910 through 923 Land, Owned or Ingranted.....92
930 through 939 Site Improvements.....97

Appendix "A" Investment Category Identification by
Category Codes and Maintenance Cost Accounts.....99
Alphabetical Index for Category Codes for Navy Facility Assets.....Index 1

NOTE: This publication cancels and supersedes NAVFAC P-72, Department of the Navy Facility Category Codes of March 1980 in its entirety. See paragraph 6 of Introduction for major revisions and additions to this document.

FOREWORD

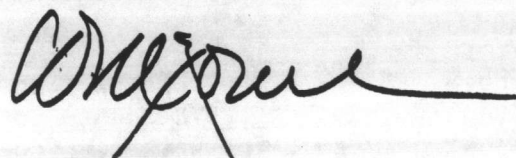

This publication establishes the category codes, nomenclature, facility type, and required units of measure for identifying, classifying and quantifying Navy facility requirements and assets. Also reported, and related to the category codes, are established Department of the Navy Investment Categories and Maintenance Cost Accounts as established by the Comptroller of the Navy. NAVFAC P-72 of March 1980 is hereby cancelled and superseded.

The category codes established herein are structured on a broader coding included in the current issues of DOD Instructions 4165.3, Department of Defense Facility Classes and Construction, and 4165.14, Inventory of Military Real Property. Those instructions interpret and implement TITLE 10 USC 2701, a statute requiring DOD to maintain an inventory of military real property. Navy's portion of that inventory is the Real Property Inventory which is based on the category codes established herein.

The Navy Facilities System is organized to provide an integrated data base for all aspects of this Command's responsibilities in the facilities business - planning, programming, budgeting, acquiring, inventorying, maintaining, operating and disposing of real property. NAVFAC P-424, Navy Facilities System, describes those applications comprising the NFS.

The contents of this publication are recorded in the Category Code Directory File maintained in the NAVFAC Facilities Systems Office (FACSO) Port Hueneme, California. That file provides consistent category code data to ADP applications maintained by the FACSO.

This publication is certified as an official publication of the Command and, in accordance with the Secretary of the Navy Instruction 5600.16, has been reviewed and approved.

W. M. Zobel
Rear Admiral, CEC, U.S. Navy
Commander
Naval Facilities Engineering Command

INTRODUCTION

1. **APPLICABILITY AND SCOPE.** The FOREWORD describes those applications within the Navy Facilities System (NFS) wherein the Category Codes/Nomenclature/Units of Measure (CCNs) established in this publication are to be used. Within those applications, the CCNs are required to identify, classify and quantify all military real property facilities owned or controlled by the U.S. Government and assigned to the Department of the Navy. To serve the NFS and the Real Property Inventory (RPI), the Category Code Directory file has been automated at the Facility Systems Office (FASCO) located at the Naval Construction Battalion Center, Port Hueneme, California, 93043. This file also includes the Department of the Navy Investment Categories (ICs) and the Comptroller of the Navy (NAVCOMPT) Maintenance Cost Accounts (MCAs) displayed herein.

2. **GUIDANCE FOR USE OF CCNs.** Different applications of the CCNs require different guidance for their use. Such guidance is provided in current editions of NAVFAC and Marine Corps publications which address those applications. Typical thereof are the following series of directives which reference NAVFAC P-72 with respect to CCNs:

- a. NAVFAC P-78, Navy Facility Assets Data Base Procedures Manual
- b. NAVFAC P-80, Facility Planning Criteria for Navy and Marine Corps Shore Installations
- c. NAVFACINST 11010.44, Shore Facilities Planning (SFP) Manual
- d. NAVFAC MO 322, Inspection for Maintenance of Public Works and Public Utilities.
- e. Marine Corps Order P 11000.12, Real Property Facilities Manual, Vol. 2, Facilities Planning and Programming

3. **MILITARY REAL PROPERTY (FACILITIES).** Land (the acreage) assigned to any one of the Armed Services is considered Military Real Property, class 1. All other real property items so assigned and constructed on or in the land (buildings, structures and utilities) are considered Military Real Property, class 2. All Military Real Property is either class 1 or 2. Every reportable item of real property, be it class 1 or class 2, is considered a facility. A parcel of land (either a fraction of, or all of the land on which an activity is located) is a facility, as is each building, structure, and utility constructed on or in that land.

