## Civil Works Program Decision Support-115296 (2012)

**Status:**            **Project Manager:**

In Progress        [Mark Pointon](#)

---

**Purpose:**            P2 provides the O&M program development capability previously provided by ABS. The deployment of P2 has shifted the efforts of this project toward development of methods and procedures for setting priorities for all civil works activities and analysis of the entire Civil Works program. There will continue to be changes needed to refine requirements to support Civil Works program development. This activity will continue to provide data inputs and resource requirements necessary for Civil Works Program Decision Support.

---

**Objective:**        To insure that P2 tools and Civil Works Program Development guidance are aligned and the P2 tools provide the decision support needed by budget stakeholders

---

**Benefits:**        P2 provides a Corps-wide database of project management information and a standard set of tools for working with project information. Using P2 tools to assist with budget development leverages the substantial investment that the Corps has committed to P2.
