Intelligenx, Inc.

- Lead Investigator: George C. Pappas
- Current Team Members:
  - Zubair Talib
  - Paul Woods
  - Iqbal Talib

Primary Areas of Interest

- Ultra-large scale data management
- Ultra-large scale data discovery
  – Virtual aggregation across disparate data types and sources
  – User experience research to allow "productive wandering"
- User experience research in the meaningful distillation of disparate data types

What is Our Distinctive Competence?

- Intelligenx provides ultra-high performance data mining and information discovery software

  – Our software combines the functions of full-text search and category-based navigation across multiple data sources (and types) in a compelling way

- We have deployed some of the largest business directory sites on the internet and know how to aggregate multiple sources, taxonomies, and user needs into a coherent offering

Teaming Opportunities

- Organizations who specialize in specific detection algorithms or techniques
- Organizations who work on novel attribute and meta-attribute parsing and extraction capabilities
- Organizations who specialize in human interface innovation

INTELLIGENX™
the power of discovery