4. **DOD BASIC CATEGORIES, DODINST 4165.3** (mentioned in the foreword) requires the categorizing, within property classes 1 and 2, of all Military Real Property and prescribes a structured series of Basic Categories for that purpose. One series of codes (the 900 series) is applicable only to class 1 property. The codes included therein indicate the nature, degree and type of the U.S. Government's interest (permanent, temporary, fee title, lease, permit, etc.) in the land and the method by which that interest was acquired. Eight other series of codes (the 100, 200, 300 --- 800 series) are applicable only to class 2 property and, unlike the 900 series, are indicative of the use made of the class 2 property.

5. **CODE STRUCTURE.** The CCNs tabulated herein have been developed on the structured base of the three digit DOD specified Facility Classes, Category Groups and Basic Categories to which two digits have been added to provide more definitive and effective categorization of Navy's facility assets. The structure of the DOD Basic Category and the CCNs is as follows:

- a. The first digit identifies the nine broad DOD facility classes:
 - Operational and Training Facilities.....100 Series
 - Maintenance and Production Facilities.....200 Series
 - Research, Development and Test Facilities.....300 Series
 - Supply Facilities.....400 Series
 - Hospital/Medical Facilities.....500 Series
 - Administrative Facilities.....600 Series
 - Housing and Community Facilities.....700 Series
 - Utilities and Ground Improvements.....800 Series

(The above are applicable only to class 2 property)

Real Estate.....900 Series
 (The 900 Series is applicable only to class 1 property).

- b. The second digit identifies the two or more DOD Category Groups within each of the nine facility classes,
- c. The third digit identifies the DOD Basic Category, and
- d. The fourth and fifth digits identify specific Navy Facilities within DOD Basic Categories.
- e. The following graphically illustrates the development of two Navy Category Codes, using a "Public Works Shop" as one example and a "Water Distribution Line, Potable" as another:

Facility Class	Category Group	Basic Category	Nomenclature (From DODINST 4165.3)
200			Maintenance & Production Facilities
800			Utilities and Ground Improvements
	210		Maintenance Group
	840		Water Utility Group
		219	Facilities Maintenance & Repair
		842	Water Distribution
	Category Code (Navy)		Nomenclature (From NAVFAC P-72)
	219-10		Public Works Shop
	842-10		Water Distribution Line, Potable

6. CURRENT REVISIONS. This edition of NAVFAC P-72 differs from the previous editions in seven significant respects which are as follows:

- a. The Office of the Secretary of Defense (OSD) has revised Basic Category 153 from Cargo Handling Facilities to Cargo Handling or Staging Area and simultaneously created a new Basic Category 156, Cargo Handling Facilities/Building. Several Category Codes within Basic Category 153 have been reassigned to 156.
- b. OSD has established several new Category Groups and Basic Categories within the 300 Facility Class. As a result of this addition, it has become necessary to thoroughly review all of the Category Codes in the 300 Facility Class and revise, delete, and add new codes as required.

The only category codes numbers which have not changed, but now have a different nomenclature are: 300, 310, 390, 390-10, 390-14, 390-18 and 390-20.

