APPROVED JURISDICTIONAL DETERMINATION FORM U.S. Army Corps of Engineers

	U.S. Army Corps of Engineers	
SECTION I: BACKGROUN	ND INFORMATION	
A. REPORT COMPLETION DA	ATE FOR APPROVED JURISDICTIONAL DETERMINATION (JD): 03-Mar-2011	
B. DISTRICT OFFICE, FILE NA	AME, AND NUMBER: Honolulu District, POH-2010-00309-JD6	
C. PROJECT LOCATION AND	BACKGROUND INFORMATION:	
State :		
County/parish/borough:		
City:		
Lat: Long:		
Universal Transverse Mercate	tor Folder UTM List	
	UTM list determined by folder location	
	NAD83 / UTM zone 2S	
	Waters UTM List	
	UTM list determined by waters location NAD83 / UTM zone 2S	
Name of nearest waterbody:		
Name of nearest Traditional N		
Name of watershed or Hydrol	ologic Unit Code (HUC):	
Check if map/diagram of re	review area and/or potential jurisdictional areas is/are available upon request.	
Check if other sites (e.g., of form.	offsite mitigation sites, disposal sites, etc¿) are associated with the action and are recorded on a different	nt JD
D. REVIEW PERFORMED FOR	R SITE EVALUATION:	
Office Determination Date	e: 03-Mar-2011	
Field Determination Date(s	(s):	
SECTION II: SUMMARY O	F FINDINGS	
A. RHA SECTION 10 DETERM	MINATION OF JURISDICTION	
There appear to be navigable veriew area.	waters of the U.S." within Rivers and Harbors Act (RHA) jurisdiction (as defined by 33 CFR part 329) in the second	the
Waters subject to	o the ebb and flow of the tide.	
Waters are prese commerce.	ently used, or have been used in the past, or may be susceptible for use to transport interstate or foreign	ı
Explain: Portion of shoreline is	s subject to ebb and flow of the tide.	
B. CWA SECTION 404 DETER	RMINATION OF JURISDICTION.	
There "waters of the U.S." wit	ithin Clean Water Act (CWA) jurisdiction (as defined by 33 CFR part 328) in the review area.	
1. Waters of the U.S.		
a. Indicate presence of waters o	of U.S. in review area: ¹	
Water Name	Water Type(s) Present	
Matu'u Village shoreline repair	TNWs, including territorial seas	
o. Identify (estimate) size of wa	aters of the U.S. in the review area:	
Area: (m²)		
Linear: (m)		

c. Limits (boundaries) of jurisdiction:
based on: OHWM Elevation: (if known)
2. Non-regulated waters/wetlands: ³
Potentially jurisdictional waters and/or wetlands were assessed within the review area and determined to be not jurisdictional. Explain
SECTION III: CWA ANALYSIS
A. TNWs AND WETLANDS ADJACENT TO TNWs
1.TNW
TNW Name Summarize rationale supporting determination:
Matu'u Village shoreline repair -
2. Wetland Adjacent to TNW Not Applicable. B. CHARACTERISTICS OF TRIBUTARY (THAT IS NOT A TNW) AND ITS ADJACENT WETLANDS (IF ANY):
1. Characteristics of non-TNWs that flow directly or indirectly into TNW
(i) General Area Conditions: Watershed size: Drainage area: Average annual rainfall: inches Average annual snowfall: inches
(ii) Physical Characteristics (a) Relationship with TNW:
Tributary flows directly into TNW.
Tributary flows through [] tributaries before entering TNW.
:Number of tributaries
Project waters are river miles from TNW.
Project waters are river miles from RPW.
Project Waters are aerial (straight) miles from TNW. Project waters are aerial(straight) miles from RPW.
□ Project waters cross or serve as state boundaries. Explain:
Identify flow route to TNW: ⁵
Tributary Stream Order, if known: Not Applicable.
(b) General Tributary Characteristics:
Tributary is: Not Applicable.
Tributary properties with respect to top of bank (estimate): Not Applicable.
Primary tributary substrate composition: Not Applicable.
Tributary (conditions, stability, presence, geometry, gradient): Not Applicable.

(c) Flow: Not Applicable.
Surface Flow is: Not Applicable.
Subsurface Flow: Not Applicable.
Tributary has: Not Applicable.
If factors other than the OHWM were used to determine lateral extent of CWA jurisdiction:
High Tide Line indicated by: Not Applicable.
Mean High Water Mark indicated by: Not Applicable.
(iii) Chemical Characteristics: Characterize tributary (e.g., water color is clear, discolored, oily film; water quality;general watershed characteristics, etc.). Not Applicable.
(iv) Biological Characteristics. Channel supports: Not Applicable.
2. Characteristics of wetlands adjacent to non-TNW that flow directly or indirectly into TNW
(i) Physical Characteristics: (a) General Wetland Characteristics: Properties: Not Applicable.
(b) General Flow Relationship with Non-TNW:
Flow is: Not Applicable.
Surface flow is: Not Applicable.
Subsurface flow: Not Applicable.
(c) Wetland Adjacency Determination with Non-TNW: Not Applicable.
(d) Proximity (Relationship) to TNW: Not Applicable.
(ii) Chemical Characteristics: Characterize tributary (e.g., water color is clear, discolored, oily film; water quality; general watershed characteristics, etc.). Not Applicable.
(iii) Biological Characteristics. Wetland supports: Not Applicable.
3. Characteristics of all wetlands adjacent to the tributary (if any):
All wetlands being considered in the cumulative analysis: Not Applicable.

Summarize overall biological, chemical and physical functions being performed: Not Applicable.

