmit the  
enclosed publication to vocational rehabilitation (VR) professionals,  
advocates and other interested persons. The publication was developed in  
partnership with individuals representing various State VR programs, the  
Regional Rehabilitation Continuing Education Programs (RRCEPs) and  
the Rehabilitation Services Administration (RSA). Dr. Daniel McAlees,  
Director of the University of Wisconsin-Stout Regional Rehabilitation  
Continuing Education Program, served as the facilitator for the study  
group, and Ms. Peggy Anderson, Rehabilitation Supervisor, Alabama  
Department of Rehabilitation Services, served as chairperson.

We recommend that the IRI publication be brought to the attention of  
personnel responsible for, or interested in, human resource development  
and staff training for use in planning, implementing and assessing the  
effectiveness of training on this topic. The *IRI* publications are widely  
used by VR counselors and supervisors, human resource development  
specialists, community-based rehabilitation service providers,  
administrators, researchers, educators and policy analysts in fulfilling the  
purposes of the Rehabilitation Act, as amended, particularly, "... to  
empower individuals with disabilities to maximize employment, economic

self-sufficiency, independence, and inclusion and integration into society...".

An important part of RSA's mission is to provide training and technical assistance to State VR agencies on the problems facing rehabilitation service providers, and to disseminate and promote the utilization of knowledge resulting from current research. Through the *IRI*, high priority training needs are responded to expeditiously, and the study findings on a specific topic are quickly transposed into useful and usable training materials and publications.

Improving the skills of personnel in the Public VR program through effective training is a basic function of RSA's RRCEPs. RSA funds the following three RSA RRCEPs to serve as prime study group coordinators for developing the three publications: the University of Arkansas; George Washington University; and, the University of Wisconsin-Stout.

Additional copies of this publication, or copies in alternate formats, may be obtained by contacting Ms. Jean Davis:
