## PREFACE

The 48th Fighter Wing has played an invaluable role in the history of the United States Air Force. When the 48th Bombardment Group (Light) originally activated on 15 January 1941, it provided pilot training as a close air support and air interdiction unit. The group and its flying squadrons participated in every major campaign on the Western Front during World War II. The unit changed names three times before inactivation as the 48<sup>th</sup> Fighter Group on 7 November 1945.

With the onset of the Cold War, the unit was redesignated the 48th Fighter-Bomber Wing in June 1952 and activated on 10 July 1952 at Chaumont Air Base, France. The 48th Fighter-Bomber Wing stood continuous alert with F-84 *Thunderjet* and F-86 *Sabre* jet aircraft, prepared to respond to Communist threats. For their efforts in and contributions to the local area, the wing received the moniker *Statue de la Libertè* (Statue of Liberty Wing). The 48th Fighter Wing is the only US Air Force unit with both a numerical designation and an official name.

When relations between the United States and France soured in the late 1950s, the 48th Tactical Fighter Wing, along with its newly gained F-100 *Super Sabres*, moved to RAF Lakenheath, England, where members continued to maintain alert duties. The wing transitioned to the F-4 *Phantom II* in 1972 and the F-111 *Aardvark* in 1977, and participated in countless deployments, inspections, and exercises throughout the 1970s and 1980s. Since 1986, the 48th Fighter Wing has clearly shown the power of the US Air Force during numerous operations with its F-111s, F-15C *Eagles*, and F-15E *Strike Eagles*:

- Operation ELDORADO CANYON, the strikes on Libya due to terrorist attacks attributed to the Libyan government.
- Operation DESERT SHIELD/DESERT STORM, the war for the liberation of Kuwait from Iraq.
- Operation PROVIDE COMFOR, Kurdish humanitarian relief efforts and the enforcement of the northern Iraq no-fly zone.
- Operation DENY FLIGHT, the enforcement of the no-fly zone over Bosnia.
- Operation NOBLE ANVIL, the air war over Serbia.
- Operation NORTHERHN WATCH, the enforcement of the no-fly zone over northern Iraq.
- Operation SOUTHERN WATCH, the enforcement of the no-fly zone over southern Iraq.
- Operations ENDURING FREEDOM/IRAQI FREEDOM, the current fronts in the ongoing overseas contingency operations.

On 25 September 2002, the wing completed a transformation based on the Chief of Staff of the Air Force's Combat Wing Organization. Some of the changes included consolidation of all maintenance functions in the 48th Maintenance Group that were previously part of the 48th Operations Group. The

transformation also affected the 48th Support Group, redesignated the 48th Mission Support Group, when the wing's supply, transportation, and plans activities combined to form the 48th Logistics Readiness Squadron. The 48th Contracting Squadron also became a part of the 48th Mission Support Group in 1993.

On 1 October 2004, the wing gained an additional group. The 85th Group remained geographically separated, stationed at Naval Air Station, Keflavik, Iceland, until 28 June 2006 when it inactivated. USAFE reassigned the 56th Rescue Squadron from the 85<sup>th</sup> Group to the 48<sup>th</sup> Fighter Wing at that time, and the squadron continues to fly the HH-60G *Pave Hawk* helicopter for its search and rescue mission.

This edition of the 48<sup>th</sup> Fighter Wing Heritage Pamphlet includes a history of the wing and base as well as the heritage and heraldry of the wing, its groups, and its squadrons. Each organization is divided into the following categories:

Lineage: Chronological record of activations, redesignations, inactivations, etc.

Assignments: List of organizations to which the unit has been assigned.

Assigned Units: List of units that fall or fell under the wing/groups.

Stations: List of stations at which the organization has been located.

Commanders: Chronological list of the commanders.

Honors: List of organizational honors broken down by service streamers, campaign streamers, armed forces expeditionary streamers, decorations (such as Air Force Outstanding Unit Awards), and bestowed honors.

Aircraft: Chronological list of aircraft assigned, if applicable.

The information contained within is as accurate as possible. All official lineage and honors statements and emblems are maintained by the Air Force Historical Research Agency at Maxwell Air Force Base, Alabama. This pamphlet should not be used for official determination of honors, etc. without verification. For more information regarding the 48th Fighter Wing, and its units' heritage and heraldry, please contact the 48th Fighter Wing History Office at RAF Lakenheath.

## THE HISTORY OF THE 48TH FIGHTER WING AND THE 48TH OPERATIONS GROUP

On 15 January 1941, the United States Army Air Corps activated the 48th Bombardment Group (Light) at Hunter Field, Savannah, Georgia. On the same date, the Air Corps assigned the group's operational units: the 55th, 56th, and 57th Bombardment Squadrons (Light) and the 9th Reconnaissance Squadron (Light). These activations resulted from the buildup of military forces known as the "First Aviation Objective," in which the Air Corps activated 54 combat groups to prepare for the looming Second World War.

Initially the 48th and its four flying squadrons served as a training unit, preparing its pilots and maintenance crews for eventual combat. After training, many of the group's members went on to serve in squadrons stationed in Europe and the Pacific, while the 48th remained in the states. Over the next two years the group moved from Hunter Field to Will Rogers Field, Oklahoma, back to Savannah, Georgia, then on to Key Field, Mississippi; William Northern Field, Tennessee; and Walterboro Army Air Field, South Carolina. Initially the men of the 48th trained with A-20 and A-18 twin-engine attack, light bombers. After moving to Key Field, the group used A-24, A-31, A-35, and A-36 aircraft for training.

At Key Field, on 15 August 1943, the group received the new designation 48th Fighter-Bomber Group. The flying squadrons were redesignated the 492d, 493d, 494th, and 495th Fighter-Bomber Squadrons.

Five days after these organizational changes, the 48th moved again, this time back to William Northern Field, Tennessee. With this move, the 48th abandoned its training mission and served strictly as an operational unit, flying in maneuvers with its first fighters, the P-39 *Airacobra* and P-40 *Warhawk*.

In early 1944, after years of training and flying across the US, the 48th returned to the East Coast. At first the group conducted coastal patrol missions and training in the single-seat fighter it would use throughout World War II, the P-47 *Thunderbolt*. After three months in South Carolina, the group moved up to Camp Shanks, New York and prepared for its embarkation to Europe.<sup>1</sup>

On 21 March 1944, the men of the 48th Fighter-Bomber Group boarded the *Queen Mary*, bound for an unknown and uncertain service in

World War II. After a week of sea travel, the contingent arrived at Gourrock, Scotland. From there they traveled by train for two days to their first overseas base, RAF Station Ibsley in Southern England.

World War II  
Headquarters Sign

---

<sup>1</sup> The 495th Fighter Squadron disbanded 1 April 1944, and did not make the trip.

Almost immediately after their arrival, members of the 48th began a rigorous training program, flying dive-bombing, glide bombing, night flying, low-level navigation, smoke laying, reconnaissance, and patrol convoy sorties. Over the next two months, the number of sorties steadily increased and the group flew its first combat missions on 20 April 1944—an uneventful fighter sweep of the occupied French coast. The group and squadrons underwent another name change on 30 May 1944, dropping the designation “bomber.” The names that would remain with the units until their inactivations were the 48th Fighter Group and the 492d, 493d, and 494th Fighter Squadrons.

Remains of a German locomotive

Unknown at the time to the pilots of the 48th, all of their training was specifically designed for a campaign against the German positions in Normandy. On 6 June 1944, the 48th participated in a massive invasion of France, which included more than 14,000 sorties flown by the allied air forces. The three squadrons assisted the Normandy invasion by dropping bombs on bridges and gun positions, attacking rail lines and trains, and providing visual reconnaissance reports. Over the course of the Normandy campaign, the 48th flew nearly 2,000 sorties, dropping nearly 500 tons of bombs and fired more than 160,000 rounds of ammunition.

