(ii) (A) For the purposes of subdivision (i)(K), the term "recovered goods" means materials in the form of individual parts that are the result of--
(1) the disassembly of used goods into individual parts; and
(2) the cleaning, inspecting, testing or other processing that is necessary for improvement to sound working condition of such individual parts.
(B) The term "remanufactured good" for purposes of this note means a good that is classified under chapter 84, 85,87 or 90 or heading 9402 , other than a good classified under heading 8418 or 8516 , and that--

(d) Textile and apparel articles.
(i) For purposes of this note, a textile or apparel good provided for in chapters 42,50 through 63,70 and 94 of the tariff schedule is an originating good if:
(A) each of the nonoriginating materials used in the production of the good undergoes an applicable change in tariff classification specified in subdivision (o) of this note as a result of production operations occurring entirely in the territory of Panama or of the United States, or both, or the good otherwise satisfies the applicable requirements of this note where a change in tariff classification is not required, and
(B) the good satisfies any other applicable requirements of this note.

The provisions of subdivision (o) of this note shall not apply in determining the country of origin of a textile or apparel good for nonpreferential purposes.
(ii) Subject to the provisions of subdivision (d)(v) below, a textile or apparel good that is not an originating good under the terms of this note because certain fibers or yarns used in the production of the component of the good that determines the tariff classification of the good do not undergo an applicable change in tariff classification, set out in subdivision (o) of this note, shall nonetheless be considered to be an originating good if--
(A) the total weight of all such fibers or yarns in that component is not more than 10 percent of the total weight of that component; or
(B) the good contains nylon filament yarn (other than elastomeric yarn) that is classifiable under subheading $5402.11 .30,5402.11 .60,5402.19 .30,5402.19 .60,5402.31 .30,5402.31 .60,5402.32 .30,5402.32 .60$, $5402.45 .10,5402.45 .90,5402.51 .00$ or 5402.61 .00 of the tariff schedule and that is a product of Israel, Canada or Mexico.

Notwithstanding the preceding sentence, a textile or apparel good provided for in the tariff schedule chapters enumerated in subdivision (d)(i) and containing elastomeric yarns in the component of the good that determines the tariff classification of the good shall be considered to be an originating good only if such yarns are wholly formed and finished in the territory of Panama or of the United States, or both. For purposes of this note, the term "elastomeric yarns" does not include latex.
(iii) For purposes of this subdivision, in the case of a good that is a fabric, yarn or fiber, the term "component of the good that determines the tariff classification of the good" means all of the fibers in the good.
(iv) Notwithstanding the rules set forth in subdivision (o) of this note, textile or apparel goods classifiable as goods put up in sets for retail sale under general rule of interpretation 3 of the tariff schedule shall not be considered to be originating goods unless (A) each of the goods in the set is an originating good; or (B) the total value of the nonoriginating goods in the set does not exceed 10 percent of the adjusted value of the set.
(v) For purposes of this note-
(A) the expression "wholly formed and finished" means:
(1) when used in reference to fabrics, all production processes and finishing operations necessary to produce a finished fabric ready for use without further processing, and such processes and operations include formation processes, such as weaving, knitting, needling, tufting, felting, entangling or other such processes, and finishing operations, including bleaching, dyeing and printing; and
(2) when used in reference to yarns, all production processes and finishing operations, beginning with the extrusion of filaments, strips, film or sheet, and including drawing to fully orient a filament or slitting a film or sheet into strip, or the spinning of all fibers into yarn, or both, and ending with a finished yarn or plied yarn.
(B) with respect to a textile or apparel good provided for in the tariff schedule chapters enumerated above, the term "wholly" means that the good is entirely of the named material.
(vi) Textile or apparel goods of Panama provided for in chapters 61 through 63 or subheading 9404.90 of the tariff schedule that are not originating goods under the terms of this note shall be eligible for the duty treatment set forth in heading $\mathbf{9 8 2 2 . 0 9 . 6 1}$ under the terms of the U.S. note applicable thereto.
(e) De minimis.
(i) Except as provided herein and in subdivision (ii) below, a good (other than a textile or apparel good described in subdivision (d) above) that does not undergo a change in tariff classification pursuant to subdivision (o) of this note is an originating good if-
(A) the value of all nonoriginating materials that are used in the production of the good and that do not undergo the applicable change in tariff classification set forth in subdivision (o) of this note does not exceed 10 percent of the adjusted value of the good;

