

Emerging Opportunities for Youth: Integrating Behavioral Health and HIV-Related Care

Elizabeth Siegel, MA, MPP
September 30, 2011

Presentation to the Presidential Advisory Committee on HIV/AIDS

Leading Change: A Plan for SAMHSA's Roles and Actions 2011-2014

Strategic Initiatives:

- #1 – Prevention of Substance Abuse and Mental Illness
- #2 – Trauma and Justice
- #3 – Military Families
- #4 – Recovery Support
- #5 – Health Reform
- #6 – Health Information Technology
- #7 – Data, Outcomes, and Quality
- #8 – Public Awareness and Support

<http://www.samhsa.gov/>

#1 – Prevention of Substance Abuse and Mental Illness

- Create communities where individuals, families, schools, faith-based organizations and workplaces take action to promote emotional health and **reduce the likelihood of mental illness, substance abuse...and suicide.**
- **Focus on the Nation's high-risk youth**, youth in Tribal communities, and military families.

<http://www.samhsa.gov/Prevention>

#5 -Health Reform

- **Increase access** to appropriate high quality prevention, treatment and recovery services;
- **Reducing disparities** that currently exist between the availability of services for mental and substance use disorders compared with the availability of services for other medical conditions; and
- **Support integrated, coordinated care**, especially for people with behavioral health and co-occurring health conditions, such as HIV/AIDS.

Engaging Youth in HIV/AIDS-Specific Programs

Minority AIDS Initiative (MAI)

- Youth are a MAI targeted population
 - Peer-led outreach training
 - Information and referral for services
 - HIV testing
- 5-year Capacity Building Initiative (CBI) grants
 - Prevent SA and transmission of HIV/AIDS
 - Targets youth ages 18-24
 - Colleges, universities and community-based orgs

Key Challenges

- Retention
 - Grantees report that incentives help
- Engaging families and parents
 - HIV status, sex, and drugs can be difficult topics for teens to discuss with family/parents
 - Parent education may not be feasible
- Stigma
 - May affect teens' willingness to participate

Looking Forward

- Continue to offer high quality technical assistance to ensure effective use of funds
- Continue our focus on high-risk populations and communities most impacted by HIV/AIDS
- Further develop integrated systems of care