With the pocket in Northern France secured, the group quickly moved into the recently conquered territory. On 18 June, the 48th moved its operations, along with the 492d and 493d Fighter Squadrons to Deux Jumeaux, France. The 494th Fighter Squadron followed on the 4th of July. From Deux Jumeaux, the 48th began a mission it would continue throughout the war: providing support for the First Army.

In late July 1944, attacks from the air helped the First Army break through the German positions at Saint Lo, France. In saturation attacks, the 48th struck tanks, convoys, gun positions, and ammunition dumps as the allied ground forces pushed the German army back. Keeping up with the front lines, the 48th was constantly on the move. It arrived at Villacoublay, France, on 29 August, Cambrai/Niergnies, France, on 15 September, and St Trond, Belgium, on 30 September. The 48th twice received the honor of being mentioned in Belgium’s “Order of the Day” and assisted in the attack of German positions in Holland.

One of the 48th’s most memorable attacks took place on 6 December 1944. Despite difficult weather and heavy enemy fire, the 48th’s pilots struck German buildings and troop concentrations in Julich, Germany, allowing ground forces to advance into the sector and earning the 48th a Distinguished Unit Citation.

Two weeks later, the group was called on to hold back a massive German assault in the “Battle of the Bulge.” The 48th flew under heavy weather with its

allies as the German military committed its forces in an all-out assault. Often flying as low as 20 feet off the ground, the men of the 48th strafed ground positions, holding back the Nazi armies in their last major offensive.

By 1945 the allies had gained nearly complete air superiority, allowing the 48th to conduct its missions at will. As the front line moved eastward, so did the 48th Fighter Group: moving into Kelz, Germany, on 26 March; Kassel, Germany, on 17 April; and Illesheim, Germany, on 29 April. Within a week of the group arriving at Illesheim, the allied nations celebrated Victory in Europe Day. Finally, on 8 May 1945, the 48th flew its final mission from Illesheim. Captain Troy Smith observed the ground situation: “They were in retreat by the tens of thousands. They were walking on one side of the road, guns slung over their shoulders, and our guys were on the other side of the road in convoys going the other way. At that point, I knew it was really over.”

A month after the war ended, the 48th retraced its steps as it headed toward home. On 5 July 1945, the group arrived in Laon, France. After a few weeks back in France the group received orders to return to the US. With many of the group’s members separating at port, those remaining set up the group headquarters at Seymour-Johnson Field, North Carolina. Two months later on 7 November 1945, the 48th Fighter Group and its flying squadrons inactivated as part of the massive postwar draw down.

Soon after World War II ended, Europe found itself facing the threat of war. Continental Europe, which had recently been divided by World War II, was now being divided between the communist controlled Eastern Block and the free countries occupied by the allies in the west. American participation in the Korean War raised fears that the Soviet Union would take advantage of this force commitment in Asia to launch its own strike into Europe.

The US increased its combat wings in the early 1950s. Under this program, the US Air Force established the 48th Fighter-Bomber Wing on 25 June 1952 and activated the wing on 10 July 1952 at Chaumont Air Base, France. The 48th Fighter-Bomber Group, which served in World War II, activated under the wing with the 492d, 493d, and 494th flying squadrons.

**Chaumont Air Base Post Exchange Building, 1955**

The new 48th Fighter-Bomber Wing inherited a base that was little more than acres of mud where wheat fields used to be. The only hardened facilities were a concrete runway and a handful of tarpaper shacks. Within two years, the wing headed up an engineering project that resulted in the construction of permanent barracks, a wing headquarters, flightline shops, and warehouses.

While trying to raise a functional base out of the mud, the 48th also served as an operational wing, flying the F-84 *Thunderjet*. With the F-84, the wing supported the North Atlantic Treaty Organization (NATO) and United States Air Forces in Europe (USAFE), and participated in exercises with the US Seventh Army. In addition, the wing conducted operational readiness exercises and tactical evaluations. The 48th frequently deployed to Wheelus Field, Libya, for training in bombing and gunnery skills.

Within a year of activation at Chaumont, the wing had become so proficient with the F-84 that it formed an aerial demonstration team known as “The Skyblazers.” In 1953 the wing transitioned to the F-86F *Sabre*, as did the aerial demonstration team. The F-86 team became USAFE’s official aerial demonstration team in May 1954.

One of the first shows where the Skyblazers displayed their talent was on 4 July 1954. The 48th received the moniker of “Statue of Liberty Wing” in a ceremony presided over by the USAFE Commander, Lt Gen William H. Tunner, the Mayor of Chaumont, and the Undersecretary of State in the French cabinet, Jean Mason. This resulted in the wing becoming the only Air Force unit with both a numeric and descriptive designation. Soon after, the wing received the

basic emblem design it would use for the next fifty years.

Not long after the wing proudly took on the title of The Statue of Liberty Wing, the wing’s comptroller discovered the factory that had produced the actual Statue of Liberty was only 25 miles from Chaumont. In fact, one of the actual molds still existed. The factory agreed to cast a three-meter replica of the statue for \$1,700. The wing raised the funds by raffling off a 1956 French Ford Versailles sedan. The statue still stands in Chaumont as a memorial to the service of the 48th Fighter-Bomber Wing in France, with a replica located at RAF Lakenheath.

**Statue dedication ceremony,  
Chaumont Air Base,  
4 July 1956**

In late 1956, the Liberty Wing became USAFE’s first unit to convert to the F-100 *Super Sabre*. However, at this time the Chaumont runway was closed for repair,

which resulted in the wing deploying to Bulo, Morocco (near Casablanca), to train with its new aircraft.

On 8 December 1957, the 48th Fighter-Bomber Group inactivated and its operational units assigned directly to the wing.

The wing underwent another major organizational change on 8 July 1958 when in conjunction with an Air Force wide reorganization it became the 48<sup>th</sup> Tactical Fighter Wing (48TFW). Its subordinate flying squadrons also added “Tactical” to their designations and the 48th Field Maintenance Squadron, today’s 48th Equipment Maintenance Squadron, activated.

**The new Traffic Management Office, ca. 1960**

Despite the close relationship between the wing and the people of Chaumont, international relationships between France and the US deteriorated in the late 1950s, resulting in French President Charles de Gaulle demanding the removal of NATO forces from the country. Under a project known as “Red Richard,” USAFE relocated its units from France to other locations around Europe. For the 48th Tactical Fighter Wing, this meant a move to an empty heavy bomber base, RAF Lakenheath.

On 15 January 1960, jet fighters of the 48TFW landed at RAF Lakenheath for the first time. The Royal Air Force used the base during World War II and Strategic Air Command during the Korean War, both flying bomber aircraft. The wing and its fighters brought a new mission and the first permanent American presence, to RAF Lakenheath. The base required a myriad of construction projects to support the mission. Maintenance and flying operations areas required conversions to support fighter operations, and the base needed the creation of a support structure for a permanent host unit.

Throughout the 1960s the wing’s members trained to react to possible aggression from the Soviet Union. They underwent a series of NATO tactical evaluations, for which they earned the wing their first Air Force Outstanding Unit Award, for the period from 1 July 1961 to 29 February 1964. The wing conducted several deployments to Turkey, Italy, Spain, and across the United Kingdom.

On 1 October 1971, the 492d Tactical Fighter Squadron stood down from its NATO commitments, followed by the 493d on 1 December and the 494th on 1 February 1972. This allowed the wing to convert from the F-100 to the F-4 *Phantom II*. The first F-4 arrived on 7 January 1972 and the wing completed the conversion on 15 April. The incoming F-4s came from units that completed their service in the Vietnam War, and transitioned through Holloman Air Force Base, New Mexico. However, the slow turnover resulted in only 17 F-4s being on hand at the time of the transition, and only 26 aircraft available by June 1972. During this time, the 492d and 493d split the available aircraft while the 494th took on a non-operational status. Aircrew struggled to maintain proficiency, averaging less than 10 flying hours per month.