## Annex I

-7-
(B) the value of such nonoriginating materials is included in the value of nonoriginating materials for any applicable regional value-content requirement for the good under this note; and
(C) the good meets all other applicable requirements of this note.

Notwithstanding subdivisions (i)(A) through (C) above and the rules set forth in subdivision (o) of this note, goods (other than textile or apparel goods) classifiable as goods put up in sets for retail sale under general rule of interpretation 3 of the tariff schedule shall not be considered to be originating goods unless (1) each of the goods in the set is an originating good; or (2) the total value of the nonoriginating goods in the set does not exceed 15 percent of the adjusted value of the set.
(ii) Subdivision (e)(i) does not apply to-
(A) a nonoriginating material provided for in chapter 4, or a nonoriginating dairy preparation containing over 10 percent by weight of milk solids provided for in subheading 1901.90 or 2106.90 , that is used in the production of a good provided for in chapter 4;
(B) a nonoriginating material provided for in chapter 4, or a nonoriginating dairy preparation containing over 10 percent by weight of milk solids provided for in subheading 1901.90, that is used in the production of any of the following goods:
(1) infant preparations containing over 10 percent by weight of milk solids provided for in subheading 1901.10;

(i) For purposes of this note, originating materials from the territory of Panama or the United States that are used in the production of a good in the territory of the other country shall be considered to originate in the territory of such other country.

## Annex I

-8-
(ii) A good that is produced in the territory of Panama or of the United States, or both, by one or more producers, is an originating good if the good satisfies all of the applicable requirements of this note.
(g) Regional value content.
(i) For purposes of subdivision (b)(ii)(B) of this note, the regional value content of a good referred to in subdivision (o) of this note, except for goods to which subdivision (h) applies, shall be calculated by the importer, exporter or producer of the good, on the basis of the build-down method described in subdivision $(\mathrm{g})(\mathrm{i})(\mathrm{A})$ or the build-up method described in $(\mathrm{g})(\mathrm{i})(\mathrm{B})$ below.
(A) For the build-down method, the regional value content of a good may be calculated on the basis of the formula $\mathrm{RVC}=((\mathrm{AV}-\mathrm{VNM}) / \mathrm{AV}) \times 100$, where RVC is the regional value content, expressed as a percentage; AV is the adjusted value of the good; and VNM is the value of nonoriginating materials that are acquired and used by the producer in the production of the good, but does not include the value of a material that is self-produced; or
(B) For the build-up method, the regional value content may be calculated on the basis of the formula $\mathrm{RVC}=(\mathrm{VOM} / \mathrm{AV}) \times 100$, where RVC is the regional value content, expressed as a percentage; AV is the adjusted value of the good; and VOM is the value of originating materials that are acquired or self-produced, and used by the producer in the production of the good.
(ii) Value of materials.
(A) For the purpose of calculating the regional value content of a good under subdivision (g)(i) and for purposes of applying the de minimis provisions of subdivision (e) of this note, the value of a material is:
(1) in the case of a material that is imported by the producer of the good, the adjusted value of the material;
(2) in the case of a material acquired in the territory in which the good is produced, the value, determined in accordance with Articles 1 through 8, Article 15 and the corresponding interpretive notes, of the Agreement on Implementation of Article VII of the General Agreement on Tariffs and Trade 1994 referred to in section 101(d)(8) of the Uruguay Round Agreements Act (19 U.S.C. $3511(\mathrm{~d})(8)$ ), as set forth in regulations promulgated by the Secretary of the Treasury providing for the application of such Articles in the absence of an importation by the producer; or
(3) in the case of a material that is self-produced, the sum of-
(i) all expenses incurred in the production of the material, including general expenses, and
(ii) an amount for profit equivalent to the profit added in the normal course of trade.
(B) The value of materials may be further adjusted as follows:
(1) for originating materials, the following expenses, if not included in the value of an originating material calculated under subdivision (A) above, may be added to the value of the originating material:
(I) the costs of freight, insurance, packing and all other costs incurred in transporting the material within or between the territory of Panama or of the United States, or both, to the location of the producer;
(II) duties, taxes and customs brokerage fees on the material paid in the territory of Panama or of the United States, or both, other than duties and taxes that are waived, refunded, refundable or otherwise recoverable, including credit against duty or tax paid or payable; and
(III) the cost of waste and spoilage resulting from the use of the material in the production of the good, less the value of renewable scrap or byproducts; and
(2) for non-originating materials, if included in the value of a nonoriginating material calculated under subdivision (A) above, the following expenses may be deducted from the value of the nonoriginating material:
(I) the costs of freight, insurance, packing and all other costs incurred in transporting the material within or between the territory of Panama or of the United States, or both, to the location of the producer;
(II) duties, taxes and customs brokerage fees on the material paid in the territory of Panama or of the United States, or both, other than duties and taxes that are waived, refunded, refundable or otherwise recoverable, including credit against duty or tax paid or payable;
(III) the cost of waste and spoilage resulting from the use of the material in the production of the good, less the value of renewable scrap or by-products; or

