November 24, 1987

Dear Customer:

Effective January 1, 1988, a revised manifest will be required for shipments of low-level radioactive waste received at US Ecology's disposal facilities in Beatty, Nevada and Richland, Washington. Copies of these new forms dated "REV. 5/87," are being sent to you along with this letter.

The changes in the manifests can be summarized as follows:

1) All US Ecology manifest forms are now printed on continuous feed computer paper;

2) Spacing on the two manifest forms has been adjusted to ensure proper alignment at six lines per inch for use in typewriters and computer printers;

3) Box #6 on the front page has been adjusted to allow room for the "Reportable Quantity Name," also, the "Proper Shipping Name" list has been rearranged;

4) Codes for Columns 14 and 15 on the Continuation Page have been expanded, and each column now allows for up to three codes to be entered;

5) The former Column 19 for "DOT Sub-Type" has been eliminated, and all column numbers beyond 18 have been decreased by one.

Please be aware that these new manifest changes will be effective for waste received at US Ecology's disposal sites on or after January 1, 1988. Also, effective with that date, all manifest data must be provided on the manifest forms supplied by US Ecology. **Other formerly approved forms will no longer be accepted.**

Now, as in the past, these forms are provided to US Ecology's customers without charge. Feel free to write or call if you need any additional information or if you wish to order a larger quantity of the forms.

Sincerely,

Gary Young