The wing coped with this aircraft shortage for two years, not reaching its full allotment of 73 airframes until July 1974. The 492d became fully operational on 10 December 1974, and the 493d on 13 January 1975, followed by the 494th on 25 March. Overall, the wing assumed its initial operational capability on 1 July 1975, resuming its full NATO and USAFE commitments after a three-year transition.

From 1975 to 1977 the 48th underwent a hectic series of operational readiness inspections and tactical evaluations, while standing on alert and

participating in a number of weapons training deployments. However, the F-4 service would be short, as the wing prepared for another aircraft transition.

As early as the summer of 1975, the 48th Fighter Wing began its preparations to receive the F-111 *Aardvark*. The first public, official announcement took place in October 1976. In a three-way move, the 48th received F-111s from the 366th Tactical Fighter Wing, Mountain Home Air Force Base, Idaho; the 366th received F-111s from Nellis Air Force Base, Nevada; and Nellis received Lakenheath's F-4s.

**Exercise participants aid an injured airman after an attack, 1970s**

On 1 March 1977 the first maintenance trainer F-111 arrived at Lakenheath with the last F-4 departing on 22 April. With the assignment of 91 F-111s, USAFE once again activated the 495th Fighter Squadron, which had served under the 48th Fighter Group during World War II.

Unlike the previous F-4 transition, the F-111 change took place quickly and without any significant problems. In fact, the wing received its third Air Force Outstanding Unit Award for such a smooth transition. Almost immediately after changing aircraft, the wing began a series of monthly exercises and deployments that took the Liberty Wing to Italy, Iran, Greece, and Pakistan.

In the early 1980s the wing struggled with aircraft shortages. Primarily, this resulted from the upgrade to the Pave Tack, a laser guided weapons delivery system. Each aircraft had to process through the upgrade facility at the Air Logistics Center in California. At the same time, the wing had to deal with supply shortages resulting from years of reduced military budgets in the late 1970s.

By the mid 1980s the “Red Scare” was not the only American fear for national security; terrorists struck targets from Beirut to Berlin, from Rome to Rotterdam. Some of these attacks were attributed to the Libyan government headed by Colonel Muammar Qadhafi. In retaliation, US President Ronald Reagan ordered a strike against targets in Tripoli, which were carried out by the US Navy's Sixth Fleet and F-111s of the 48th Tactical Fighter Wing.

At approximately 1900 local time, on the evening of 14 April 1986, 24 F-111Fs launched from Lakenheath, including six airborne spares. In flights of four, aircrews flew south through the Straits of Gibraltar and began their orchestrated attack shortly after midnight on 15 April. Simultaneously, Navy and Air Force support aircraft began engaging Libyan defenses around Tripoli.

The grueling 14-hour flight took its toll. “Those guys were so fatigued, the crew chiefs literally had to pull some of the crews out of the cockpits,” recalled CMSgt Richard O’Shaughnessy, then a Master Sergeant and weapons flight supervisor. “Most of them actually lost several pounds from sweating so much. When the guys pulled their helmets off, sweat literally poured down their foreheads and necks.”

Colonel Sam W. Westbrook, 48th Tactical Fighter Wing Commander, summed up the base's feelings during the 14-hour ordeal: "We held our breath during that fourteen-hour period. People didn't really smile a whole lot and conversation remained somewhat subdued. But when our people saw the first F-111s on approach, the whole flightline workforce let out a sigh of relief and seemed to breathe once again."

However, despite the mission's success, the reality of the danger experienced by the wing's pilots hit home. As the strike force recovered at Lakenheath, both air and ground crews were given the somber news that "Karma-52", aircraft 70-0389, and its crew Major Fernando L. Ribas and Captain Paul Lorence of the 495th Fighter Squadron<sup>2</sup>, were missing.

On 8 September 1986, U.S. Navy Secretary John Lehman presented a US Navy Meritorious Unit Commendation to the Liberty Wing for its participation in the operation. Today, the Liberty Wing remains the only Air Force unit to have received this prestigious award. Likewise, General Charles Donnelly, Commander-in-Chief, USAFE, visited RAF Lakenheath on 17 February 1987 and presented decorations to those who participated in the operation. The ceremony ended with a presentation to Captain Lorence's widow Diane, followed by a missing man flyover.

Marking the end of the Cold War, a piece of the Berlin Wall was dedicated on base in July 1990 to remember the "slain peacekeepers of the world." With this drastic change in global politics, rumors began to spread about the future of Lakenheath and other European bases. Politicians debated over what to do with the newly-found "peace dividend."

However, the entire pace of the Air changed in the summer of 1990. On 2 August 1990, Iraq President Saddam Hussein directed his forces to invade Kuwait and thereby threatened an invasion into Saudi Arabia. Within days of the invasion, US President George Bush directed the deployment of US Armed Forces to Saudi Arabia in what became known as Operation DESERT SHIELD. In an address to the Pentagon on 15 August, President Bush referred to DESERT SHIELD as "...one of the most important deployments of allied military power since the second World War."

Also in the first week of August, Col Thomas J. Lennon, 48th Tactical Fighter Wing Commander, received a call from Headquarters, US States Air Force, asking if the 48th Tactical Fighter Wing was ready to deploy. Colonel Lennon built a team of 13 members from wing leadership, known as the "Lucky 13," and preparations began for the eventual movement of personnel and F-111s to Saudi Arabia.

On 25 August 1990, 18 F-111s took off from Lakenheath as the first USAFE unit to deploy. In this first group, nearly 500 men and women of the Liberty Wing departed with the assuredness of years of training behind them and a clearly defined mission before them.

---

<sup>2</sup> While Captain Lorence (weapon systems operator) was assigned to the 495th, Major Ribas (pilot) was attached to the squadron but worked in the operations plans office.

In a 31 August editorial of the base's newspaper, the *Jet48*, Col Barry Ream, the 48th Tactical Fighter Wing's Vice Commander, spoke to the families of the deployed: "I wish I could give you lots of details about what your spouses are doing during the deployment, but I can't. I can say, however, that they all arrived safely, morale is sky high, and the job will get done in typical Liberty Wing style."

**Greetings from the 48 TFW**

Colonel Ream's words proved prophetic. By January 1991, the 48th had deployed 66 of its 70 F-111s to Taif, Saudi Arabia, along with more than 1,400 Team Lakenheath members. During Operation DESERT STORM, the war for the liberation of Kuwait, the 48th Tactical Fighter Wing (Provisional) flew 2,500 combat sorties. Dropping 7.3 million pounds of precision guided munitions, the wing's F-111 fleet destroyed 920 tanks and armored personnel carriers, 245 hardened aircraft shelters, 160 bridges, and 113 bunkers. In one of the last missions of the war, on 27 February 1991, the 48th recorded the first combat use of a GBU-28 (Guided Bomb Unit), successfully destroying an Iraqi command and control center. All of this the wing accomplished without one combat loss of a pilot or aircraft.

Incorporating the lessons learned during the desert operations, the Air Force directed changes that led to the Objective Wing Organization. Beginning in mid-1991, the 48th Tactical Fighter Wing began restructuring under this program, realigning its maintenance-fighter squadron work force and establishing several command positions to include the 48th Logistics Group, 48th Medical Group, 48th Support Group, and 48th Operations Group (originally designated the 48th Fighter Group). The program also redesignated many of the Air Force's units by dropping the "Tactical" from their names. Thus on 1 October 1991, the 48th Tactical Fighter Wing was redesignated the 48th Fighter Wing, and the 492d, 493d, and 494th became simply Fighter Squadrons.

