Argonne National Laboratory
Center for Nanoscale Materials
9700 S. Cass Ave., Bldg. 440
Argonne, IL 60439-4806

Ph. D., Purdue University

Research Summary:

My current research involves the development of laser-based instrumentation for investigating the interaction of light with nano-scale materials. Current instruments include a near-field scanning optical microscope, a confocal Raman microscope, and an ultrafast transient absorption system. I also provide user support and training for most of the laser-based instruments at the CNM.

Awards:

- Argonne Pacesetter Award (2011), Workshop on Applications of Raman Microscopy to Nanoscience
- Argonne Pacesetter Award (2002), Design and construction of Terawatt Ultrafast High-Field Facility
- Argonne Director's Award (1997), Patent for molecular switch
- R&D 100 Award (1993), Development of molecular switch
- Argonne Pacesetter Award (1993), Development of molecular switch
