

Joint Firepower Course Mobile Training Team Fort Irwin, CA, 03-07 December 2012

What: Joint Firepower Course 13-702

When: 03 – 07 December 2012

Who: National Training Center Operations Group

Where: Fort Irwin, CA

Instructors:

AJST-N: MAJ Adams, MAJ Alfredo, SFC Roberts

6th CTS: Maj Augustino, Capt Watkins

Students: 70

Summary: On 03 December 2012, The National Training Center Operations Group hosted members of Army Joint Support Team – Nellis, and 6th Combat Training Squadron at Fort Irwin in California in order to provide the Joint Firepower Course to the Observer Controller/Trainers. The teams that attended include Lizard, Bronco, Cobra, Scorpion, Tarantula, Sidewinder, Eagle, Wolf, Dragon, and Raven representing 28 different MOSs. Seventy students attended the course with ranks ranging from E5 to O4. Training the NTC OC/Ts provided a great opportunity to the AJST-N and 6CTS to cross talk Army Doctrine 2015 and its application across the operational Army units as they conduct Decisive Action mission sets at NTC each month. This allows AJST-N and 6CTS the ability to tie classroom instruction back into practical application under common doctrine, training, and instruction standards.

Statistics:

- Class was composed mostly of Maneuver, Maneuver Support, Fires, and SOF occupational specialties

- 68 of 70 students graduated; one student had to drop out; one student failed to meet the test standards.

Maj Augustino provides instruction to OC/Ts from NTC OPS Group