In the midst of the organizational changes, the wing switched aircraft again, exchanging the F-111s for the F-15E *Strike Eagle*. On 15 February 1992, the first F-15E landed at Lakenheath, with the last F-111 departing for units within the US on 16 December 1992. The final F-15E arrived in June 1993, and the wing achieved initial operational capability on 1 October 1993.

With this mission change, the 493d Fighter Squadron inactivated on 1 January 1993, only to activate again on 1 January 1994.

**F-15E at Ahmed Al Jaber Air Base, Kuwait.**

The squadron received its first maintenance trainer F-15C *Eagle* on 10 January 1994, then its full complement of aircraft by 22 July 1994. This marked the first time that the 48th had flown a specifically air-to-air weapon system, after flying for more than 50 years with an air-to-ground mission.

With its new weapon systems, the wing began a hectic pace of deployments that would keep at least one squadron constantly deployed for nearly six years. On 5 August 1993, the 492d Fighter Squadron conducted the wing's first F-15E deployment when it went to Incirlik Air Base, Turkey, under Operation PROVIDE COMFORT (succeeded by NORTHERN WATCH). Thirteen days after the 492d's arrival in Turkey, Iraq violated the exclusion zone by placing surface-to-air missiles outside of the city of Mosul. In spite of repeated warnings to remove the missiles, Iraqi forces failed to comply. On the afternoon of 18 August, Liberty Wing F-15Es struck the site, eliminating the missile threat.

For the remainder of the decade, the 492d and 494th continually rotated to Turkey and to Aviano Air Base, Italy, for participation in Operation DENY FLIGHT, supporting operations in the Balkans. Providing combat air patrol with F-15Cs, the 493d also rotated planes to Turkey and Italy. This series of deployments continued into the spring of 1999.

In February 1999, while the wing served another rotation in Turkey, acts of aggression by Serbia—the core of the Federal Republic of Yugoslavia—against its Albanian population in the province of Kosovo resulted in NATO intervention, culminating in Operation ALLIED FORCE.<sup>3</sup> Strikes against Serbian targets began on 24 March 1999. Within 72 hours, the 493d Expeditionary Fighter Squadron, stationed at Cervia Air Base, Italy, recorded four aerial victories against the enemy. At the same time, the 494th

---

<sup>3</sup> The overall NATO operation was designated ALLIED FORCE, while the US-specific part was called Operation NOBLE ANVIL.

Expeditionary Fighter Squadron, operating from Aviano Air Base, employed its precision guided munitions—including the first combat use of a GBU-28 *Bunker Buster* by an Air Force F-15E. Starting in May, the 492d Expeditionary Fighter Squadron launched combat operations directly from RAF Lakenheath, the first sustained combat operations flown from England since World War II.

During the air war over Serbia, the wing deployed 1,011 personnel to 18 different locations. The wing's pilots and aircraft flew combat missions from three locations, using 69 aircraft. Those remaining at RAF Lakenheath not only made up for the work of those deployed, but also launched combat missions. Furthermore, they served as a supply point for their deployed counterparts, sending 3,871 tons of equipment to various locations. In all, the pilots of the 48th serving under expeditionary squadrons flew 2,562 sorties for more than 11,000 combat hours in less than three months, dropping approximately 3 million pounds of munitions and scoring four out of five confirmed Air Force aerial victories.

**Remains of a MiG-29, courtesy of the 493d FS**

After ALLIED FORCE, the 48th Fighter Wing was given a chance to reconstitute its forces for the first time in six years. During this period, the wing upgraded its F-15E fleet with new Block E-210 models.

At the same time, the wing participated in training with its NATO allies through a series of deployments across continental Europe while receiving USAFE and NATO strike evaluations, tactical evaluations, and surety inspections. Yet the wing continued to prepare for future taskings, such as its Air Expeditionary Force (AEF) commitments.

For the first time since the Gulf War, in December 2000, the wing's flying squadrons began deploying to the desert of Southwest Asia. As part of AEFs 2 and 4 respectively, the 494th and 492d Fighter Squadrons served as Operation SOUTHERN WATCH's precision guided munitions squadrons based at Ahmed Al Jabar Air Base, Kuwait. The units employed several munitions against Iraqi targets, racking up 690 sorties for 1,229 hours for the 494th in AEF 2 and 730 sorties for 1,173.9 hours for the 492d in AEF 4.

The 48th Fighter Wing served as the lead wing force provider for the 363d Air Expeditionary Wing at Prince Sultan Air Base, Saudi Arabia, during AEF 4.

The 493d also deployed to Prince Sultan and served as SOUTHERN WATCH's air superiority squadron, flying 893 sorties for 2,201.9 hours.

After the AEF 4 redeployment in June 2001, the wing moved into its 10-month training period consisting of exercises and inspections, both at home and at events such as Weapons Training Deployments. However, this period was severely interrupted by 11 September 2001.

In response, President George W. Bush initiated Operation ENDURING FREEDOM—air and ground strikes against terrorist organizations and training camps in Afghanistan. “Great harm has been done to us. We have suffered great loss. And in our grief and anger we have found our mission and our moment. Freedom and fear are at war,” stated President Bush.

As part of this operation, the 492d and 493d Fighter Squadrons deployed to support the humanitarian airlift operations from Ramstein Air Base, Germany. The F-15C and F-15E squadrons ensured air superiority and supremacy for C-17 aircraft delivering humanitarian daily rations to Afghan refugees in Afghanistan.

On 21 March of 2003, Operation IRAQI FREEDOM began with airstrikes and ground attacks against the Iraqi military. Nearly 500 people from the Liberty Wing served in various roles and locations.

Since that time, the 48 FW has deployed to support Air Expeditionary Force commitments in Southwest Asia.

Most recently, the 56<sup>th</sup> Rescue Squadron was reassigned to the wing in June 2006 where it flies the HH-60G *Pave Hawk* helicopter.

No matter the challenge—whether conducting strike operations in Iraq or standing guard at RAF Lakenheath's main gate—the people assigned to the 48th Fighter Wing perform their duties with integrity, selflessness, and excellence, as they will continue to do as the next challenges arise.

**HH-60 water rescue**

## HISTORY OF ROYAL AIR FORCE LAKENHEATH

From 1940 until 1945, the Royal Air Force (RAF) constructed more than 500 airfields across the United Kingdom at a cost of more than £1 billion. As part of this incredible civil engineering project, construction on RAF Lakenheath began in late 1940, after the British Government purchased over 1,800 acres of land reserved for the base. However, RAF Lakenheath's military affiliation predated its World War II operational use.

During World War I, the Royal Flying Corps (RFC) established several training areas around Lakenheath Warren, one of which was located across the A1065 roadway from the current perimeter of RAF Lakenheath. A number of RFC units were stationed within several miles of the area with at least two American units attached to the RFC for training. England's first tank trials were conducted near the current location of the Lakenheath Country Club and Clay Target Centre (formerly the Rod and Gun Club) with the First Lord of the Admiralty Winston Churchill in attendance.

As England felt the threat of war from the air in 1940, the Eriswell Low Warren was established as a decoy aerodrome in 1940 for RAF Mildenhall. Featuring fake buildings, a fake runway, and wooden airplanes, the site was initially designated a "K" site as a daytime decoy, but later took on the label of a "K/Q" site for 24-hour operations.

By November 1941, completed construction on RAF Lakenheath included three concrete runways, hangars, and Quonset-style huts. In November, RAF Lakenheath opened as a satellite of RAF Mildenhall, with the first Wellington twin-engined bombers arriving on 24 November 1941.

In January 1942, the RAF's 149 Squadron began to move from the grass runways of RAF Mildenhall to RAF Lakenheath, with its four-engined Stirling bombers. The squadron completed its move on 6 April 1942 and participated in the first "Thousand Bomber Raid" against Cologne, Germany on 30 May 1942.

