PURPOSE: This is a joint session sponsored by the Nuclear Regulatory Commission (NRC) and the Health Physics Society (HPS). The session will include presentations on safety culture. The NRC will discuss its goal to develop a safety culture policy statement that would apply to all licensees and certificate holders. The NRC is seeking to develop safety culture terminology that can be used by NRC, licensees, certificate holders, Agreement States, and others and held a public workshop in February 2010 to help develop this safety culture terminology. The NRC would like to obtain feedback regarding the February 2010 public workshop safety culture definition and traits (Safety Culture Terminology), which were arrived at by a group of representatives that included materials and reactor licensees, as well as, public interest representation ( background information for this meeting can be found at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html#meetings>). Additionally, the staff of the NRC would like to hear feedback regarding any challenges stakeholders might see with adoption and use of the definition and traits. If you plan on attending this meeting please contact Mr. Jose Ibarra, 301-415-2581, so he can make arrangements for your participation.
