

Government Information Kiosk

HUD has several kiosks in public places throughout the country. Working with the Departments of Education and Labor, the Internal Revenue Service and the Environment Protection Agency these kiosks provide basic information about many government programs and services.

Our kiosks have a simple-to-use touch-screen to help citizens and your customers find information about homebuying, student loans, retirement accounts, household safety and ways to save on your taxes.

We need your help

A Government Informational Kiosk in your business location provides an excellent community service to your customers and community.

Kiosk specifications:

HUD kiosks are approximately 7 feet tall and 3 feet in width and depth. We need to be able to install a dedicated phone line that we will pay for. We also need a dedicated 110 volt outlet. Each kiosk is visited weekly for maintenance and to provide supplies.

Customers will find -

U.S. Government Information For You