**Sergeant Middleton**

During the 149 Squadron's two years of combat operations from RAF Lakenheath, its most highly decorated pilot was an Australian enlisted man, Flight Sergeant Rawdon Hume Middleton. Sergeant Middleton participated in a bombing raid on Fiat factories at Turin, Italy, on 29 November 1942. During the raid, a shell burst near the cockpit hitting Middleton in the face, destroying his jaw and right eye. Nonetheless, Middleton and the co-pilot, who was also injured, limped the broken plane back toward England, until it took another hit near the French

coast. Middleton kept the plane in the air long enough for five of the eight crewmembers to safely bail out. Posthumously, Middleton received the Victoria Cross, the British and Commonwealth equivalent to the US Congressional Medal of Honor. His remains are interred in St. John's Churchyard in Beck Row near RAF Mildenhall.

The 199 Squadron joined 149 at Lakenheath in July 1943 flying Wellingtons and later Stirlings. Both squadrons attacked the German V-weapon development center at Peenemunde, Germany on 17 August 1943. Meanwhile, the 149 and 199 gradually took on a larger role in the mine laying mission, designed to tie up enemy shipping and resources in extensive mine sweeping operations. By the end of 1943, this had become both squadrons' primary mission.

On 1 May 1944, 199 Squadron departed RAF Lakenheath, and by 15 May 149 Squadron also completed its operations. Lakenheath closed for an upgrade to a "Very Heavy Bomber" base, which was not completed until 15 April 1947. During this time, contractors repaired, resurfaced, and extended the runways. The station reopened under the RAF's Bomber Command on 15 April 1947.

In 1948 the first US Air Force personnel and aircraft arrived at RAF Lakenheath, as the US sought to secure its allies in Western Europe during the Cold War. Instead, a war in Asia would move RAF Lakenheath from a site for transitory aircraft on temporary duty (TDY) to a permanent station.

In 1949, the only active unit on the base was the 7504th Base Complement Squadron, analogous to a much smaller version of today's mission support group. The only aircraft on the base belonged to rotational TDY units. A fence had not yet been built to protect RAF Lakenheath's assets, and the Air Force did not formally take control of the base until 1 June 1950.

Within a month of the onset of the Korean War, RAF Lakenheath was brought to full strength and security increased. By August 1950, the base had 29 permanently assigned B-29s and 24 additional B-29s deployed to RAF Lakenheath. These aircraft, along with B-50s

and B-36s, stood watch over Europe for the next three years, in case the Soviet Union decided to take advantage of the force commitment in Korea and launch its own offensive into Europe.

From 25 June 1950 until the cease-fire on 27 July 1953, 18 flying units including the 301st Bomb Wing and 97th Bomb Wing filled the skies with their B-29s and B-50s. Twenty two new support squadrons activated, ranging from the 7504th Food Services Squadron to the 97th Maintenance Squadron. Strategic Air Command took control of the base on 1 May 1951, and RAF Lakenheath was fenced for security in 1952.

From 1953 until 1956, permanently assigned B-47s served at RAF Lakenheath. Temporary duty aircraft included KC-97s and U-2 surveillance aircraft, the latter serving under the 1st Weather Reconnaissance Squadron, supplementing the bombers. Jet fighter aircraft landed at RAF Lakenheath on 15 January 1960, as the 48th Tactical Fighter Wing, under the command of Third Air Force and USAFE, arrived.

A one-plus-one dormitory under construction in the 1990s

Since the base was not designed for a large, self-sufficient wing, the 48th's arrival required several major construction projects. Base operations, flying, and maintenance facilities expanded to suit the new mission. By 1958, the first 82 family housing units were completed. Within a year of the wing's arrival, the base theater, junior high school, and high school opened. Over the remainder of the decade "Phase III" housing, the dining hall, hospital, elementary school, bowling alley, and a number of other morale, welfare, and recreation facilities opened.

Construction in the early 1970s brought three-story brick dormitories, a youth center, and an enclosed swimming pool to the base. However, the arrival of F-111 *Aardvarks* in 1977 brought the most meaningful construction since the 48th Fighter Wing's arrival. Most significantly, the aircraft transition required the construction of 60 hardened aircraft shelters, an avionics facility, a command post, and an air alert facility.

With four squadrons of aircraft, the increased base population necessitated an increase in support facilities. In the 1980s, shopping areas were expanded, a new commissary built, and the child development center opened.

Throughout the 1990s, the 48th Fighter Wing worked to replace its deteriorating World War II facilities and upgrade the flying and maintenance areas for the F-15E *Strike Eagles* it received in 1992 and the F-15C/D *Eagles* in 1994. Another major goal was to improve "Quality of Life" facilities, with new "one-plus-one" single-bedroom dormitories, renovated housing units, and improved recreational facilities.

In 2001, RAF Lakenheath still had a number of small, one-story, functionally obsolete structures that occupied a disproportionate land area of the base. In fact, civil engineers classified 21 percent of the buildings on base as substandard, with 62 percent of them unable to be suitably restored. These included 39 Quonset Huts built during World War II as “temporary” facilities designed to last the RAF through the war, yet remained in use sixty years later.

Lakenheath continues to serve as the home of USAFE’s largest fighter wing and home to more than 6,000 active duty Air Force personnel, civilian employees, and their families.

## HERITAGE OF ROYAL AIR FORCE LAKENHEATH

### Lineage of RAF Lakenheath

Initial construction began in June 1941.

Established "Lakenheath RAF Station" on 24 November 1941.

Closed for rebuilding to Very Heavy Bomber station in May 1944.

USAF construction began on 1 July 1948.

USAF occupancy on 27 November 1948.

Formal ownership transferred to USAF on 1 June 1950.

Renamed RAF Lakenheath on 1 June 1950.

### RAF Lakenheath Headquarters Units

#### Royal Air Force

1941-1942: 20th Operational Training Unit

1942-1944: 149 Squadron

1943-1944: 199 Squadron

1944-1948: Inactive

#### United States Air Force

1948-1949: 7460th Base Complement Squadron

1949-1950: 7504th Base Complement Sq (later, 7504th Air Base Group)

