

Sustainable Detrick

New Nallin Farm Gate

COL Judith D. Robinson
Commanding

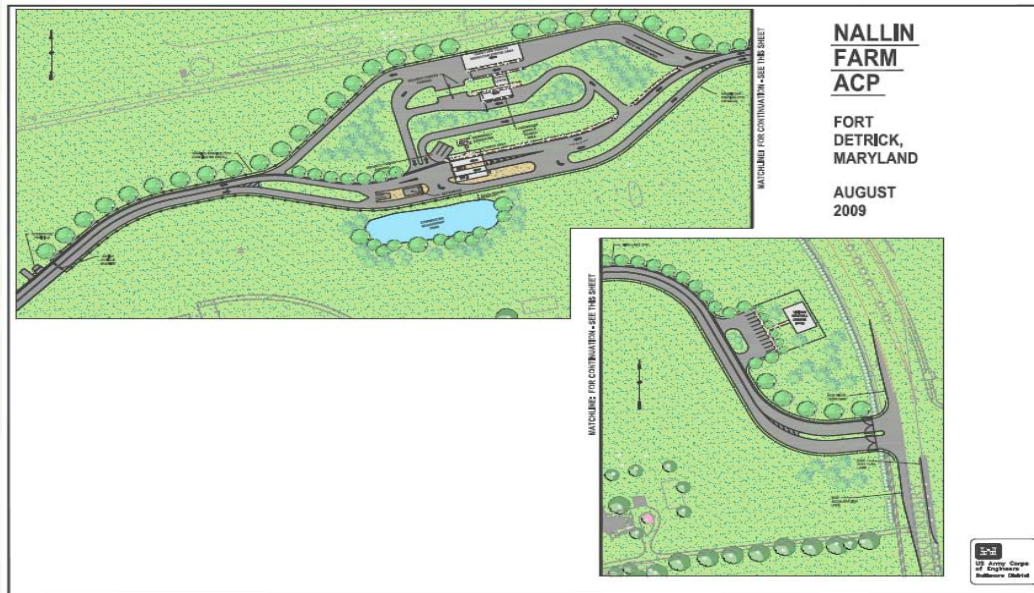

20 September 2010

Fort Detrick, Maryland
A Sustainable Community of Excellence

Nallin Farm Gate

- Provide an overview of the Nallin Farm Gate Project

Purpose of the Project

- To replace non-compliant, older gate with limited throughput
- To reduce traffic congestion around Fort Detrick
- To improve security and queuing of vehicles visiting Fort Detrick
- To support the growth of multiple missions at Fort Detrick

Considerations

- Expected business growth
- Expected employee growth
- Safety considerations
- Preservation/enhancement of historical areas
- Extensive Corps of Engineers Traffic Study
- Lack of traffic queuing on 7th Street/Old Farm Gates
- Functions:
 - ID check
 - Visitor processing
 - Vehicle inspections
 - Vehicle registration
 - (Future) News Media Parking- rather than blocking 7th St.
- Complements Monacacy Blvd Exchange Plan

Where is it?