## Annex I <br> -9-

(IV) the cost of originating materials used in the production of the nonoriginating material in the territory of Panama or of the United States, or both.
(C) All costs considered for the calculation of regional value content shall be recorded and maintained in conformity with the generally accepted accounting principles applicable in the territory of the country in which the good is produced (whether Panama or the United States). The term "generally accepted accounting principles"--
(i) means the recognized consensus or substantial authoritative support given in the territory of Panama or of the United States, as the case may be, with respect to the recording of revenues, expenses, costs, assets and liabilities, the disclosure of information and the preparation of financial statements, and
(ii) may encompass broad guidelines for general application as well as detailed standards, practices and procedures.
(h) Automotive goods.
(i) For purposes of subdivision (b)(ii)(B) of this note, the regional value content of an automotive good referred to in subdivision (o) of this note may be calculated by the importer, exporter or producer of the good on the basis of the build-down method described in subdivision $(\mathrm{g})(\mathrm{i})(\mathrm{A})$ of this note, the build-up method described in subdivision $(\mathrm{g})(\mathrm{i})(\mathrm{B})$ of this note or the following net cost method, $\mathrm{RVC}=((\mathrm{NC}-\mathrm{VNM}) / \mathrm{NC}) \mathrm{X} 100$, where RVC is the regional value content, expressed as a percentage; NC is the net cost of the good; and VNM is the value of nonoriginating materials acquired and used by the producer in the production of the automotive good, but does not include the value of a material that is self-produced.
(ii) For purposes of this subdivision, the term "automotive good" means a good classified under in any of subheadings 8407.31 through 8407.34 (engines) or 8408.20 (diesel engines for vehicles) and headings 8409 (parts of engines), 8701 through 8705 (motor vehicles), 8706 (chassis), 8707 (bodies) and 8708 (motor vehicle parts).
(iii) For purposes of determining the regional value content under subdivision (h)(i) of this note for an automotive good that is a motor vehicle provided for in any of headings 8701 through 8705 , an importer, exporter or producer may average the amounts calculated under the net cost formula contained in subdivision (h)(i), over the producer's fiscal year-
(A) with respect to all motor vehicles in any one of the categories described in subdivision (h)(iv), or
(B) with respect to all motor vehicles in any such category that are exported to the territory of Panama or of the United States.
(iv) A category is described in this subdivision if it-
(A) is the same model line of motor vehicles, is in the same class of motor vehicles and is produced in the same plant in the territory of Panama or of the United States, as the good described in subdivision (h)(iii) for which regional value content is being calculated;
(B) is the same class of motor vehicles, and is produced in the same plant in the territory of Panama or of the United States, as the good described in subdivision (h)(iii) for which regional value content is being calculated; or
(C) is the same model line of motor vehicles produced in the territory of Panama or of the United States as the good described in subdivision (h)(iii) for which regional value content is being calculated.

