

Kingston Ash Recovery Project Where We Were to Where We Are

East Embayment

Work continues at the Kingston Ash Recovery Project. The photos highlight our progress made to date. TVA remains committed to restoring the area to as good as or better than before the December 2008 event.

If you have questions or comments for our Community Relations staff, please contact us at (865) 717-1635, or email us at kingstoncomm@tva.gov.

Above, a Perimeter Wall Stabilization is being constructed around the Dredge Cell that is engineered to withstand a 7.6 earthquake on the Richter Scale from the New Madrid Fault. The wall is designed to keep an event like the one in 2008 from occurring again.

The photo on the right shows the Lakeshore Drive area, which has been set aside by TVA for Green Space and Recreational Areas once the cleanup is complete.
