

BINATIX

Machine Intelligence

Binatix Inc.

Nadav Ben-Efraim, CEO

Dr. Itamar Arel, CTO

+ top notch team of vision, AI researchers

Binatix develops sense-making algorithms that mimic the human brain's ability to:

- Recognize spatiotemporal patterns (object & behaviors)
- Understand multi-modal data
- Learn autonomously
- Predict likely outcomes

Wish to join a team as a sub-contractor

The Binatix Approach:
Hierarchical Deep
Recurrent Neural
networks

- Identical cortical circuits
- Salient features formed from raw input
- Invariant features utilized for "understanding"
- Robust in presence of noise and other distortions
- Application independent
- No feature extraction phase
- GPU accelerated for super fast performance on large datasets