1950-1953: 7504th Air Support Wing

1953-1954: 3913d Air Base Squadron

1954-1955: 321st Bomb Wing

1955: 40th Bomb Wing

1955-1959: 3910th Air Base Group

1960 – present: 48th Tactical Fighter (later, 48th Fighter) Wing

### Aircraft

1941-1942: (RAF) Wellington I

1942-1944: (RAF) Stirling I, III

1943-1944: (RAF) Wellington III, X; Stirling III

1948-1950: Boeing B-29 *Superfortress*

1949-1953: Boeing B-50 *Superfortress*

1951-1953: Convair B-36 *Peacemaker*

1953-1955: Boeing KC-97 *Stratofreighter*

1953-1956: Boeing B-47 *Stratojet*

1960-1972: North American F-100 *Super Sabre*

1972-1977: McDonnell Douglas F-4 *Phantom II*

1977-1992: General Dynamics F-111 *Aardvark*

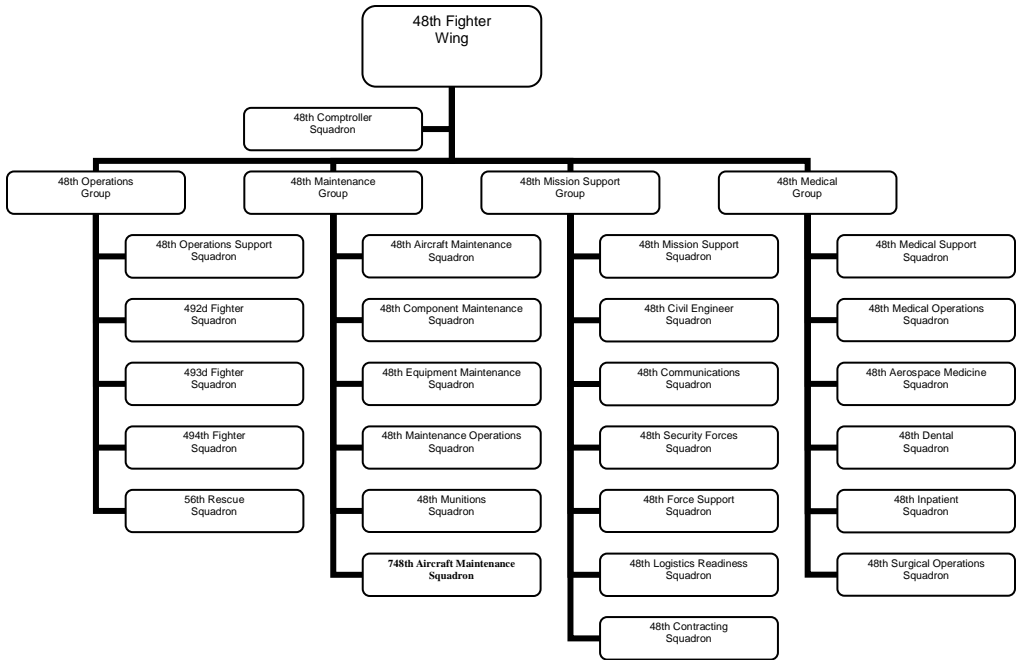

1992 – present: McDonnell Douglas F-15E *Strike Eagle*

1994 – present: McDonnell Douglas F-15C/D *Eagle*

2004 – present: Sikorski HH-60G *Pave Hawk*

# 48TH FIGHTER WING ORGANIZATIONAL CHARTS

As of 30 November 2009

**THE HERITAGE AND  
HERALDRY OF THE  
48TH FIGHTER WING,  
ITS GROUPS,  
AND SQUADRONS**

## 48TH FIGHTER WING

### Lineage

Established as 48th Fighter-Bomber Wing on 25 June 1952.

Activated on 10 July 1952.

Redesignated 48th Tactical Fighter Wing on 8 July 1958.

Redesignated 48th Fighter Wing on 1 October 1991.

### Assignments

Twelfth Air Force, 10 July 1952; United States Air Forces in Europe (USAFE), 1 January 1958; Third Air Force, 1 October 1959; United States Air Forces in Europe, 12 October 1959; Seventeenth Air Force, 15 November 1959; Third Air Force, 15 January 1960; Seventeenth Air Force, 1 July 1961; Third Air Force, 1 September 1963; USAFE, 1 November 2005; Air Command Europe, 18 November 2005; Third Air Force, 1 December 2006 – present.

### Assigned Components

#### Groups

48th Air Base (later, 48th Combat Support, 48th Support, 48th Mission Support)  
Group: 10 July 1952 – present.

48th Fighter-Bomber (later, 48th Operations): 10 July 1952 – 8 December 1957;  
31 March 1992 – present.

48th Maintenance and Supply (later, Logistics, Maintenance) Group: 10 July  
1952 – 8 December 1957; 31 March 1992 – present.

USAF Hospital, Lakenheath (later, USAF Regional Hospital, Lakenheath; 48th  
Tactical Fighter Wing Hospital; 48th Medical Group): 1 July 1971 –  
present.

85<sup>th</sup> Operations Group 1 Oct 2004 – 28 June 2006.

#### Squadrons (*only those with assigned aircraft*)

492d Fighter Squadron: 8 December 1957 – 31 March 1992.

493d Fighter Squadron: 8 December 1957 – 18 December 1992.

494th Fighter Squadron: 8 December 1957 – 31 March 1992.

495th Tactical Fighter Squadron: 1 April 1977 – 13 December 1991.

56th Rescue Squadron: 28 June 2006.

### Stations

Chaumont Air Base, France, 10 June 1952.

RAF Lakenheath, England, 15 January 1960 – present.

### Aircraft

1952-1956: Republic F-84 *Thunderjet* and North American F-86 *Sabre*

1956-1972: North American F-100 *Super Sabre*

1972-1977: McDonnell Douglas F-4 *Phantom II*

1977-1992: General Dynamics F-111 *Aardvark*

1992 – present: McDonnell Douglas F-15E *Strike Eagle*

1994 – present: McDonnell Douglas F-15C/D *Eagle*

1 January – 31 December 2008

\* *Honors earned as the 48TFW (Provisional)*

\*\**Honors Conferred from the 48th Air Expeditionary Wing-Noble Anvil.*

*Bestowed Honors*

The wing is authorized to display the honors earned by the 48th Operations Group prior to 10 July 1952.

**Emblem** (Approved on 5 July 1962; modified on 15 June 2007; replaced emblem approved on 20 March 1953).

Ultramarine blue and Air Force yellow are the Air Force colors. Blue alludes to the sky, the primary theater of Air Force operations. Yellow refers to the sun and the excellence required of all personnel. The emblem is symbolic of the Wing and its history. On 10 July 1954, the 178th anniversary of United States independence, the Wing was designated as “The Statue of Liberty Wing” in recognition of the long-standing friendship between the United States and France. The thirteen stars surrounding the Statue of Liberty represent the original thirteen colonies of the United States of America.

Designation: “STATUE DE LA LIBERTÉ” [The Statue of Liberty Wing]

## 48TH COMPTROLLER SQUADRON

### Lineage

Constituted 48th Comptroller Squadron and activated on 1 July 1985.

Inactivated on 1 July 1994.

Redesignated 48th Comptroller Flight on 16 June 1995.

Activated on 1 July 1995.

Redesignated 48th Comptroller Squadron on 1 May 1997.

### Assignments

48th Tactical Fighter (later, 48th Fighter) Wing, 1 July 1985 – 1 July 1994,

1 July 1995 – present.

### Stations

RAF Lakenheath, England, 1 July 1985 – 1 July 1994; 1 July 1995 – present.

### Commanders

Maj Brant Clark	1 July 10
Maj Christopher DeJesus	2 July 2007
Maj Norman Dozier	20 July 2004
Maj Michael J. Halloran	10 July 2001
Maj Mary Ensminger	13 July 1999
Lt Col Paul G. Hough	22 July 1997
Maj Diane M. McDaniels	1 July 1995
Maj Mary C. Roock	3 May 1991 – 1 July 1994
Capt Jeffrey A. Bryan	8 March 1991
Maj Mark O. Goble	3 September 1987

1 January – 31 December 2007

1 January – 31 December 2008

## 48TH COMPTROLLER SQUADRON (con'd)

**Emblem** (Approved 7 December 1998)

Yellow is an Air Force color. Yellow refers to the sun and the excellence required of Air Force personnel. The wings of the eagle are on a blue disc suggesting a globe and reflect the comptroller's support to expeditionary forces and global air power. The dollar signs encircling the disc indicate the unit's around-the-clock fiscal mastery. The torch represents the unit's dedication, diligence, and commitment to the financial aspects of the squadron's parent organization.

Motto: "FISCALIS VICTORIA" [Fiscal Victory]

## 48TH MAINTENANCE GROUP

### Lineage

Established as 48th Maintenance and Supply Group on 25 June 1952.

Activated on 10 July 1952.

Inactivated on 8 December 1957.

Redesignated 48th Logistics Group and activated on 31 March 1992.

Redesignated 48th Maintenance Group on 25 September 2002.

### Assignments

48th Fighter-Bomber Wing, 10 July 1952 – 8 December 1957.

48th Tactical Fighter (later, 48th Fighter) Wing, 31 March 1992 – present.

### Assigned Units

48th Aircraft Maintenance Squadron: 25 September 2002 – present.

48th Component Repair (later, 48th Component Maintenance) Squadron:  
31 March 1992 – present.

48th Contracting Squadron: 1 October 1993 – 25 September 2002.

48th Logistics Support (later, 48th Maintenance Operations) Squadron:  
31 March 1992 – present.