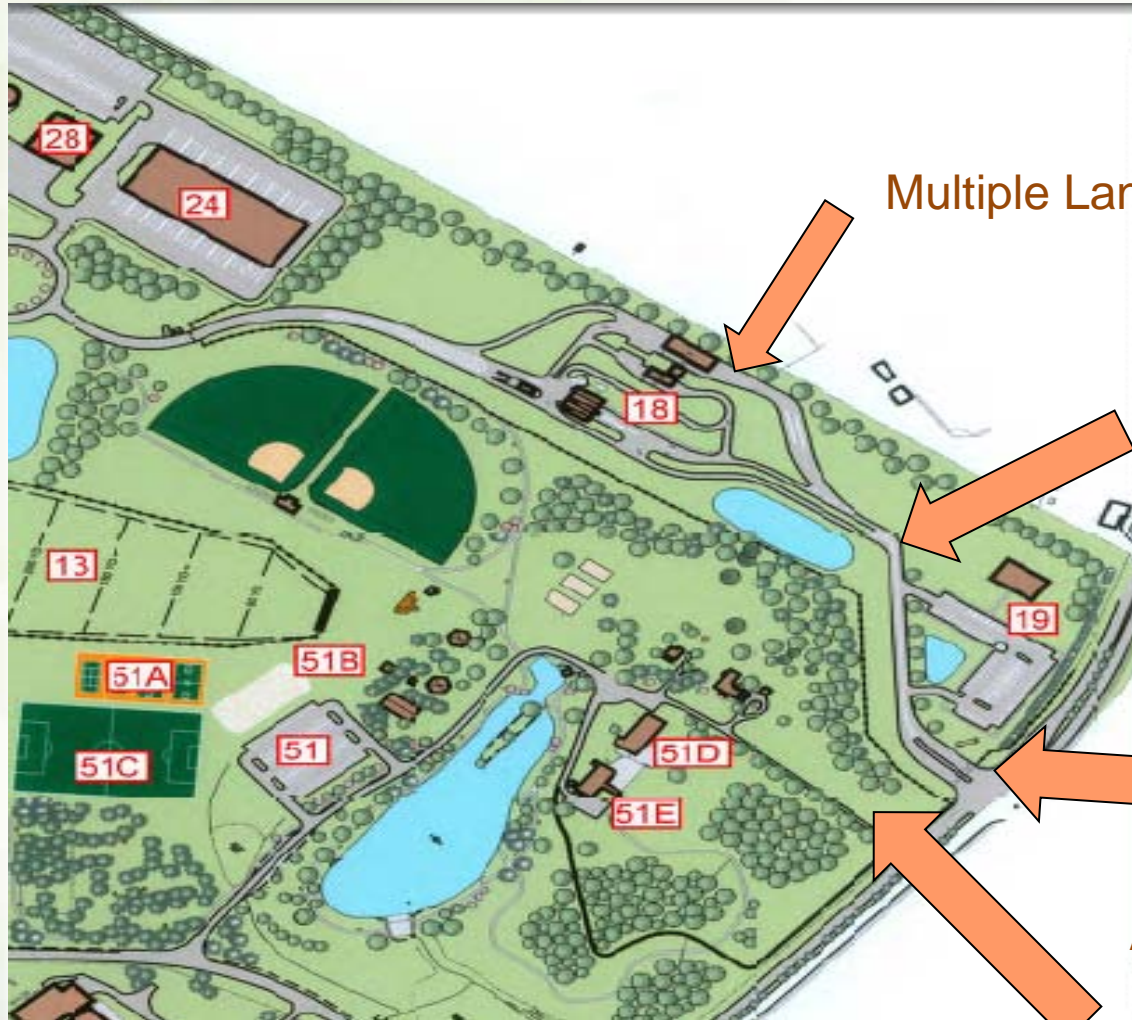

Proposed Features

- Two inbound lanes from Opossumtown Pike
- Three inbound checkpoint lanes diverging from and merging back to Two lanes
- Two outbound lanes widen to three lanes at intersection with Opossumtown Pike
- Guard islands with tandem processing capabilities
- Guardhouse located after last turnaround
- Visitor center
- New traffic signal

Proposed Design

Multiple Lanes

Improved Queuing

Reduced Public Traffic Congestion

Additional Forestation to improve visual relief

Oppossumtown Pike Configuration

Existing Configuration

Proposed Configuration

Nallin Farm Gate

- Nallin Farm Gate will reduce traffic impact on all three sides of Fort Detrick
- Improves safety
- Supports Army security requirements

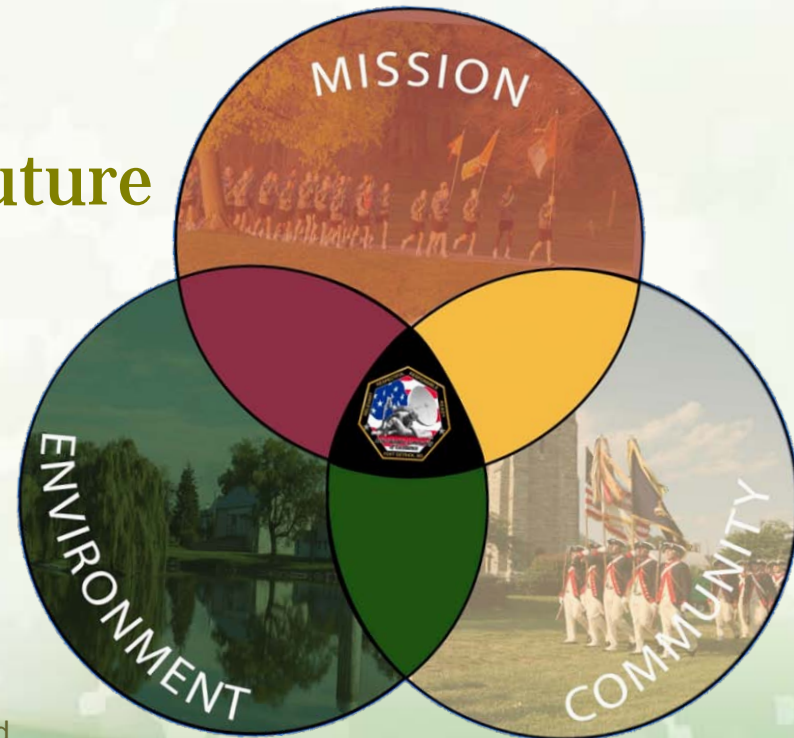

Conclusion

Strategic partnerships, teaming, workforce empowerment, outreach, environmental stewardship, integration, and continuous feedback allows Fort Detrick to:

Transform for a Sustainable Future

- Relevant
- Respectful
- Responsible
- Ready