- c. A new Unit of Measure has been established for use in the 400 Facility Class. Units of measure formerly specified for Covered General Supply Facilities in Basic Categories 431 and 441 were Square Feet (SF), Net Square Feet (NS) and Average Clear Stacking Height (SH). A new Unit of Measure has been developed, "TC" or Total Cubic Feet, which is now substituted for NS in order to facilitate the review of supply facility requirements by eliminating some of the calculations required to determine deficiencies and excesses, since $TC = NS \times SH$.
 - d. OSD has revised the nomenclature for Category Group 510, 530 and 550. Accordingly, category codes within these groups have been reassigned as required.
 - e. A new Unit of Measure has been established for use in the 500 Facility Class. LC, or Light Care, refers to a berthing space in a hospital designed for Light Care or Alcohol/Rehabilitation patients. These spaces are not designed to care for acutely ill patients and are not included in normal bed capacity.
 - f. The titles for several Category Groups and Codes in the 720 Facility Class have been revised by eliminating the use of the words "Men", "Women", and "Bachelor". The appropriate designations for these descriptions are now "Persons" and "Unaccompanied Personnel". As a result of these changes, which were initiated by OSD to eliminate the need to differentiate between men's and women's facilities, the assets under Category Codes 721-21, 721-22, 721-23 and 721-25 have been reassigned to the following corresponding Codes: 721-11, 721-12, 721-13 and 721-15.
 - g. The Unit of Measure for "MN", Men/Persons, has been revised to "PN", Persons, Designed Capacity.
7. USE OF THE WORD "NO". The word "NO" opposite a CCN indicates that facilities under that CCN are not required to be entered as an identified Basic Facility Requirement on the Facilities Planning Document during update of the Facilities Requirements Plan. The activity may, if desired, use the Planning System to document a requirement for a particular CCN with the "NO" designator. In either case, the development of the Basic Facility Requirement for a CCN with "NO" designator must be completed prior to submission of a project related to that CCN. (This does not apply to Family Housing and Marine Corps CCN's). The "NO" designator does not apply to Engineering Evaluations.
8. CCN/IC/MCA RELATIONSHIPS. Such relationships are seldom changed. However, when they are changed, they are promptly introduced into the automated CCN file, and subsequently established in changes to/revisions of this publication. When, infrequently, such changes are required, they are made as follows:
- a. IC changes are implemented through the NAVFAC Military Construction Programming system.
 - b. MCA changes are initiated by NAVCOMPT.
9. UM REPORTING. For each five digit Category Code, the CCN structure established herein lists at least one and as many as three UMs, one of which has been enclosed in parentheses. For RPI reporting, each listed UM is required whether or not it has been parenthesized. The parenthesized UMs are "Prime Units of Measure".

10. FUTURE CCN REVISIONS. Any shore activity, its Superior in the Chain of Command (SICC) or an Officer in Charge of Construction (OICC) may initiate a request for CCN revision. The current flexibility of FACSO's automated CCN file and streamlined NFS procedures permit establishing a new CCN within the time required to fulfill the purpose of a requested revision. The following applies:

- a. Initiating Requests for CCN Revision. CCNs for newly acquired facilities are usually assigned by the OICC or in the EFD. Occasionally, however, the assignment of CCNs is the responsibility of a shore activity or the SICC. If no established CCN is appropriate, or if a changed nomenclature or unit of measure for the established category code is required, the OICC/reporting activity/SICC refers the matter to the appropriate EFD for review and submittal to NAVFAC code 2013. (Responsibility for discontinuing obsolete CCNs is NAVFAC's.)
- b. Information Required. The EFD should include in each request for CCN revision(s) the following information:
 - (1) Name and UIC of activity requiring the revision,
 - (2) Recommended three-digit Basic Category in which the requested CCN is required, or the five-digit category code for which the changed nomenclature/UM is required,
 - (3) Acquisition cost (or current estimate thereof) of facility for which CCN revision is requested,
 - (4) Reason(s) why established CCNs are considered inaccurate or inadequate, and
 - (5) Other pertinent available information or comments such as existence of plans to acquire other facilities of the same general nature; location(s) and costs of such facilities; and recommended pertinent planning factors to be included in NAVFAC P-80 for the recommended CCN revision(s).