48th Maintenance (later, 48th Field Maintenance, 48th Consolidated Aircraft  
Maintenance, 48th Equipment Maintenance) Squadron:  
10 July 1952 – 8 December 1957; 31 March 1992 – present.

48th Motor Vehicle (later, 48th Transportation) Squadron:  
10 July 1952 – 8 December 1957; 31 March 1992 – 25 September 2002.

48th Munitions Squadron: 24 January 2003 – present.

48th Supply (later, 48th Logistics Readiness) Squadron:  
10 July 1952 – 8 December 1957; 31 March 1992 – 25 September 2002.

748th Aircraft Maintenance Squadron: 9 November 2009 – present.

### Stations

Chaumont Air Base, France, 10 July 1952 – 8 December 1957.

RAF Lakenheath, United Kingdom, 31 March 1992 – present.

### Honors

*Service Streamers.* None

*Campaign Streamers.* None

*Armed Forces Expeditionary Streamers.* None

## Emblem (Approved on 14 November 1972)

The emblem is symbolic of the unit, the Air Force, and the national colors. The color blue alludes to the sky, the primary theater of Air Force operations, and yellow to the sun and the excellence of personnel in assigned tasks. The hand is representative of Air Force personnel carrying the torch of freedom. The stars allude to the aerospace medium in which Air Force operations are carried out. The lightning bolt represents the striking power of the United States Air Force.

### **Emblem** (Approved 20 April 1976)

The emblem is symbolic of the unit, the Air Force, and the national colors. Ultramarine blue, red, white, and golden yellow are used in the design. The color blue alludes to the sky, the primary theater of Air Force operations, as well

as being one of the national colors, and golden yellow to the sun and the excellence of the personnel in assigned tasks. Red, as part of the background, is the second national color used. A white sword across the red, gold, and blue background completes the national colors, and is indicative of the strength and capabilities of the squadron. The encircling electrons are indicative of the very nature of the 48th Component Maintenance Squadron's mission. The white banner above the emblem, with the words in blue, "STATUE OF LIBERTY WING," symbolizes that the squadron is an integral part of the 48th Fighter Wing.

## 48TH EQUIPMENT MAINTENANCE SQUADRON

### Lineage

**Emblem** (Approved 26 May 2006)

Ultramarine blue and Air Force yellow are the Air Force colors. Blue alludes to the sky, the primary theater of Air Force operations. Yellow refers to the sun and the excellence required of Air Force personnel. The silver wrench represents the superior maintenance mission and performance of the unit. The buff hand symbolizes strength and dexterity in performance of mechanical duties. The black background signifies the ability to fulfill the air mission. The three lightning bolts, blue, yellow, and red represent the fighter squadrons the unit supports.

Motto: “SOUTIEN POUR TOUS” [Support For All]

*\*Honors Conferred from the 48th Expeditionary Logistics Support Squadron-Noble Anvil.*

**Emblem** (Approved 21 July 1994)

Blue and yellow are the Air Force colors. Blue alludes to the sky, the primary theater of Air Force operations. Yellow refers to the sun and the excellence required of Air Force personnel. The firebird on the flight symbol represents the squadron personnel and their dedication to guarding, guiding, and maintaining the Wing's aircraft and mission. The swirling contrail reflects the turbulence in the world and serves to remind the unit personnel of the sacrifices that were necessary in the past to sustain future peace.

## 48TH MUNITIONS SQUADRON

### Lineage

Constituted 48th Aviation Depot Squadron on 18 August 1959.

Activated on 1 December 1959.

Redesignated 48th Munitions Maintenance Squadron on 1 July 1960.

### Emblem (Approved 19 March 1997)

Blue and yellow are the Air Force colors. Blue alludes to the sky, the primary theater of Air Force operations. Yellow refers to the sun and the excellence required of Air Force personnel. The disc as a globe signifies the unit's worldwide focus of medical services. The red cross, a traditional medical

symbol, reflects the services offered by the squadron. The flight symbol alludes to the unit's support of both ground and aerospace forces.  
Motto: "KEEP THEM FIT AND FLYING"

- 1 October 2002 – 30 September 2004
- 1 October 2004 – 31 October 2005
- 1 November 2005 – 31 December 2006
- 1 January – 31 December 2007
- 1 January – 31 December 2008

**Emblem** (Approved 20 June 2001)

Blue and yellow are the Air Force colors. Blue alludes to the sky, the primary theater of Air Force operations. Yellow refers to the sun and the excellence required of Air Force personnel. The torch and flame, symbolic of unit's dedication to the 48th Fighter Wing, represents freedom and enlightenment. The ivory tooth-shaped aura represents the Dental Squadron's unwavering commitment to wartime readiness and peacetime oral health.

Motto: "YOU SMILE BECAUSE WE CARE"

## 48TH INPATIENT SQUADRON

### Lineage

Designated 48th Inpatient Squadron on 19 July 2007.

Activated on 19 July 2007.

### Assignments

48th Medical Group, 19 July 2007 – present.

### Stations

RAF Lakenheath, England, 19 July 2007 – present.

### Commanders

Col Theresa D. Rodriguez 21 June 2010

Lt Col Annata Rae Sullivan 11 June 2009

Col Robert G. Hontz 19 July 2007

### Honors

*Service Streamers.* None

*Campaign Streamers.* None

*Armed Forces Expeditionary Streamers.* None

*Decorations.*

Air Force Outstanding Unit Awards

1 January – 31 December 2007

1 January – 31 December 2008

**Emblem** (approved 23 June 2008).

Ultramarine blue and Air Force yellow are the Air Force colors. Blue alludes to the sky, the primary theater of Air Force operations. Yellow refers to the sun and the excellence required of Air Force personnel. The Air Force Memorial spires represent the core values the squadron lives everyday. The red cross and the serpent entwined on one of the spires (alluding to the Staff of Aesculapius) represent the medical care provided by the unit. The motto “OPTIMOS CURAMUS” translates in English to “We Care for the Best.”

## 48TH MEDICAL OPERATIONS SQUADRON

### Lineage

Constituted 48th Medical Operations Squadron on 1 August 1994.  
Activated on 1 September 1994.

### Assignments

48th Medical Group, 1 September 1994 – present.

### Stations

RAF Lakenheath, England, 1 September 1994 – present.

### Commanders

Col Rebecca L. Brown	21 May 2009
Col Matthew P. Wicklund	9 Aug 2005
Col James A. King	30 Sep 2003
Lt Col Joseph D. Dye	2 July 2001
Lt Col David M. Jenkins	2 Sep 1999
Col Linda E. Henderson	11 Jul 1997
Lt Col Paul R. Ziaya	17 Nov 1995
Lt Col Albert W. Swanegan	7 Sep 1994

### Honors

*Campaign Streamers.* None

*Armed Forces Expeditionary Streamers.* None

*Decorations.*

#### Air Force Outstanding Unit Awards:

1 August 1996 – 30 September 1998  
24 March – 10 June 1999  
1 October 1998 – 30 September 2000  
1 October 2000 – 24 September 2002  
1 October 2002 – 30 September 2004  
1 October 2004 – 31 October 2005  
1 November 2005 – 31 December 2006  
1 January – 31 December 2007  
1 January – 31 December 2008

**Emblem** (Approved 19 March 1997)

Blue and yellow are the Air Force colors. Blue alludes to the sky, the primary theater of Air Force operations. Yellow refers to the sun and the excellence required of Air Force personnel. The Statue of Liberty “enlightening the world” represents the unit’s patriotic defense of our constitutional liberties. Its torch is entwined with a serpent, reminiscent of the Staff of Aesculapius. The flame is marked with a red cross. Both are symbols of the medical field and symbolic of the squadron’s medical functions. The stars denote the many medical services provided by the unit.