For purposes of this note, the term "model line of motor vehicles" means a group of motor vehicles having the same platform or model name.
(v) The term "class of motor vehicles" means any one of the following categories of motor vehicles:
(A) motor vehicles provided for in subheading $8701.20,8704.10,8704.22,8704.23,8704.32$ or 8704.90 , or heading 8705 or 8706 , or motor vehicles for the transport of 16 or more persons provided for in subheading 8702.10 or 8702.90;
(B) motor vehicles provided for in subheading 8701.10 or any of subheadings 8701.30 through 8701.90 ;
(C) motor vehicles for the transport of 15 or fewer persons provided for in subheading 8702.10 or 8702.90 , or motor vehicles provided for in subheading 8704.21 or 8704.31 ; or
(D) motor vehicles provided for in any of subheadings 8703.21 through 8703.90.
(vi) For purposes of determining the regional value content under subdivision (g) of this note for automotive materials provided for in any of subheadings 8407.31 through 8407.34 , in subheading 8408.20 or in heading 8409,8706 , 8707 or 8708 , that are produced in the same plant, an importer, exporter or producer may-

## Annex I <br> -10-

(A) average the amounts calculated under the net cost formula contained in subdivision (h)(i) over-
(1) the fiscal year of the motor vehicle producer to whom the automotive goods are sold,
(2) any quarter or month, or
(3) the fiscal year of the producer of such goods,
if the goods were produced during the fiscal year, quarter or month that is the basis for the calculation;
(B) determine the average referred to in subdivision (vi)(A) separately for such goods sold to one or more motor vehicle producers; or
(C) make a separate determination under subdivision (vi)(A) or (vi)(B) for such goods that are exported to the territory of Panama or of the United States.

The term "automotive materials" refers to such goods classified in the following provisions: subheadings 8407.31 through 8407.34 (engines) or 8708.20 (diesel engines for vehicles) and headings 8409 (parts of engines), 8706 (chassis), 8707 (bodies) and 8708 (motor vehicle parts).
(vii) The importer, exporter or producer of an automotive good shall, consistent with the provisions regarding allocation of costs provided for in generally accepted accounting principles, determine the net cost of the automotive good under subdivision (h)(ii) by-
(A) calculating the total cost incurred with respect to all goods produced by the producer of the automotive good, subtracting any sales promotion, marketing and after-sales service costs, royalties, shipping and packing costs and nonallowable interest costs that are included in the total cost of all such goods, and then reasonably allocating the resulting net cost of those goods to the automotive good;
(B) calculating the total cost incurred with respect to all goods produced by that producer, reasonably allocating the total cost to the automotive good, and then subtracting any sales promotion, marketing and after-sales service costs, royalties, shipping and packing costs and nonallowable interest costs that are included in the portion of the total cost allocated to the automotive good; or
(C) reasonably allocating each cost that forms part of the total cost incurred with respect to the automotive good so that the aggregate of these costs does not include any sales promotion, marketing and after-sales service costs, royalties, shipping and packing costs or nonallowable interest costs.
(viii) For purposes of this note--
(A) the term "nonallowable interest costs" means interest costs incurred by a producer that exceed 700 basis points above the applicable official interest rate for comparable maturities of the country in which the producer is located;
(B) the term "net cost" means total cost minus sales promotion, marketing, and after-sales service costs, royalties, shipping and packing costs and nonallowable interest costs that are included in the total cost;
(C) the term "reasonably allocating" means apportioning in a manner that would be appropriate under generally accepted accounting principles; and
(D) the term "total cost" means all product costs, period costs and other costs for a good incurred in the territory of Panama or of the United States, or both.

