

➤ ***Wave Technologies, Inc***

- ***Veteran Owned, HUBZone certified small business***

➤ ***Lead Investigator: Tom Leydorf***

➤ ***Current Team Members***

- ***Univ of Oklahoma - Center for Biosecurity Research***

## ➤ *Research areas of interest:*

- *Data collection – We chart the behavior of avatars at foreign language VW sites using linguists and experienced VW users...this work serves as the “building blocks” for behavioral indicators by PhD-level experts*
- *Threat analysis – Less relevant to this contract, we also produce studies on illicit behavior inside VWs like money laundering, attack planning, and enemy recruitment*

- ***Our unique qualifications and capabilities:***
- ***Multidisciplinary – Joined together military analysts, social scientists, technology experts, and linguists***
  - ***Collaboration – Unique blend of analytical training and brainstorming techniques to produce insights and solutions***
  - ***Surge Capability – In-house research team complimented by ongoing relationships with outside experts in academia, industry, and Intelligence Community***
  - ***Advanced Threat Analysis – High-level experience on clandestine operations and jihadist threats***
  - ***Cost Effective – Provide “Blue Collar” research capabilities***

- ***Looking for the following capabilities:***
  - ***PhD-level experts in Behavioral Psychology, Social Anthropology, and other fields***
  - ***Gaming and VW programmers***
  
- ***Willing to consider teaming opportunities***
