

- Linguastat, Inc.
- Lead Investigator: Mark Butler, CTO
- Also: Dr. John M. Pierre, Dr. Amanda Jobbins, Jim Hankle, Ken Brown
- Seeking Teammates & Partners

- Information extraction
 - Hybrid approach
 - Contextual & role-based
 - Temporal & location
- Machine learning
 - Statistical
 - Large feature spaces
- Classification, Clustering
- Time series summarization and analysis
 - Detection of novel concepts & events in large data sets
- Network analysis, graph theory

- Scalable domain independent semantic role & relationship parsing and indexing engine, patent pending
- Semantic geospatial and temporal processing, disambiguation, and indexing framework
- Large scale, high-precision, near real-time transformation of unstructured information
- Production systems deployed (CDC, et. al.)
- Prototype systems developing (US Army, USAF, et. al.)

- Prime vendors interested in alliances
- Large-scale data driven projects
- ...open to discussions
