

**ANALYSIS OF SAMPLES COLLECTED AT SPECIAL-STUDY SITES  
PENNSYLVANIA WATER-QUALITY NETWORK**

The Pennsylvania Water Quality Network (WQN) is a statewide, fixed station water-quality sampling system currently operated by the Department of Environmental Protection (PaDEP), Bureau of Water Supply and Wastewater Management in cooperation with the United States Geological Survey (USGS). It is designed to assess both the quality of Pennsylvania's surface waters and the effectiveness of the water quality management program by accomplishing three basic objectives:

- \* Monitor temporal water quality trends in major surface streams throughout the Commonwealth of Pennsylvania
- \* Monitor temporal water-quality trends in selected reference waters
- \* Monitor temporal water quality trends in selected Pennsylvania lakes.

Major streams are defined as interstate waters and intrastate streams with drainage areas of roughly 200 mi<sup>2</sup> or greater. These waters are sampled at or near their mouths to measure overall quality before flows enter the next higher order stream or before exiting the Commonwealth. In this way, trends can be established and the effectiveness of water-quality management programs can be assessed by watershed. Samples are collected on fixed time intervals resulting in coverage of a range of flow regimes. All samples were collected by the USGS and analyzed by the PaDEP laboratory in Harrisburg, Pa.

Most of the current WQN standard sites are co-located with USGS gage stations and others are equipped with a wire weight gage. Currently the network consists of 104 standard stream sites, 21 reference stream sites, and 20 lakes distributed across the Commonwealth.

Standard stations are sampled bimonthly (6 times per year) for physical and chemical parameters and stream discharge or a stage reading. Reference stations sampled monthly at 25-30 day intervals for physical and chemical parameters and stream discharge or a stage reading. Benthic macroinvertebrate samples are also collected annually at all WQN stations.

In February 2005 the 21 reference stream sites were discontinued and 21 new reference stream sites were established. Since the new reference stream sites were established in the middle of the water year chemical data is presented for both sets of reference stream sites. Biological data is only presented for the reference stream sites that were active in October 2005. This report presents data from the sites in the Ohio River Basin. Data from the Delaware River Basin and Susquehanna River Basin can be found in Volumes 1 and 2 of the USGS Pennsylvania Water Resources Data Reports.

For additional information, contact Andrew Reif at the USGS Pennsylvania Water Science Center, Exton Office, 770 Pennsylvania Drive, Suite 116, Exton, PA 19341; 610-647-9008, (email: agreif@usgs.gov).

<sup>a</sup> 03107500	905	Beaver River at Beaver Falls, PA	40°45'48"	80°18'55"	3,106
<sup>a</sup> 03108000	903	Raccoon Creek at Moffatts Mill, PA	40°37'40"	80°20'16"	178
03109670	901	Ohio River at mile 44.5 at Newell, WV	40°37'10"	80°35'24"	22,784
04212945	643	Conneaut Creek near Cherry Hill, PA	41°55'04"	80°28'09"	149
04213273	641	Twelvemile Creek near Moorheadville, PA (Reference station)	42°12'15"	79°54'46"	12.5

<sup>a</sup>Other data for this station can be found in the continuous station records section of this report.

Ninety lakes are part of the WQN. Of these 90 lakes, approximately 15-25 are sampled annually during mid-summer stratification for five years; and then a different set of 15 to 25 lakes is sampled for five years. Using this schedule all 90 lakes are sampled over a 30-year period. Lakes are sampled for physical and chemical parameters and chlorophyll-*a*. Two samples are collected from the deepest point of the lake with the first sample being collected 1-meter below the surface and the second sample collected 1-meter from the bottom. Each sample is analyzed separately. A temperature and DO profile is collected at the site through the water column.

**TABLE 2.**--List of lakes sampled as part of the Pennsylvania Water-Quality Network.

Station number	WQN No.	Location	Latitude	Longitude	Drainage area (mi <sup>2</sup> )
03021545	L811	Union City Reservoir near Union City, PA	41°54'54"	79°48'55"	2.15

**ANALYSIS OF SAMPLES COLLECTED AT SPECIAL-STUDY SITES  
PENNSYLVANIA WATER-QUALITY NETWORK**

**REMARKS.**--Samples were collected using a D-Frame net with a mesh size of 500 µm. A dash(--) indicates there were no observations of the organism in the sample. Samples represent counts per 100 animal (approximate) subsamples. \*Samples collected with a multiplate sampler deployed for 5 weeks.

**ANALYSIS OF SAMPLES COLLECTED AT SPECIAL-STUDY SITES  
PENNSYLVANIA WATER-QUALITY NETWORK**

**REMARKS.**--Samples were collected using a D-Frame net with a mesh size of 500 µm. A dash (--) indicates there were no observations of the organism in the sample. Samples represent counts per 200 animal (approximate) subsamples.