C. SIGNIFICANT NEXUS DETERMINATION

A significant nexus analysis will assess the flow characteristics and functions of the tributary itself and the functions performed by any wetlands adjacent to the tributary to determine if they significantly affect the chemical, physical, and biological integrity of a TNW. For each of the following situations, a significant nexus exists if the tributary, in combination with all of its adjacent wetlands, has more than a speculative or insubstantial effect on the chemical, physical and/or biological integrity of a TNW. Considerations when evaluating significant nexus include, but are not limited to the volume, duration, and frequency of the flow of water in the tributary and its proximity to a TNW, and the functions performed by the tributary and all its adjacent wetlands. It is not appropriate to determine significant nexus based solely on any specific threshold of distance (e.g. between a tributary and its adjacent wetland or between a tributary and the TNW). Similarly, the fact an adjacent wetland lies within or outside of a floodplain is not solely determinative of significant nexus.

Significant Nexus: Not Applicable

D. DETERMINATIONS OF JURISDICTIONAL FINDINGS. THE SUBJECT WATERS/WETLANDS ARE:

1. TNWs and Adjacent Wetlands:

Wetland Name	Туре	Size (Linear) (m)	Size (Area) (m²)
Matu'u Village shoreline repair	TNWs, including territorial seas	262.128	-
Total:		262.128	0

2. RPWs that flow directly or indirectly into TNWs:

Not Applicable.

Provide estimates for jurisdictional waters in the review area: Not Applicable.

3. Non-RPWs that flow directly or indirectly into TNWs:⁸

Not Applicable.

Provide estimates for jurisdictional waters in the review area: Not Applicable.

4. Wetlands directly abutting an RPW that flow directly or indirectly into TNWs. Not Applicable.

Provide acreage estimates for jurisdictional wetlands in the review area:

Not Applicable.

5. Wetlands adjacent to but not directly abutting an RPW that flow directly or indirectly into TNWs:

Not Applicable.

Provide acreage estimates for jurisdictional wetlands in the review area:

Not Applicable.

6. Wetlands adjacent to non-RPWs that flow directly or indirectly into TNWs:

Not Applicable.

Provide estimates for jurisdictional wetlands in the review area:

Not Applicable.

7. Impoundments of jurisdictional waters:9

Not Applicable

E. ISOLATED [INTERSTATE OR INTRA-STATE] WATERS INCLUDING ISOLATED WETLANDS, THE USE, DEGRADATION OR DESTRUCTION OF WHICH COULD AFFECT INTERSTATE COMMERCE, INCLUDING ANY SUCH WATERS: 10 Not Applicable.

https://orm.usace.army.mil/orm2/f?p=106:34:115118378901787::NO::

Identify water body and summarize rationale supporting determination: Not Applicable.				
Provide estimates for jurisdictional waters in the review area: Not Applicable.				
F. NON-JURISDICTIONAL WATERS. INCLUDING WETLANDS				
If potential wetlands were assessed within the review area, these areas did not meet the criteria in the 1987 Corps of Engineers Wetland Delineation Manual and/or appropriate Regional Supplements:				
Review area included isolated waters with no substantial nexus to inters	state (or foreign) commerce:			
Prior to the Jan 2001 Supreme Court decision in "SWANCC," the review Rule" (MBR):	v area would have been regulated base	ed soley on the "Migratory Bird		
Waters do not meet the "Significant Nexus" standard, where such a find	ing is required for jurisdiction (Explain)	:		
Other (Explain):				
Provide acreage estimates for non-jurisdictional waters in the review are factors (ie., presence of migratory birds, presence of endangered specie judgment: Not Applicable.				
Provide acreage estimates for non-jurisdictional waters in the review are a finding is required for jurisdiction. Not Applicable.	ea, that do not meet the "Significant	Nexus" standard, where suc		
SECTION IV: DATA SOURCES.				
A. SUPPORTING DATA. Data reviewed for JD (listed items shall be included in case file and, where checked and requested, appropriately	reference below):

B. ADDITIONAL COMMENTS TO SUPPORT JD:

--Maps, plans, plots or plat submitted by or on behalf of the

Not Applicable.

----Aerial

applicant/consultant

--Photographs

Maps and plans submitted by

applicant.

Aerial imagery

Applicant maps and

plans.

Google Earth

¹-Boxes checked below shall be supported by completing the appropriate sections in Section III below.

²-For purposes of this form, an RPW is defined as a tributary that is not a TNW and that typically flows year-round or has continuous flow at least "seasonally" (e.g., typically 3 months).

³-Supporting documentation is presented in Section III.F.

⁴⁻Note that the Instructional Guidebook contains additional information regarding swales, ditches, washes, and erosional features generally and in the arid West.

⁵⁻Flow route can be described by identifying, e.g., tributary a, which flows through the review area, to flow into tributary b, which then flows into TNW.

⁶⁻A natural or man-made discontinuity in the OHWM does not necessarily sever jurisdiction (e.g., where the stream temporarily flows underground, or where the OHWM has been removed by development or agricultural practices). Where there is a break in the OHWM that is unrelated to the waterbody's flow regime (e.g., flow over a rock outcrop or through a culvert), the agencies will look for indicators of flow above and below the break.

⁷⁻Ibid.

⁸-See Footnote #3.

 $^{^{9}}$ -To complete the analysis refer to the key in Section III.D.6 of the Instructional Guidebook.

¹⁰⁻Prior to asserting or declining CWA jurisdiction based solely on this category, Corps Districts will elevate the action to Corps and EPA HQ for review consistent with the process described in the Corps/EPA Memorandum Regarding CWA Act Jurisdiction Following Rapanos.
