

- Organizations
  - Southwest Research Institute
  - University of Texas at Austin
- Investigators
  - Ronnie Killough (SwRI)
  - Dr. Calvin Lin (UT)

- Research Areas of Interest
  - Static and dynamic security enforcement based on data-flow analysis
  - Hypervisor technologies
  - Approaches to hardware root-of-trust
  - Automated intelligent reasoning approaches for security testing and intrusion detection
  - Secure “build it right” development approaches
  - Reverse engineering of software and firmware

- Capabilities and qualifications
  - Compilers
    - Static and dynamic analysis
    - Scalable and precise pointer analysis
    - Compiler infrastructure development
  - Security
    - Application, embedded, network, and crypto
    - Cyber-physical and secure platform technologies
  - Technology transfer
  - Top secret facility clearance and cleared staff

- Capabilities our group is seeking  
— ?