## Annex I

(i) Accessories, spare parts or tools.
(i) Subject to subdivisions (ii) and (iii) of this subdivision, accessories, spare parts or tools delivered with a good that form part of the good's standard accessories, spare parts or tools shall--
(A) be treated as originating goods if the good is an originating good; and
(B) be disregarded in determining whether all the nonoriginating materials used in the production of the good undergo the applicable change in tariff classification set forth in subdivision (o) of this note.
(ii) Subdivision (i)(i) shall apply only if--
(A) the accessories, spare parts or tools are classified with and not invoiced separately from the good, regardless of whether such accessories, spare parts or tools are specified or are separately identified in the invoice for the good; and
(B) the quantities and value of the accessories, spare parts or tools are customary for the good.
(iii) If the good is subject to a regional value content requirement, the value of the accessories, spare parts or tools shall be taken into account as originating or nonoriginating materials, as the case may be, in calculating the regional value content of the good.
(j) Fungible goods and materials.
(i) A person claiming that a fungible good or fungible material is an originating good may base the claim either on the physical segregation of the fungible good or fungible material or by using an inventory management method with respect to the fungible good or fungible material. For purposes of this subdivision, the term "inventory management method" means:
(A) averaging;
(B) "last-in, first-out";
(C) "first-in, first out"; or
(D) any other method that is recognized in the generally accepted accounting principles of the country in which the production is performed (whether Panama or the United States) or otherwise accepted by that country.
The term "fungible good" or "fungible material" means a good or material, as the case may be, that is interchangeable with another good or material for commercial purposes and the properties of which are essentially identical to such other good or material.
(ii) A person selecting an inventory management method under subdivision (j)(i) above for a particular fungible good or fungible material shall continue to use that method for that fungible good or fungible material throughout the fiscal year of such person.
(k) Packaging materials and containers.
(i) Packaging materials and containers in which a good is packaged for retail sale, if classified with the good for which the tariff treatment under the terms of this note is claimed, shall be disregarded in determining whether all the nonoriginating materials used in the production of the good undergo the applicable change in tariff classification set out in subdivision (o) of this note and, if the good is subject to a regional value content requirement, the value of such packaging materials and containers shall be taken into account as originating or nonoriginating materials, as the case may be, in calculating the regional value content of the good.
(ii) Packing materials and containers for shipment shall be disregarded in determining whether a good is an originating good. For purposes of this note, the term "packing materials and containers for shipment" means goods used to protect another good during its transportation and does not include the packaging materials and containers in which the other good is packaged for retail sale.
(1) Indirect materials.

For purposes of this note, an indirect material shall be treated as an originating material without regard to where it is produced. The term "indirect material" means a good used in the production, testing or inspection of another good but not physically incorporated into that other good, or a good used in the maintenance of buildings or the operation of equipment associated with the production of another good, including-

