Tennessee's Cutting Edge Initiatives

- Strong and supportive leadership
- SAVE Act
- University of Memphis
- Vanderbilt University
- Early warning data system
- Olweus
- Drop-out prevention toolkit
- CSH
- TELL Tennessee
- Memphis City Schools
- Sullivan County

Tennessee's Grant Application

- School Climate Advisory Committee
- Creation of Center for School Climate
- Formal measurement of school climate
- Expansion of Tennessee's longitudinal data system
- Creation of a web portal and data dashboard
- Creation of an online registry for evidence based interventions
- Direct support provided to schools with the most fragile climates
- School climate academies producing School Climate Specialists

Challenges

- Development of a valid and reliable survey instrument for students, educators, and parents
- Clear and concise definition of school climate
- Obtaining buy-in from across our state
- Development of a formula to assign a “school safety score”
- Comparability of data across states
- Data for research use vs data for use at school level
- Large scale implementation and sustainability

Solutions to Help States Move Forward

- National core of items to use as foundation for survey instruments
- Psychometric expertise and direction in structuring a school safety score formula
- Establishing a community of practice

Improving School Climate – the California Challenge

Our Needs:

- Data rich, but inconsistent data use among districts
- Marginalization of learning supports
- Lack of funding

CAL **S3**

TOM TORLAKSON
State Superintendent
of Public Instruction

S3 Goals

- Improve school safety and conditions for learning (i.e., school climate) in most needy high schools as identified by data
- Build local capacity to implement data-driven school improvements
- Integrate school climate reform into school-wide improvements
- Establish a comprehensive intervention model that is sustainable

TOM TORLAKSON
State Superintendent
of Public Instruction

The Engagement Challenge

- Estimated 40-50% of high school students disengaged.
 - Major cause of student dropout.
 - Often overlooked in school reform efforts
- “The fundamental challenge [of school reform] is creating a set of circumstances in which students take pleasure in learning...and that they can be reasonably expect to be able to learn the material.” — National Research Council, *Engaging Schools* (2004:14)

TOM TORLAKSON
State Superintendent
of Public Instruction

The Teacher Challenge

- 22% of new teachers in California quit within four years. School climate among most important factors in whether teachers stay or leave.
 - May be as important or even more important than salary.
- Workplace conditions, relationships and collegiality, performance expectations, participation and decision making
 - Align with the three developmental supports that promote resilience among youth: Relationships, Expectations, & Participation
- If teachers don't feel these supports, they can't provide them to students and teaching quality is undermined.

