

Jamie Rhome

Storm Surge Team Lead National Hurricane Center

Jamie Rhome is the Storm Surge Specialist and Team Lead at NOAA's National Hurricane Center (NHC) in Miami, Florida, and serves as a subject matter expert on storm surge and coastal inundation for the National Weather Service's hurricane program. He is also the NOAA representative for the tri-agency (NOAA, FEMA, Army Corp. of Engineers) National Hurricane Program (NHP). The NHP conducts Hurricane Evacuation Studies (HES) that guide the decision-making process for protecting the public when a hurricane threatens an area.

Mr. Rhome oversees the National Hurricane Center's Storm Surge Unit, which produces official storm surge forecasts during tropical cyclone threats to the United States, supports the Nation's hurricane warning program, and facilitates post-storm response and recovery efforts. During the offseason, he leads storm surge research and development activities at the NHC including updates to the storm surge modeling system, development of new products, and post-storm analysis and validation studies. Mr. Rhome also participates in the National Hurricane Center's outreach program by participating in hurricane preparedness activities, addressing government, industrial, and private groups, participating in panel discussions, and partaking in numerous radio and television media interviews.

Finally, Mr. Rhome serves as a subject matter expert on a World Meteorological Team aimed at improving storm surge predictive capabilities within other Nations, especially within the Caribbean and Central America.

Mr. Rhome received both his Bachelor of Science degree and Master of Science degree in meteorology from North Carolina State University (1999, 2002). He joined the National Hurricane Center in 1999 as a marine forecaster in the Tropical Analysis and Forecast Branch. He became a hurricane specialist in 2006 where he issued track, intensity and wind forecasts as well as associated watches and warnings for tropical cyclones in the Atlantic and Eastern Pacific basins. Mr. Rhome was selected to lead the NHC's Storm Surge Unit in 2008. He was also selected for a temporary assignment to the White House's Office of Science and Technology Policy in 2008/2009 where he served as a scientific policy analyst within the Presidents George W. Bush and Barack Obama administrations. Previous work experience includes the U.S. Environmental Protection Agency and the State Climate Office of North Carolina.