## Annex I

-12-
(i) fuel and energy;
(ii) tools, dies and molds;
(iii) spare parts and materials used in the maintenance of equipment or buildings;
(iv) lubricants, greases, compounding materials and other materials used in production or used to operate equipment or buildings;
(v) gloves, glasses, footwear, clothing, safety equipment and supplies;
(vi) equipment, devices and supplies used for testing or inspecting the good;
(vii) catalysts and solvents; and
(viii) any other good that is not incorporated into the other good but the use of which in the production of the other good can reasonably be demonstrated to be a part of that production.
(m) Record-keeping requirements and verification.
(i) An importer claiming preferential tariff treatment for a good imported into the territory of the United States under the provisions of this note based on a importer's certification or its knowledge (including reasonable reliance on information in the importer's possession) that the good is an originating good shall maintain, for a minimum of five years from the date of importation of the good, all records necessary to demonstrate that the good qualified for the preferential tariff treatment claimed under this note.
(ii) An importer claiming preferential tariff treatment for a good imported into the territory of the United States based on a certification issued by the exporter or producer shall maintain, for a minimum of five years from the date of importation of the good, a copy of the certification that served as the basis for the claim. If the importer possesses records demonstrating that the good satisfies the requirements to remain originating under subdivision (c)(iii) of this note, the importer shall maintain such records for a minimum of five years from the date of importation of the good; shall make a written declaration that the good qualifies as originating, under the terms of applicable regulations; and shall be prepared to submit, upon request by the appropriate customs officer, a certification of origin demonstrating that the good qualifies as an originating good under the provisions of this note, including pertinent cost and manufacturing information and all other information requested by such customs officer.
(iii) A certification that a good is originating may be in written or electronic form, including but not limited to the following elements:
(A) the name of the certifying person, including as necessary contact or other identifying information;
(B) the importer of the good (if known);
(C) the exporter of the good (if different from the producer);
(D) the producer of the good (if known);
(E) the classification of the good in the tariff schedule and a description of the good;
(F) information demonstrating that the good is originating;
(G) the date of the certification; and
(H) in the case of a blanket certification of multiple shipments of identical goods within any period specified in the written or electronic certification, not exceeding 12 months from the date of the certification, the period of time that the certification covers. For purposes of this subdivision, the term "identical goods" means goods that are the same in all respects relevant to the rule of origin that qualifies the goods as originating goods.

Importers shall, upon request by the appropriate customs officer, make available such records as are necessary under applicable regulations to demonstrate that a good qualifies as an originating good under the provisions of this note.

## Annex I <br> -13-

(iv) For purposes of determining whether a good imported into the customs territory of the United States from the territory of Panama qualifies as an originating good under the provisions of this note, the appropriate customs officer may conduct a verification under such terms or procedures as the United States and Panama may agree, as set forth in pertinent regulations.
(n) Interpretation of rules of origin.
(i) Unless otherwise specified, a rule in subdivision (o) of this note that is set out adjacent and is applicable to a 6digit subheading in the tariff schedule shall take precedence over a rule applicable to a 4-digit heading superior thereto and covering the goods of such subheading. For purposes of this subdivision and subdivision (o) of this note, a tariff provision is a "heading" if its article description is not indented; a provision is a "subheading" if it is designated by 6 digits under the Harmonized Commodity Description and Coding System.
(ii) Reference to weight in the rules set forth in subdivision (o) of this note for goods provided for in chapters 1 through 24 of the tariff schedule means dry weight, unless otherwise specified in the tariff schedule.
(iii) A requirement of a change in tariff classification in subdivision (o) of this note applies only to nonoriginating materials.
(iv) For purposes of applying this note to goods of chapters 6 through 14, inclusive, agricultural and horticultural goods grown in the territory of Panama or of the United States shall be treated as originating therein even if grown from seed, bulbs, rootstock, cuttings, grafts, shoots, buds or other live parts of plants imported from a country other than Panama or the United States.
(v) For purposes of applying this note to goods of chapters 27 through 40 , inclusive (except a good of heading 3823), of the tariff schedule, a "chemical reaction" is a process (including a biochemical process) which results in a molecule with a new structure by breaking intramolecular bonds and by forming new intramolecular bonds, or by altering the spatial arrangement of atoms in a molecule. The following are not considered to be chemical reactions for purposes of this note:
(A) dissolving in water or other solvents;
(B) the elimination of solvents including solvent water; or
(C) the addition or elimination of water of crystallization.
(vi) A good of heading in chapters 28 through 40 that satisfies one or more of the provisions enumerated in this subdivision shall be treated as an originating good for purposes of this note, except as otherwise specified in such provisions. Notwithstanding the preceding sentence, a good is an originating good if it meets the applicable change in tariff classification or satisfies the applicable value content requirement specified in the rules of origin in subdivision (o) for such chapters.
(A) A good of chapters 28 through 40 that is subject to purification shall be treated as an originating good provided that the purification occurs in the territory of Panama or of the United States, or both and results in the following:
(1) the elimination of not less than 80 percent of the impurities; or
(2) the reduction or elimination of impurities resulting in a good suitable:
(I) as a pharmaceutical, medicinal, cosmetic, veterinary, or food grade substance;
(II) as a chemical product or reagent for analytical, diagnostic, or laboratory uses;
(III) as an element or component for use in micro-elements;
(IV) for specialized optical uses;
(V) for non-toxic uses for health and safety;
(VI) for biotechnical use;
(VII) as a carrier used in a separation process; or
(VIII) for nuclear grade uses.
(B) A good of chapters 30,31 or 33 through 40 (except for heading 3808) shall be treated as an originating good if the deliberate and proportionally controlled mixing or blending (including dispersing) of materials to conform to predetermined specifications, resulting in the production of a good having different essential physical or chemical characteristics that are relevant to the purposes or uses of the good and are different from the input materials, occurs in the territory of Panama or of the United States, or both.

