## Silver Jackets National Program (2012)

**Status:**            **Project Manager:**

In Progress        [Jeffrey Jensen](#)

---

**Purpose:**            To reduce the nation's flood risk through activities to support and provide direction to the National Flood Risk Management /Silver Jackets Program in achieving its mission of leading collaborative, comprehensive and sustainable national flood risk management to improve public safety and reduce flood damages to our country.

---

**Objective:**        Identify and address planning, institutional and policy impediments to successful Silver Jackets Management through policy development and discussion forums.

---

**Benefits:**         The project delivers improved coordination of Federal and non Federal programs impacting floodplain management to better identify opportunities for collaboration, avoid duplication of effort, and prevent policies from inadvertently working at cross purpose. In doing so, the project provides improved delivery of the Silver Jackets support to states and communities at a cost savings to the Federal tax payer.
