Subj: PROPERTY; TURN-IN

1. The Water Quality Control Laboratory, Account 31, has several items that would like to turn-in. Three of the items are off the CMR. Several items and assistance is going to be required on the deck of Bldg. 65. The items are

1. Write out LTI
2. Do we need window air cond
or back up? If we do
drop A & and request BMO
to fix it.

LTI = LIMITED
TECHNICAL
INSPECTION
Julia

Total Kjeldahl Nitrogen Hood, serial number 111T. This is a piece of laboratory equipment. Base Maintenance does not have the expertise to Limited Technical Inspection. The last time it was used, it was in 1978. It has sat unused for several years. The laboratory has no need for this. This is a very large item (larger than

Total Organic Carbon analyzer, Serial number 111T. This is a piece of laboratory equipment. Base Maintenance does not have the expertise to LTI. It is not operational, it apparently has a short in it. The laboratory has no need for it and it is also outdated.

4. Plant Account #532332, Mobile Radio, serial number 1416294. This radio was replaced. No one has responded to your request for an LTI.

5. TAM FM 4117, NSN 6640-01-C00-0001, Incubator, serial number 111T. This incubator is the size of a refrigerator. If an LTI is required, I suspect Base Maintenance might not have the expertise. The temperature control does not always work.

6. TAM GM3902, NSN 7110-00-C00-0397, Single Pedestal Desk. This has been replaced. It is a wooden desk painted gray.

7. TAM GM3917, NSN 7110-00-C00-0396, Typist Desk. This has been replaced.

8. TAM FM 0937, NSN, 4120-00-905-4232, Air Conditioner. This window unit does not operate. The room is now cooled by a central unit.

Subject: PROPERLY: 100-100

1. The water quality control laboratory, located at 100-100, has several pieces of property which we would like to have. These are: three sets of three eye plant account and three sets of three eye plant account. These are large and heavy and would be difficult to move. We are looking for the second set of three sets of three eye plant account.

2. Many of the items listed in the attached list are very old and have been in the laboratory for a long time. The laboratory does not have the facilities to store these items. It is suggested that the items be sold or disposed of. The laboratory has no need for these items. This is a very large list of items. It is also suggested that a representative be appointed.

3. Four items listed in the attached list are very old and have been in the laboratory for a long time. These items are: a set of three eye plant account, a set of three eye plant account, a set of three eye plant account, and a set of three eye plant account. It is suggested that these items be sold or disposed of. The laboratory has no need for these items. It is also suggested that a representative be appointed.