Motto: “LIBERTY MEDICS”

## 48TH MEDICAL SUPPORT SQUADRON

### Lineage

Constituted 48th Medical Support Squadron on 1 August 1994.  
Activated on 1 September 1994.

### Assignments

48th Medical Group, 1 September 1994 – present.

### Stations

RAF Lakenheath, England, 1 September 1994 – present.

    Air Force Outstanding Unit Awards

        1 January – 31 December 2007

        1 January – 31 December 2008

**Emblem** (approved 11 February 2008)

Ultramarine blue and Air Force yellow are the Air Force colors. Blue alludes to the sky, the primary theater of Air Force operations. Yellow refers to the sun and the excellence required of Air Force personnel. The red cross represents the squadron's core mission and competency as medics across all medical Air Force Specialty Codes. The flames allude to the fire of combat where the squadron is required to bring its skills, the peril which its patients can be in that requires its intervention and the testing of its ability in delivering absolute superior health care. The eagle rising from the flames alludes to the mythological phoenix representing the squadron's support of the 48th Fighter Wing's primary mission and symbolizes the restoration of health and support of the United States Air Force mission. The motto "VITAM DARE SALUTEM RESTITUERE" translates in English to "Delivering Life Restoring Health."

## 48TH MISSION SUPPORT GROUP

### Lineage

Established as 48th Air Base Group on 25 June 1952.

Activated on 10 July 1952.

Redesignated 48th Combat Support Group on 15 January 1962.

Redesignated 48th Support Group on 31 March 1992.

Redesignated 48th Mission Support Group on 25 September 2002.

### Assignments

48th Fighter-Bomber (later, 48th Tactical Fighter, 48th Fighter) Wing,  
10 July 1952 – present.

### Assigned Units

48th Air Police (later, 48th Security Police, 48th Security Forces) Squadron:  
10 July 1952 – 1 August 1985; 31 March 1992 – present.

**Emblem** (Approved 8 September 1982)

The statue's torch of freedom that lights the way for the poor, beaten, oppressed, and downtrodden is featured in the center of the cross hairs and is ringed by four symbols that best represent the diverse services that the 48th Civil Engineer Squadron provides. The stack of coins represents the large sum of funds that Civil Engineers are responsible for. The compass symbolizes engineering design. The fireman's hat and ax symbolize fire protection. The house symbolizes the unit's significant facility maintenance and repair efforts and the Base Housing Office. Motto: "WE SERVICE LIBERTY"

**Emblem** (Approved 29 July 2008)

Blue and yellow are the colors used for Air Force and red symbolizes life and action. Stars are emblematic of Military Leadership and interlacing connotes a strong support. The center star represents the unit and the six sided hexagon refers to the basic functional responsibilities. The three stars upon the trefoils, symbols of unity, represent Consumer Affairs and along with the above symbolize the overall mission of the 48th Services Squadron.

Motto: “SERVICE WITHOUT SERVITUDE”

## 48TH LOGISTICS READINESS SQUADRON

**Emblem** (Approved 30 December 1968)

Ultramarine blue and golden yellow are the Air Force colors—blue alludes to the sky, the primary theater of Air Force operations, and yellow to the sun and excellence of personnel in assigned duties. The chain symbolizes the unity of command and strength of the entire Squadron as a unit. The lightning bolts denote speed of response and the four areas symbolize the four cardinal points of the compass representing the unlimited range and purpose relating to the mission of the Squadron.

## 48TH SECURITY FORCES SQUADRON

Maj Howard W. Densford	ca. 1 Dec 1952

**Emblem** (Approved 23 April 1964)

The emblem is symbolic of the squadron and its mission. The encircling olive branches depict honor and the red rim valor. The two shades of blue in the background represent 24 hour night and day protection. The armored fist alludes to power and protection, the sword to justice, the lightning bolts as a striking force. The wings depict peace and the 48 stars allude to the number of the unit. The emblem bears our national colors, red, white and blue, to reflect patriotism and the Air Force colors, ultramarine blue and golden yellow, to indicate the unit is an integral part of the United States Air Force.

Motto: "PARATI PRO RE IMPROVISA" [Prepared For The Unexpected]

## **48TH OPERATIONS GROUP**

### **Lineage**

Established as 48th Bombardment Group (Light) on 20 November 1940.

Activated on 15 January 1941.

Redesignated 48th Bombardment Group (Dive) on 28 August 1942.

Redesignated 48th Fighter-Bomber Group on 15 August 1943.

Redesignated 48th Fighter Group on 30 May 1944.

Inactivated on 7 November 1945.

Redesignated 48th Fighter-Bomber Group on 25 June 1952.

Activated on 10 July 1952.

Inactivated on 8 December 1957.

Redesignated 48th Tactical Fighter Group on 31 July 1985.

Redesignated 48th Operations Group on 1 March 1992.

1 January – 31 December 2008

*\*Honors Conferred from the 48th Expeditionary Operations Support Squadron- Noble Anvil. Air Force Outstanding Unit Award:*

**Emblem** (Approved 5 June 1995)

Blue and yellow are the Air Force colors. Blue alludes to the sky, the primary theater of Air Force operations. Yellow refers to the sun and the excellence required of Air Force personnel. The eagle represents the United States Air Forces in Europe and denotes the squadron's direct support to the fighter squadrons of its parent wing. The three stars stand for truth, honor, and knowledge and reflect the dedicated personnel of the 48th Operations Support Squadron.

## 56th RESCUE SQUADRON

1953-1956	<i>SC-47 Gooney Bird</i>
1953-1960	<i>SH-19 Chickasaw</i>
1972-1975	<i>HC-130 King</i>
1972-1975	<i>HH-43 Huskie</i>
1988-1992	<i>HH-3 Jolly Green Giant</i>
1992-present:	<i>HH-60 Pave Hawk</i>

**Emblem** (Approved 31 March 1989; modified on 30 April 2007).

Ultramarine blue and Air Force yellow are the Air Force colors. Blue alludes to the sky, the primary theater of Air Force operations. Yellow refers to the sun and the excellence required of Air Force personnel. The globe represents day and night rescue capabilities the unit performs for all nations. The sword and wings signify the strength and wisdom needed to fly in the harsh Icelandic environment. The ray of light indicates hope for those in desperate need.

**Emblem** (Originally approved 25 February 1943. Replaced by another emblem 9 June 1964. modified 11 February 2005)

Ultramarine blue and Air Force yellow are the Air Force colors. Blue alludes to the sky, the primary theater of Air Force operations. Yellow refers to the sun and the excellence required of Air Force personnel. The Kestrel, a type of falcon which, when angered or hungry attacks by diving fiercely on its prey. The bomb and bomb sight are indicative of the squadron's mission. The grim expression of the Kestrel depicts the unit's resolution to destroy its objectives.

## 493rd FIGHTER SQUADRON

**Emblem** (Original emblem approved 24 December 1941; modified 20 August 2003)

Ultramarine blue and Air Force yellow are the Air Force colors. Blue alludes to the sky, the primary theater of Air Force operations. Yellow refers to the sun and the excellence required of Air Force personnel. The skull represents the armor of the mind. The crossed lightning bolts represent the swift and powerful exploitation of air and space and the lethality of striking from above. The shield symbolizes defense and protection.

Motto: “MORS INIMICIS” (Death to the Enemy)

## **494th FIGHTER SQUADRON**

**Emblem** (Approved 6 December 1963; modified 30 April 2007; replaced emblem approved 22 August 1942)

Ultramarine blue and Air Force yellow are the Air Force colors. Blue alludes to the sky, the primary theater of Air Force operations. Yellow refers to the sun and the excellence required of Air Force personnel. The tri-colored “Mach” chevron denotes the “Forward Look.” The aircraft/missile and the clouds symbolize the unit’s air mission. The Black Panther, emblematic of this squadron since 1942, represents stealth, silence, and speed of attack, thus taking a victim quickly and unaware.
