

### Independent Investigation

Choose a question about light or the light spectrum and design and conduct an experiment to answer the question. You may choose a question from Journal Assignment #4: How are Parts of the Spectrum Different?, or you may develop a different question inspired by your investigations during **Getting Hotter?** and **Mystery Light**. Choose a question that is interesting to you.

Date Due	Complete	Task	Notes
		Preliminary experimental design procedure completed	
		Peer Review - design procedure must be complete, written and copied for review team	
		Revised procedure completed	
		Materials list completed and presented to teacher	
		Data collection completed	
		Rough draft of presentation	
		Presentation of results