UNITS OF MEASURE
AND THEIR SYMBOLS

AC	Acres	LC	Light Care (hospital spaces) ¹
BD	Hospital Beds, Normal Capacity	LF	Linear Feet
BL	Barrels (42 gals each)	MB	Millions of BTU Per Hr. (capacity)
BX	Boxes (fire alarms etc)	ME	Meters (length) ¹
CF	Cubic Feet	MG	Millions of Gallons ¹
CM	CF/Minute ¹	MI	Statute Miles
CP	Candle Power ¹	NF	Net Square Feet (housing) ^{1,2}
CY	Cubic Yards	NS	Net Square Feet (storage) ^{1,3}
DS	Depth of Water Over Sill @ High Tide ¹	OL	Outlets (number of)
DW	Depth of Water @ Low Tide	OU	Operating Units
EA	Each	PH	Pounds Per Hour ¹
FA	Family Units (housing)	PN	Persons, Designed Capacity
FB	Feet of Berthing (ships/boats/ small craft)	SE	Seats (number of)
FP	Firing Point (firing ranges) ¹	SF	Square Feet
GA	Gallons	SH	Stacking Height ³
GM	Gallons Per Minute	SI	Sites ¹
HO	Holes (golf course) ¹	SP	Service Points ¹
KG	Thousands of Gallons Per Day, Capacity	SY	Square Yards
KV	Kilovolt-Amperes, Capacity (KVA)	TC	Total Cubic Feet ^{1,3}
KW	Kilowatts ¹	TH	Tons Per Hour (capacity) ¹
LA	Lanes (bowling) ¹	TN	Tons (capacity)
		VE	Vehicles (number of)

¹Not listed in DODINST 4165.3 of 24 Oct 1978, as amended

²As defined by NAVFACENCOM for housing purposes

³As defined by NAVSUPSYSCOM for supply facilities

INVESTMENT CATEGORY (I. C.) NUMBERS AND DESCRIPTIONS

I. C. NO.	DESCRIPTIONS
1.	Aviation Operational Facilities 111, 112, 113, 116, 121, 133, 134, 136, 141, 149
2.	Communication Operational Facilities 131, 132, 135, 131
3.	Waterfront Operational Facilities 151, 152, 153, 154, 155, 156, 159, 122, 161, 162, 163, 164, 165, 169
4.	Other Operational Facilities 123, 126, 137, 138, 142, 143, 148
5.	Training Facilities 171, 179
6.	Aviation Maintenance/Production 211, 221
7.	Shipyard Maintenance/Production 213, 223

WATER-DISTRIBUTION SYSTEMS -
NONPOTABLE (REV)

Mains, pumps, distribution lines for irrigation systems, and flushing systems using nonpotable water (other than fire protection systems, but may be used for combined systems such as flushing and fire protection, etc.)

NOTE 1. The Category Codes indicated in this change are either new, revised, or deleted. The classifications are defined in the following manner:

New Category Codes are indicated as "(NEW)".
Revised Category Codes are indicated as "(REV)".
Deleted Category Codes are indicated as "(DEL)".

Where (NEW), (REV) or (DEL) is not indicated the Category Code number and nomenclature is current and either one, some, or all of the following have been changed: Unit(s) of Measure, Maintenance Cost Account Number, Investment Category Code Number and the Facility Requirements Report Indicator.

NOTE 2. The 211 Category Codes series has been extensively revised in accordance with the recommendations made by the Joint Aeronautical Depot Maintenance Action Group (JADMAG), whose function is to recommend policies and actions necessary to assure effective and efficient tri-service aeronautical depot level maintenance. A JADMAG recommendation has resulted in the implementation of ten digit designation codes for depot level production shop categories which are used primarily for workload capacity analysis. Accordingly, the aircraft maintenance facility Category Codes have been revised so that the five digit facility Category Codes designated for Naval Air Rework Facility (NARF's) will correspond to five of the ten digits used in the production shop categories.

