

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
REGION IV  
1600 EAST LAMAR BLVD  
ARLINGTON, TEXAS 76011-4511

November 30, 2012

Pete Dietrich  
Senior Vice President and  
Chief Nuclear Officer  
Southern California Edison Company  
San Onofre Nuclear Generating Station  
P.O. Box 128  
San Clemente, CA 92674-0128

SUBJECT: MEETING SUMMARY FOR PUBLIC MEETING WITH SOUTHERN  
CALIFORNIA EDISON

Dear Mr. Dietrich:

On October 9, 2012, NRC personnel met with representatives of Southern California Edison and other public stakeholders at the St. Regis Monarch Beach Hotel in Dana Point, CA. The meeting was held to present and discuss the NRC's current regulatory oversight status of San Onofre Nuclear Generating Station, as well as allow a forum in which interested stakeholders could discuss their perspectives on the future operations of the plant.

During the meeting, the NRC heard from a number of stakeholders who were in support of future operations of the facility. Views expressed by these stakeholders included: lack of a safety-significant problem at the plant, the safe operating history of the utility, and the state's need for the electrical power and jobs provided by the plant.

The NRC also heard from stakeholders who were generally in opposition to future operation of the facility. Views expressed by these stakeholders included: demand for a public hearing before future operations, insistence on a license amendment, high cost associated with repair or operation of the plant, lack of trust in the utility and/or the NRC, and various related environmental concerns.

The NRC's mission, by law, is to license and regulate the nation's civilian use of certain nuclear materials in order to ensure the adequate protection of public health and safety, promote the common defense and security, and to protect the environment. On October 4, 2012, the NRC staff received Southern California Edison's letter of response to the March 27, 2012, Confirmatory Action Letter. The NRC will not make a decision regarding future operation of SONGS Unit 2 until a thorough evaluation of this material has been completed. The NRC will independently determine whether or not the information, analysis and actions provided by Edison constitute a solid technical basis for the resumption of power operation.

The meeting was recorded and copies of the recorded video, as well as written transcripts of the meeting will be made available on the NRC's website at <http://www.nrc.gov/info-finder/reactor/songs/tube-degradation.html>.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosures will be available electronically for public inspection in the NRC's Public Document Room or from the Publicly Available Records (PARS) component of the NRC's Agencywide Documents Access and Management System (ADAMS). ADAMS is accessible from the Public Electronic Reading Room page of the NRC's public web site at [www.nrc.gov/reading-rm/adams.html](http://www.nrc.gov/reading-rm/adams.html).

Sincerely,

**/RA/**
