- Linguastat, Inc.
- Lead Investigator: Mark Butler, CTO
- Also: Dr. John M. Pierre, Dr. Amanda Jobbins, Jim Hankle
- Seeking Teammates & Partners

> Alignment of flexible ad hoc informal user data models with formal underlying data models

> Semantic geo-spatial processing which transcends domain and language boundaries

> Semantic information discovery in real time information flows

> Scalable domain independent semantic role & relationship parsing and indexing engine

> Semantic geospatial and temporal processing and indexing framework

> On-the-fly application of analyst's "data models"

> Large scale, high-precision, near real-time transformation of unstructured information

> Production systems deployed (CDC, et. al.)

> Prototype systems developing (US Army, et. al.)

❯ Prime vendors interested in alliances

❯ Large-scale data driven projects

❯ …open to discussions