However, in order to implement this new system, it has become necessary to develop several pseudo-Category Codes to be used on a temporary basis. These pseudo-Category Codes all end in zero and are identified as follows: 211-10, 211-20, 211-30, 211-40, 211-50, 211-60, 211-70, 211-80, and 211-90. The purpose of these codes is to list the Basic Facility Requirement (BFR) for the NARF Category Codes which follow the pseudo-Category Code in that particular ten digit sequence (211-22 through 211-27 follows 211-20), until the BFR can be identified separately for the individual Category Code in that group. New BFR's are to be developed for the individual Category Codes and not the pseudo-Category Codes.

MAINTENANCE - SHIPS/SPARES

1. Facilities for maintenance/repair of vessels, such as surface ships, submarines, floating cranes, floating drydocks and tracked amphibious vehicles. Excludes shipbuilding facilities (223 series), waterfront operational facilities (150 series), ship missile systems equipment maintenance facilities (212 series) and shipboard electronic equipment maintenance facilities (217 series). Shop numbers listed herein (06 thru 99) conform to those assigned by NAVSEASYSKOM. Letters E, A, B, etc., are designations of major functional work grouping which are further subdivided to standard work centers, etc.
2. The following category codes have been deleted and the functions formerly performed therein have been reassigned to other shops

900					REAL ESTATE			
910					LAND - GOVERNMENT OWNED			
911.					LAND PURCHASE, CONDEMNATION, DONATION, OR TRANSFER			

Land in the United States and its possessions, and owned in fee by the Federal Government, and assigned to Navy custody and accountability. This includes land acquired by purchase, condemnation, donation, or transfer. Also include reclaimed or accreted lands if title is vested in the Federal Government and such lands are under custody and accountability of a military department. So long as custody and accountability for a parcel of land remains in/ with Navy, no category code in this (911) basic category will be changed; i.e., should a land parcel be reassigned to another Naval activity, these 911 series codes will not be changed. The following Maintenance Cost Accounts are to be used as appropriate:

911 - 50	LAND	(AC)			LAND - EXCHANGE		18	NO
912					LAND-PUBLIC DOMAIN WITHDRAWAL (APPLIES ONLY TO CONTINENTAL UNITED STATES AND ALASKA)			
					Land acquired originally by withdrawal from public domain under jurisdiction of Department of the Interior, through Executive Order or Public Order, by a military department. This excludes public domain lands used under license or permit; such public domain lands will be included under category code 913. So long as custody and accountability for a parcel of land remains in/with one of the military departments, no category code in this (912) basic category will be changed; i.e., should a land parcel be reassigned to another naval activity or transferred to another military department, these 912 series codes will not be changed. The following Maintenance Cost Accounts are to be used as appropriate: 7410, Improved Grounds; 7430, Semi Improved Grounds and 7440, Unimproved Grounds.

2. Category Codes to be Excluded From BFRL. Except for the following category items, needed facility requirements will be included for all category codes series of NAVFAC P-72:

- 135-10 Communication Lines
- 135-20 Telephone Lines
- 710-00 Family Housing
- 812-00 Electricity--Distribution and Transmission Lines
- 822-00 Heat, Steam Transmission
- 824-00 Heat, Gas Transmission
- 831-20 Outfall Sewer Line
- 831-30 Septic Tank and Drain Field
- 832-10 Sanitary Sewer
- 832-20 Combined Sewer
- 832-40 Industrial Waste Sewer
- 841-20 Water Supply Mains and Pumping Facilities
- 842-00 Water Distribution System
- 843-10 Water, Fire Protection Pipeline
- 850-00 Roads and Streets
- 852-00 Sidewalks and Other Pavement
- 860-00 Railroad Tracks
- 870-00 Ground Improvement Structures
- 880-00 Fire and Other Alarm Systems
- 890-31 Oxygen Distribution System
- 890-60 Irrigation Facility
- 930-00 Buildings, Site Improvement, Demolition