## Annex I <br> -14-

(C) A good of chapters 30, 31, 33 or 39 shall be treated as an originating good if the deliberate and controlled modification in particle size of the good, including micronizing by dissolving a polymer and subsequent precipitation, other than by merely crushing or pressing, resulting in a good having a defined particle size, defined particle size distribution, or defined surface area, which is relevant to the purposes of the resulting good and having different essential physical or chemical characteristics from the input materials, occurs in the territory of Panama or of the United States, or both.
(D) A good of chapters 28 through 38 shall be treated as an originating good if the production of standards materials occurs in the territory of Panama or of the United States, or both. For the purposes of this subdivision, "standards materials" (including standard solutions) are preparations suitable for analytical, calibrating, or referencing uses, having precise degrees of purity or proportions that are certified by the manufacturer.
(E) A good of chapters 28 through 39 shall be treated as an originating good if the isolation or separation of isomers from mixtures of isomers occurs in the territory of Panama or of the United States, or both.
(F) A good of chapters 28 through 38 that undergoes a change from one classification to another in the territory of Panama or of the United States, or both, as a result of the separation of one or more materials from a man-made mixture shall not be treated as an originating good unless the isolated material underwent a chemical reaction in the territory of Panama or of the United States, or both.
(vii) With respect to textile and apparel goods imported under heading 9822.09.62, the following provisions shall apply:
(A) A textile good of chapters 50 through 60 of the tariff schedule shall be considered to be an originating good under this note if it is wholly formed in the territory of Panama or of the United States, or both, from-

(2) a combination of any of the fibers, yarns and fabrics listed in such U.S. note 39 and one or more fibers, yarns and fabrics that are originating goods under the terms of this note.

The originating fibers and yarns referred to in subdivision (A)(2) may contain up to 10 percent by weight of fibers and yarns that do not undergo an applicable change in tariff classification set out in subdivision (o) of this note. Any elastomeric yarn contained in such originating yarns referred to in subdivision (A)(2) must be formed in the territory of Panama or of the United States, or both.
(B) An apparel good of chapters 61 or 62 of the tariff schedule shall be considered to be an originating good under this note if it is cut or knit to shape, or both, and sewn or otherwise assembled in the territory of Panama or of the United States, or both, and if the fabric of the outer shell, exclusive of collars and cuffs where applicable, is wholly of-
(1) one or more fabrics listed in U.S. note 39 to subchapter XXII of chapter 98 of the tariff schedule; or
(2) one or more fabrics or knit to shape components formed in the territory of Panama or of the United States, or both, from one or more of the yarns listed in such U.S. note 39; or
(3) any combination of the fabrics referred to in subdivision $(B)(1)$, the fabrics or knit to shape components referred to in subdivision (B)(2) or one or more fabrics or knit to shape components that are originating goods under the terms of this note.