TOM TORLAKSON
State Superintendent
of Public Instruction

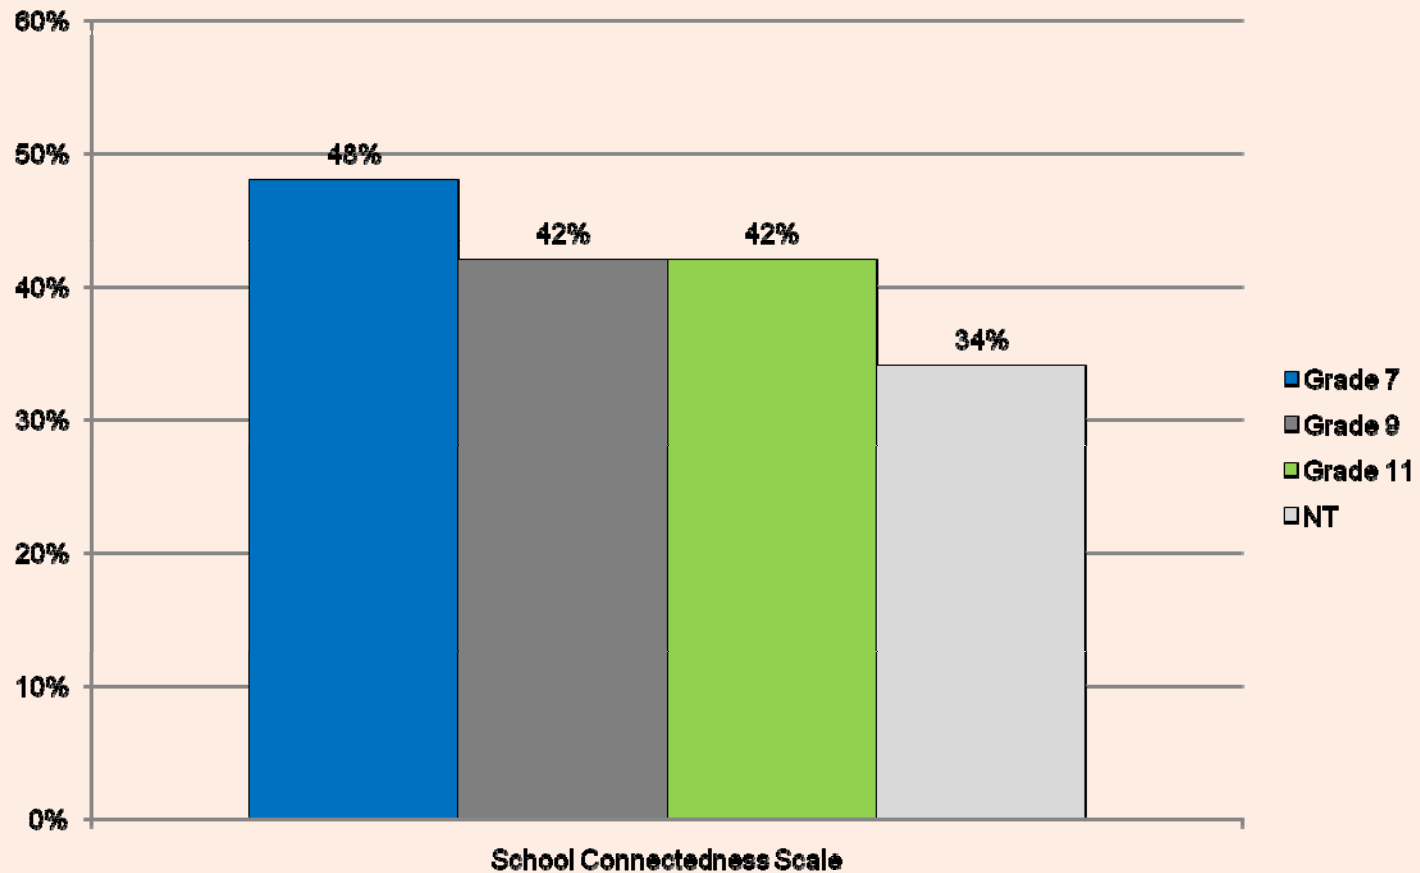

Latest Results: California Healthy Kids Survey

- Aggregated weighted statewide secondary school dataset 2007-09
- 250K students in grades 7 & 9;
210K in 11th;
30K in continuation schools
- 782 districts
- 3,143 schools

School Connectedness

TOM TORLAKSON
State Superintendent
of Public Instruction

How strongly do you agree or disagree with the following statements about your school?

- Feel close to people at this school.
- I am happy to be at this school.
- I feel like I am part of this school.
- The teachers at this school treat students fairly.
- I feel close to people at this school.

Three Critical Developmental Supports or Protective Factors

- Caring Relationships – supportive connections with others who serve as models for prosocial behavior and healthy development.
- High Expectations– direct and indirect, *supportive* messages that youth can and will succeed.
- Opportunities for Meaningful Participation – relevant, engaging, and interesting activities. including opportunities for responsibility and contribution.
- This is a natural alignment with the three R's: Rigor, Relevance and Relationships

State Superintendent
of Public Instruction

Conclusions

- Efforts to improve schools — and especially high schools — need to address not only issues of curriculum, instruction, and governance, but also to foster positive environments that support and engage students in learning (and teachers in teaching).
- Schools need environments that are:
 - Safe;
 - Caring, participatory, and challenging;
 - Addressing health and behavioral impediments to learning readiness and capacity
 - Engaging of students, staff, and parents.
- The first step is assessment

TOM TORLAKSON
State Superintendent
of Public Instruction

Application Process

- Non-competitive
- Needs + district and school commitment
- Initial application (mid Aug)
- Work plan (end of Dec)
