

FORT McCoy WISCONSIN

From the field —
A collection of images

What image comes to your mind at the mention of the words "Fort McCoy"? Although responses will vary widely, for many, the typical Fort McCoy image involves field training.

As a Total Force Training Center and a power-projection platform, we specialize in supporting the training and readiness of America's armed forces. Wisconsin's four-season climate, coupled with the installation's 60,000 acres of varied terrain, provides the perfect backdrop for training for units of all types and sizes.

From the squad learning perimeter defense to the engineer company practicing bridging techniques to the soldier qualifying with a weapon on a range, Fort McCoy is all of these things, and so much more.

The following photographs depict some of the training activities that occur at Fort McCoy. And the diversity that you see in this book is just a sample of the great training opportunities that our installation has to offer.

△ Perimeter Defense

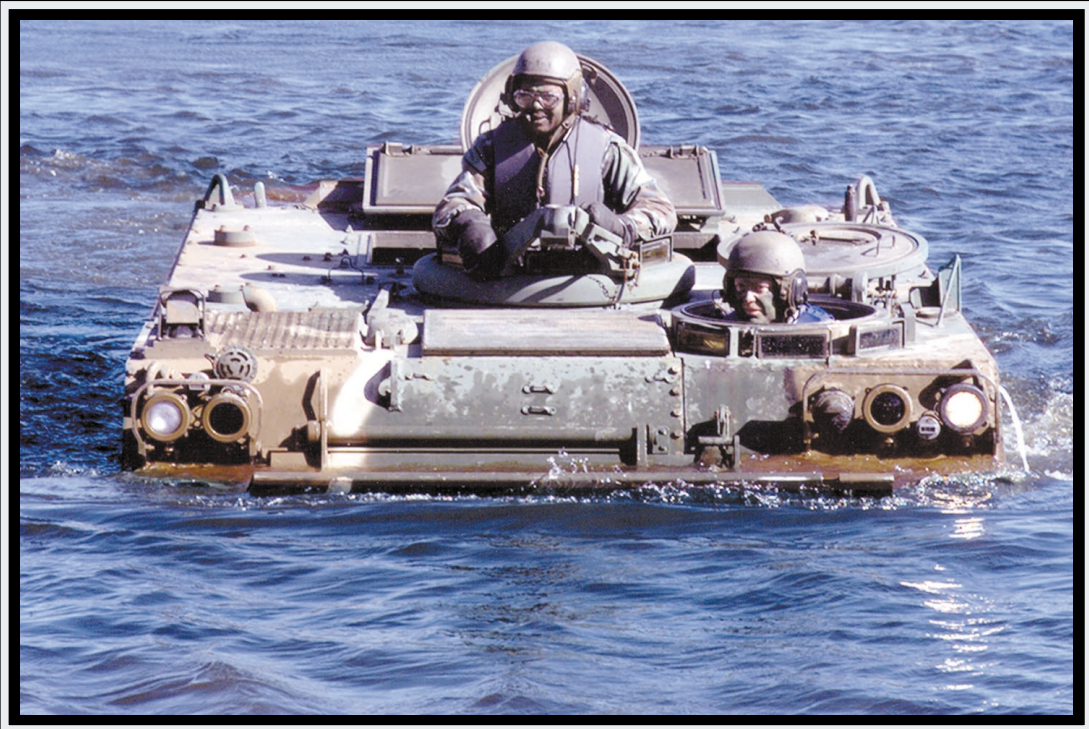

⚙ Adjust Fire

Winter Training

🏠 Pistol Range

⚓ Water Crossing

 Barbed-Wire Obstacle

🚀 Multiple Launch Rocket System

 M-109 Paladin Howitzer

📌 C-130 Cargo Plane