The originating fabrics referred to in subdivision (B)(3) may contain up to 10 percent by weigh tof fibers or yarns that do not undergo an applicable change in tariff classification set out in subdivision (o) of this note. Any elastomeric yarn contained in such originating yarns referred to in subdivision (B)(3) must be formed in the territory of Panama or of the United States, or both.
(C) A textile good of chapter 63 or subheading 9404.90 of the tariff schedule shall be considered to be an originating good if it is cut or knit to shape, or both, and sewn or otherwise assembled in the territory of Panama or of the United States, or both, and if the component that determines the tariff classification of the good is wholly of -
(1) one or more of the fabrics listed in U.S. note 39 to subchapter XXII of chapter 98 of the tariff schedule;

## Annex I <br> -15-

(2) one or more fabrics or knit to shape components formed in the territory of Panama or of the United States, or both, from one or more of the yarns listed in such U.S. note 39 ; or
(3) any combination of the fabrics referred to in subdivision (C)(1), the fabrics or knit to shape components referred to in subdivision (C)(2) or one ore more fabrics or knit to shape components that are originating goods under the terms of this note.

The originating fabrics referred to in subdivision (C)(3) may contain up to 10 percent by weight of fibers or yarns that do not undergo an applicable change in tariff classification set out in subdivision (o) of this note. Any elastomeric yarn contained in such originating yarns referred to in subdivision (C)(3) must be formed in the territory of Panama or of the United States, or both.
(D) An apparel good of chapters 61 or 62 shall be considered to be an originating good regardless of the origin of any visible lining fabric described in chapter rule 1 to such chapters in subdivision (o) of this note, narrow fabrics described in chapter rule 3 to such chapters in such subdivision ( 0 ), sewing thread described in chapter rule 4 to such chapters in such subdivision (o) or pocketing fabric described in chapter rule 5 to such chapters in such subdivision (o), provided that any such material is identified in U.S. note 39 to subchapter XXII of chapter 98 of the tariff schedule and the good meets all other applicable requirements for preferential treatment under this note.

Such regulations or instructions may, among other things, provide: (I) for the entry of such articles pending a final determination of polarity; and (ii) that positive or negative adjustments for differences in preliminary and final raw values be made in the same or succeeding quota periods. The principal grades and types of sugar shall be translated into terms of raw value in the following manner:

The Honorable Deanna Tanner Okun
Chairman
U.S. International Trade Commission

500 E Street, SW
Washington, DC 20436

## Dear Chairman Okun:

The U.S. International Trade Commission (USITC) plays a critical role in facilitating U.S. trade by reviewing and recommending to the President modifications to the Harmonized Tariff Schedule of the United States (HTS) that are necessary or appropriate to conform the HTS to the International Convention on the Harmonized Commodity and Coding System (the Convention). We greatly appreciate the significant, ongoing effort the USITC invests in this massive project.

To carry out U.S. obligations under the Convention and to include other adjustments to the HTS resulting from implementing the Convention, President Obama will be proclaiming changes to the HTS. These modifications will be based on the USITC's recommendations in its final report in investigation No. 1205-7, "Proposed Modifications to the Harmonized Tariff Schedule of the United States," provided to me under 19 U.S.C. 3005, and consequential modifications necessary to maintain current tariff treatment of goods under certain free trade agreements.
My staff has been working with the USITC staff on annexes to a proposed Presidential proclamation that would implement U.S. obligations under the Convention and make other changes to the HTS resulting from implementing the Convention. I have enclosed with this letter the complete text of those changes.
I request the USITC to publish as a formal USITC document those changes to the HTS that the President proclaims to implement the Convention, including consequential changes necessary to maintain current tariff treatment of goods, and to provide copies to USTR staff, as quickly as possible. I understand that after the proclamation is signed, the USITC will make the document available to the public and will also post a copy on the USITC's website. In addition, I understand that copies of the document will be provided to the Federal Depository Libraries.
I appreciate the USITC's willingness to assist the Administration in employing the most efficient and cost effective means of informing the public of the changes to be made in the HTS as we implement the Convention.
