

Dear Potential U.S. Exhibitor

Exhibiting at a leading industry exhibition can result in tremendous export opportunities for U.S. companies. However, researching the options on which countries and which events to target can be difficult.

Trade Show Opportunities – Made Easy

The U.S. Department of Commerce encourages you, as an American nuclear products and services provider, to exhibit at the India Nuclear Energy 2011 to be held September 29 to October 1, 2011, in Mumbai, India. This trade show is certified under the Department of Commerce, Trade Fair Certification Program and is the only national forum in India where the array of the latest nuclear energy innovations, products and services are bought and sold.

Sales Potential

The **India Nuclear Energy 2011** is the only national focused business development and selling venue concentrating on the nuclear energy products and services sector in India where 110+ exhibitors and 5,500 visitors from 26 countries meet to develop new business. India has sustained need for energy and wants to use nuclear energy to accomplish much of that goal. India has declared the build out of the nuclear energy sector a national priority and is developing many schemes, subsidies, and policies to facilitate modernization, eased import of foreign equipment, and wants foreign investment.

Learn More

For additional information about exhibiting at **India Nuclear Energy 2011**, contact Corey McDaniel of the American Nuclear Society at telephone: 202-657-5642 and email: cmcdaniel@nuscalpower.com. Additional information on expanding your export business in India is available from the U.S. Commercial Service website: <http://www.export.gov/india/en/>.

Sincerely,

Michael Thompson
Program Manager
